PREFACE

THE following work was originally written as a dissertation for the degree of B.A. with Honours in English Language and Philology in the University of Liverpool. It has since been completely revised and brought up to date. The scope of the book is purely linguistic; no attempt has been made to describe geographical or topographical features, although these have naturally been taken into account in determining etymologies.

My source for the modern forms of the names has been Kelly's *Directory of Kent, Surrey and Sussex*, amplified by reference to Bartholomew's *Survey Gazetteer of the British Isles* and to the *Times Atlas*. Besides the Introduction, the work falls into two parts. Part I contains in alphabetical order all Sussex names for which early forms have been found, with a discussion concerning their meaning and history; Part II presents classified lists of the elements occurring in Sussex names. Many names which through lack of early spellings do not appear in Part I will thus be found in Part II under their separate elements.

It is my pleasant duty to return my best thanks to Professor H. C. Wyld, who suggested the work and who, always ready with help and advice, has since revised the proof-sheets with me; also to Professor Mawer, of Armstrong College, Newcastle, who, when External Examiner to the University of Liverpool,

read the original MS. and gave me many hints for its improvement. I have also to thank Professor Dibelius, of Hamburg, who read the whole of the manuscript as it was being revised, offering many valuable suggestions and criticisms, and the Rev. A. A. Evans, Vicar of East Dean, who has given me much information about local pronunciations when Hope's *Dialectal Place-nomenclature* failed me. In Part I I have marked with E. the forms which I owe to Mr Evans. I have naturally made much use of the literature of place-names mentioned in the Bibliography below; especially would I thank my friend and former fellow-student, Mr B. Walker, of Cowley Grammar School, St Helens, who supplied me with much information from the MS. of his *Derbyshire Place-names*, which has now appeared.

Since the work is not intended for beginners, I have omitted too minute an explanation of the linguistic phenomena observable in the development of Sussex Place-names. For the same reason the number of references to the results obtained by my predecessors in place-name research is large, and I hope this feature will contribute to the utility of the monograph.

INTRODUCTION

§ 1. *Spelling.*

Many of the apparent sound-changes which appear in D.B. and in the 11th and 12th centuries are merely spelling-changes, and are due to the attempts of Norman scribes to render sounds which had no symbols in their alphabet. Moreover the same scribes frequently wrote Norman-French symbols for English sounds which had equivalents in their own speech. The M.E. *seldcēne* for O.E. *seldgesēne*, and the modern Sussex *Alciston* for O.E. *Ælfsigestūn* are examples of this habit.

(a) Of Norman-French attempts to render English sounds foreign to the scribes, D.B. has numerous instances. They were especially vague about diphthongs; the O.E. *ēā* appears variously in D.B. as *a*, *e*, *ae*, and even *ai*.

The spelling *-ey-* in early documents often seems to be an attempt to express the long tense *ē*. Cf. *Steyning* and *Treyford* (= *trēōford*) below, and *Chelmorton* in Walker, Derby. Pl.-Ns.

(b) Among consonants, *-h-* = *-ĥ-* (front-open-voiceless) was usually expressed by *-s-* (see early forms of *Brightling* and *Brighton* below), and the English *þ* (voiced or voiceless) was written almost universally *t* or *d*. Cf. such D.B. spellings as *Tacheha* for *Thakeham*, and *wrde*, *worde* for O.E. *weorþ*, "homestead." The spelling *-ch-* in D.B. very seldom expressed (*tf*) the descendant of O.E. *ċ* (front-stop), but was principally used to indicate the back-stop. Cf. such D.B. spellings as *Chingestone* for *Kingston* (q.v. below) and *chemere* for *Keymer* (q.v.). The Lancashire *Knowsley* appears in D.B. as *Chenulweslei* (= O.E. *Cēn(w)ulfeslēāh*; see Wyld, Lancs. Pl.-Ns., under this name).

The O.E. symbol *c* was always written for the O.E. *ċ* (< *tf*) sound during the whole of the O.E. period, and part of the early M.E. (till about 1150), and when this symbol appears in D.B. it either means (*tf*) or (*s*) (cf. *Alciston*, p. 1 below), and *never* (*k*).

(*c*) Before combinations of *s* + cons. in the initial position, the Normans prefixed a "prothetic" *e*- which was pronounced as (*e*) or (*ε*), and which survives in French at the present day. Cf. Fr. *état* < *estat* < Lat. *statum* (acc.); *être* < *estre* < Late L. **essere*; *écu* < *escue(t)* < Lat. *scutum*; *espace* < Lat. *spatium*, etc.

This *e*- is often found before Engl. names beginning with *s* + cons.; for examples cf. D.B. *Eslindone* = *Slindon*; *Estrat* = *Streat* or *Street*; *Estocbridge* = *Stockbridge* (see these names below) and *Esmedune* = *Smithdown (Road)* (Liverpool), q.v. in Wyld, Lancs. Pl.-Ns.

This change, however, was purely Norman-French, and, as far as I am aware, no modern English pl.-ns. show retention of the *e*-. At any rate, no examples are adduced by Zachrisson (Anglo-Norman Influence on Engl. Pl.-Ns.).

§ 2. *The chief M.E. spelling-changes.*

(a) *Vowels.*

1. *ǣ* is written *o* (but pronounced *ǣ* > mod. *a*, *u*) in the neighbourhood of *w*, *m*, *v*, *n*, *l*, *r*. O.E. *-tūn* > *-tǣn* (unstressed), generally written *-ton*; so also O.E. *-dūn* > *-dǣn* = *-don*. The early forms of *Woolavington* (q.v.) have five *Wol*-, *Woll*- as against one *Wullavington* in 1411-12.

2. O.E. *ū*, M.E. *ū* written *ou*, *ow* probably through influence of French. O.E. *hūs*, M.E. *hous* (M.E. *ū*, *ou* pronounced as *ū*, probably not diphthongised till late in the 15th century). O.E. *mūs*, M.E. *mous(e)*, etc.

3. There is another M.E. *ou* which is a diphthong and represents (*ou*) or (*ōu*), as in *Houghton*, *Stoughton* (q.v.). This *-ōu*- was levelled under *-ǣu*- and developed into modern (*ō*).

4. M.E. *y* represents (*ī*) less often (*ĭ*) but never (*ȳ* high-front-tense round). This latter sound is written *u*, and sometimes *ui* if long.

5. From the 14th century *-ie-*, *-ye-* were often written for M.E. tense (\bar{e}) as distinguished from the slack (\bar{e}) which was generally *ea*, *e*. Cf. mod. believe, as lief, reprieve (M.E. \bar{e}); stead, head, lead (M.E. \bar{e}). On *-ey-* for (\bar{e}) cf. 1 (α) above and the *-ei-* spellings in *Grinstead* below.

(β) *Consonants.*

1. O.E. \dot{c} > M.E. (t) generally written *-ch-* initially after the beginning of the 12th cent., and occasionally medially as *-tch-*, but not before the 14th cent. See the early forms of *Echinham*.

2. O.E. \dot{s} > M.E. (f) written variously. *Sch-*, *sh-* and *-ss-* (the latter is common in Kentish texts and is possibly due to N.-Fr. influence). See early forms of *Shipley* below.

3. *u*, *v* are written indifferently for (*v*). It is sometimes difficult to decide whether *u* is a consonant or a vowel. Cf. the common Ancrén Riwe spelling *vuel* (= üvel = O.E. *yfel*), and as a second element M.E. *-oure* < O.E. *ōfre* (dative), "a bank" (see *Bignor* below), *w-* sometimes = *wl-*, cf. *Wlavinton*, H.R. ii. anno 1274 = *Woolavington*, and the common *-wrth* = O.E. *weorþ*.

4. O.E. *h* (back-open-voiceless) and O.E. \dot{h} (front-open-voiceless) generally written *g*, *gh*, sometimes *c* in the combination *-ct-*. Cf. *-leggh*, *-leg* = O.E. *lēāh*, and see *Brighton*, *Houghton* and *Laughton* below.

§ 3. *Phonology.*

(α) *Vowels. Isolative changes.*

1. O.E. \bar{a} , M.E. \bar{q} , mod. \bar{o}^u . O.E. *stān*, M.E. *stēn*; O.E. *-hlā*, M.E. *lē*, mod. *-lowe* (= *-lōu*) as a second element.

2. O.E. $\bar{æ}$ generally > \bar{a} in M.E., but often \bar{e} in Sussex. O.E. **Bæbbantūn* > mod. *Babintone*, but also *Bebyngton* and *Bepton*; O.E. *Ælfesstede* and *Ælfwinesstede* > M.E. *Elvestede* and *Elnestede* respectively > mod. *Elstead*: O.E. *cnæpp* > Knepp Castle (all early forms in *-a-*).

3. O.E. $\bar{æ}$ (= W.Gmc. \bar{a}) and $\bar{æ}^2$ (*i*-umlaut of O.E. \bar{a}) together with O.E. $\bar{ēā}$ are levelled under M.E. slack \bar{e} (if not previously shortened). O.E. *gemæru* > M.E. (1) *mēre*, "boundary" [= $\bar{æ}$]: O.E. *lēāh*, *Ēādburg* > late O.E. *lēh*, *Ēdburg* > M.E. *lēh*, *Ēdburg*. On shortening of this $\bar{æ}$ see § 3, γ (1) below.

4. O.E. \bar{e} (1. mutation of \bar{o} ; 2. lengthening of \check{e} before $-ld$, $-nd$, $-mb$, etc.; 3. Kentish type of \bar{e}^2 , cf. 3 above) is levelled with O.E. $\bar{e}\bar{o}$ and becomes M.E. tense \bar{e} , if not shortened by combinative change. Examples— $\bar{e}^{(1)}$, O.E. *grêne*, M.E. *greene*, see *Grinstead*; $\bar{e}^{(2)}$, O.E. *fēld*, M.E. *fēld*, mod. "field"; $\bar{e}^{(3)}$ (Kt. type of \bar{e}^2). O.E. *stēningas* > late Kt. *stēningas* > M.E. *stēninges* > *stēnings* (see Luick's 3 syllable theory below), mod. *Steyning* = (steniŋ).

5. O.E. \bar{i} , \check{i} remained in M.E. \bar{i} was later diphthongised and developed into mod. (ai). Cf. O.E. *sittan*, mod. *sit*: O.E. *rīdan*, mod. *ride* (= raid).

6. O.E. \bar{o} > M.E. \bar{o} , later over-rounded to \bar{u} and generally spelt $-oo-$. This \bar{o} or $-oo-$ was never confused with the slack $\bar{ō}$ from O.E. \bar{a} or the lengthening of O.E. \check{o} in open syllable. O.E. *pōl*, mod. *pool* (pūl); O.E. *brōma*, "genista"; M.E. *brome*, *broome*, see *Broomhill*.

7. O.E. \bar{u} > M.E. \bar{u} later diphthongised to mod. (aŷ). Cf. § 2, α (2) above.

8. The question of the distribution of the M.E. i , e , and $ŷ$ spellings for O.E. \check{y} has been made the subject of a careful enquiry by Wyld in *Engl. Studien* 41, 1913. In Sussex u and e predominate, while i occurs comparatively seldom. For example, O.E. *hŷrst* occurs in the early forms generally as *-hurst* or *-herst*, rarely as *-hirst*, while no modern Sussex name has the latter spelling. In the discussions under the names below I have arranged the M.E. forms under separate types. Very often only one type remains in the modern name, but sometimes two are preserved. See for example, *Chidham*, *Didling* or *Dudelyng*, *Guilford* or *Guldeford*, *Rotherbridge* and *Piddinghoe* below.

There are some cases in which i , e , and u appear in M.E. where the starting-point is not O.E. \check{y} . Cf. *Chidham* below, in which M.E. *Chedham* < O.E. **Ceddanhām* (undiphthongised), M.E. *Chidham* < O.E. **Ciddan-* (W.S. monophthonging), M.E. *Chudeham* < O.E. *Cyddan-* (W.S. rounding of i , ie to y). See also *Bilsham* in Pt I.

(β) *Vowels. Qualitative combinative changes.*

1. O.E. *āw* > M.E. *ǣu* > mod. (ē).

O.E. *hlāw* > M.E. *lāwe* > (l̄). See *Cudlawe* and *Cudlow* below. Mod. *-low* (-lou) is from the O.E. nom. *hlā* type.

O.E. *crāwe-* > M.E. *crau-* > (kr̄-). See *Crawley* below and compare *Crowhurst* < O.E. **Crāhyrst*.

2. O.E. *aga* > *au* > (ō); O.E. *dragan* > M.E. *drawen*; O.E. *scaga* ("wood," "shaw") > M.E. *shaw(e)*.

3. M.E. *a* is diphthongised to *au* before a nasal and before *l*-combinations. These changes are generally taken to be due to the influence of Norman-French. In modern English sometimes the diphthongised, sometimes the undiphthongised type has survived; cf. *chance*, *lance*, *aunt*, *ant*, *haunt*, *launch*, *paunch*, etc. In Sussex: (1) Before nasals. O.E. **Eammerlāh* > M.E. *amberlei* > *aumberlei* (see *Amberley*, Type II, below); late O.E. *Wlancing* > M.E. *Lansing* (N.-Fr. influence, see the names in Pt I) > *Launsing* > mod. *Lancing* (l̄ōnsiŋ) and (l̄ānsiŋ). (2) Before *l*-combinations. O.E. **Cufald* > M.E. *Coufald*; appears once as *Cufaude*; M.E. *Balecumb* and *Baldcumb* > late M.E. *Baulcumb* > mod. *Balcombe* (b̄ō(1)kəm). Examples are numerous in the names treated in Pt I.

4. O.E. *ǣg*, *ĕg*, *ǣh*, *ah*, *eh* or such combinations if they arose early in M.E. > *ai*, *ei* > mod. (ei).

O.E. *weg*, M.E. *wei* also later *wai* > *way*; *græg* > *grai*, *grei*; O.E. **māgfeld* > *Mayfield* (q.v. below); O.E. *lēhtun* > M.E. *lēhtun* > *leihtun* > (*leitn). See *Laughton*, Type I below, and cf. Phonology, § 3, γ (1).

5. *e* is diphthongised to *eu* before *l*. This is a N.-Fr. change and only appears in the element *-feud* = O.E. *feld* and in *Beuchief* (= Beachy q.v.) < *bel chef*. No trace has survived in modern Sussex names.

6. O.E. early M.E. *er* > *-ar-*. This is a well-known sound-change. Cf. the standard pronunciations of *Derby*, *hearth*, *clerk*, etc. all with *ā*. Sussex examples are M.E. *Bercombe* > *Barcombe*; O.E. *ceorlatūn*, mod. *Charlton*; M.E. *Herst Monceux* > **Hermonceux* > (hamaunsiz). See *Herst Monceux* below.

7. M.E. *e* is raised to *i* before certain consonant combinations, especially before nasals. It is not possible to decide definitely whether the change is combinative or isolative. Morsbach (Me. Grammatik, pp. 143-4) says the change takes place mainly before *d, t, s, þ, r, l, n* (vor dentalen und dental-nasalen), before *gġ, ch, sh, x, gg, k* (vor palatalen reibe- und verschlusslauten) also before *ng, nk*. The change begins in the 13th century and is commoner in the 14th. See the early forms of *Grinsted* below, where six forms in *Grin-* appear between 1316 and 1421. Examples of this sound-law before nasals are very common. Cf. the very name *English* (īnglif). In Sussex: (1) Before nasals. O.E. **bĕānstede* > M.E. *bēnstede*, mod. *Binsted*; O.E. **Bēānheretūn* > M.E. *beneretun* > *bendritun*, mod. *Binderton*; O.E. *grēnstede*, mod. *Grinsted*. O.E. **Ēomræ(es)horn* > M.E. *Emberhorne*, mod. *Imberhorne*. Cf. also Jespersen, Mod. Engl. Grammar, pp. 64, 65. (2) Otherwise: before M.E. *-ch*—O.E. *Eccanfeld*, mod. *Itchingfield*; before M.E. *-s*—O.E. *mēōswille*, mod. *Miswell*.

Cf. also the examples given by Walker in Derby. Pl.-Ns., *Idrigehay* (= iðəsi) < O.E. **Ēādricesġehwæge*; *Ilkeston* < **Eolcestūn*. These raisings may in some cases be due to some analogy, but how it is not easy to see. It is difficult to understand why *e* should be raised in so many cases, and yet by no means everywhere.

8. The influence of an initial lip-stop is seen in the 1579 *Bordham* for mod. *Birdham* < O.E. **bridhām*, and in 1316 *Borlavvyton* (modern *Barlavington*) < *Berlaventun* < O.E. **Beornlāfantūn*. Perhaps also in the form *Boleynshurst* = M.E. *Bil-lingeshurst*, although in this case the *Boleyn-* may be a mere N.-Fr. spelling.

Cf. also modern names in *War-* (wō-). In this case the rounding belongs to the modern period and was perhaps not completed till the beginning of the 19th century. See Jespersen, Mod. E. Gr., and Horn, Hist. E. Gr. Examples in Sussex are: *Warminghurst* < O.E. **Wermanhȳrst* < **Wyrman-*; *Warnham*, *Warningcamp*, and *Warninglid*, all of which go back to O.E. **Wernan-* gen. of the pers. n. *Werna*, and *Wartling* < O.E. **Wertelingas* < **Wyrtelingas*. See all these names below.

(γ) *Quantitative Vowel Changes.*

1. There are of course numerous examples in Sussex of the usual lengthenings in open syllables and shortenings before consonant combinations, of which the pages of Pt I show ample proof. It is worth noting that O.E. *ēā* and *ǣ*, which were levelled under *ǣ* in late O.E., appear when shortened in M.E. as *ǣ* or *ɛ* according to the period in which the shortening took place. On this point see Pogatscher, *Anglia* XXIII. pp. 302 ff., and Ritter, *Anglia*, June 1913, pp. 269 ff., also Jordan's article on M.E. dialects in the *Germanische-Romanische Monatschrift* II. p. 124. In Sussex the O.E. *lēāhtun* > *lēhtun* > (i) *lähtun*, (ii) *lēhtūn* > *lēhtun*. Type I has given rise to the modern *Laughton*, but the second, which would give **Leighton*, is common among the early forms. O.E. **Hǣplēāh* appears in mod. Sussex as *Hadlow* (with change of suffix), whereas **hǣþfeld* gives *Heathfield*, locally pronounced as (hefl). O.E. *Easttūn* > *Easton*; **Ēādburgtūn* > *Edburton* in Sussex; but cf. the numerous *Astons*, *Abram* (= **Ēādburgham*) in Wyld, Lancs. Pl.-Ns., and *Adderbury* in Alexander, Oxf. Pl.-Ns. Ritter (*Zur engl. \bar{A} / \bar{E} Grenze*, loc. cit.) quotes *Edmund*, *Edward*, etc. by the side of *Abberley*, *Abberton*, *Adbalton*, *Atherstone*, etc., and gives for O.E. *hǣþ*- the developments *Hat*-, *Had*-, *Heat(h)*-, *Head*-.

2. *Shortening of accented long vowels in M.E.*

Many trisyllabic pl.-ns. in mod. Engl. have a short vowel in the first syllable, whereas in the M.E. prototypes this vowel was long. This shortening was explained by Luick in the third of his "Beiträge zur englischen Grammatik" in *Anglia* xx. pp. 335 ff. On p. 339 he states "das gesetz, ... wonach in dreisilbigen Wörtern und überhaupt formen länge gekürzt wird und andererseits natürlich vorhandene kürze trotz stellung in offener silbe bewahrt bleibt." Among his examples are *Coventry* < M.E. *Cōventre* < O.E. *Cōfan*-; *Whitaker* < O.E. *hwītæcer*; *Beverley* < O.E. *Beoforlic*; *errand* < M.E. *ērende* < O.E. *ǣrende*; *ammot* < O.E. *ǣmette*, etc.

Examples of this shortening in Sussex are *Beddingham* < M.E. *Bēdingehomm* < O.E. *Beadingahamm*, contrast *Beeding* <

O.E. *Beadingas*; *Bevendean* < M.E. *Bēvendene* < O.E. *Beofandenu*; *Poynings* (= paniŋz) < M.E. *Pūninges* < O.E. *Pūningas*; and *Steyning* (= steniŋ) < M.E. *Stēninges* < O.E. Kt. *Stēninges* < *Stēningas* (æt *Stēningum* in C.D.). See all these names in C.D. and note that the last two, through having lost the M.E. *-es*, have become disyllabic in mod. Engl. Possibly also this law will explain *Rodmell* (q.v.) < M.E. *Rōdemelde* < O.E. *rēādamyldē* with shifting of stress to the second element of the diphthong.

3. *Loss of syllables in unstressed positions.*

It frequently happens that a long pl.-n. containing a long O.E. word as its first element appears in a considerably shortened form in mod. Engl. In these cases a syllable has been lost in M.E., mainly through the levelling of unstressed vowels which took place in that period and subsequent syncope. When this happened, there arose an unpronounceable consonant-combination which was simplified by dropping the whole syllable. See Wyld, *Lancs. Pl.-Ns.*, § 14, pp. 27-28.

Examples in Sussex are O.E. **Briht(helmes)tūn* > *Brighton*; O.E. **Ceorl(lāce)tūn* > *Charleston*; O.E. *Gōd(wine)wudu* > *Goodwood* (gudəd); O.E. *Wīg(stāne)tūn* > M.E. *Wihstūn* > mod. *Wiston*. Cf. also the pronunciation *Barlton* for *Barlavington*, which also shows this phenomenon. I.e. O.E. *Bcornlāfantūn* > M.E. *Ber(n)lavinton* > *Barlavington* as one type, and M.E. *Berlavinton* > *Berl(vn)tun* > *Berltun* > *Barlton* as the other.

(8) *Consonants. Isolative Changes.*

1. O.E. medial *-h-* (back-open-voiceless) is labialised in M.E. to *h^w* > mod. (*f*). O.E. *Burghām* > *Burhhām* > M.E. *Burh^wham*, mod. *Burpham*; O.E. *Fealhham* > M.E. *Fel^wham* > mod. *Felpham*; O.E. **Slaganham* > *Slagham* > *Slah^wam* > *Slaugham* (= slæfm). In modern Sussex both *Burpham* and *Felpham* are pronounced locally with (*f*).

2. O.E. medial *ǣ* (back-open-voiced) > *ǣ^w* > *w*. O.E. *Burgæsc* > M.E. *Burǣ^wash* > *Burwash* (= barif), the *-w-* being lost into the unstressed syllable.

3. The interchange of *-l-* and *-r-* is considered by Zachrisson to be due to the influence of Norman-French, but it is surely

fairly common in all languages. Examples in Sussex are O.E. *Æpelantūn* or *Æpelwinetūn* > mod. *Atherington*; in the early forms of *Falmer* and *Keymer* (q.v. below), *Fallemella* and *Kiemella* appear (1107-18). See also remarks under *Walberton* and *Warbleton* in Pt I.

4. Zachrisson also considers the interchange of *t* and *d* to be N.-Fr. In Sussex *Chidham* < O.E. **Cedd-*; under the early forms of the (linguistically) allied *Chiddingley* are three with *-t-*, while O.E. **Ceddanhyrst* is *Chithurst* to-day. *Tottingworth* has a form *Toddyngworth* in 1309.

5. The change of O.E. *-þ-* > *-ð-* > *-d-* is seemingly not entirely determined by the neighbouring sounds, although it is fairly common in the neighbourhood of *-l-* and *-r-*. Cf. O.E. *morþor* > *murder*; O.E. *byrðen* > *burden*; O.E. *Sulþorn* > *Souldern* (Alexander, Oxf. Pl.-Ns.). The Sussex example is *Hadlow* < O.E. **hæþlēāh* (with change of suffix).

6. The unfronting of O.E. *ĕġ*, *ĕc* to *g* and *k* is likewise partly an isolative change, although here again it is common before certain sounds, such as *n*, *l*, *r*. See Wyld, Contributions to the History of the English Gutturals (Trans. Phil. Soc. 1899). Modern Sussex *Bignor* < **Biġganōfre*; *Bognor* < **Bucganōre* (which form exists in C.D.); *Beckley* < **Beċcanleah*; *Egdean* < **Ecgdenū* (*Eċġ* a pers. n. or *eċġ* = edge, ridge).

(e) *Combinative Changes.*

Loss of consonants in combination.

(a) *Loss of interconsonantal -h-*; O.E. **Beorganstede* > M.E. *Berhstede* > *Bersted*; O.E. *burhtūn* > *Burton*; O.E. *Eādburhtūn* > *Edburton*; O.E. **rūhsperre* > M.E. *rūhsper* (1325 *Rousparre*, 1549 *Roughsparre*) > *Rusper*; O.E. **Torhtantūn* > *Tortantūn* > *Tor-tington*.

(b) *Loss of (-w-) in the unstressed element.* Although the *w* is generally retained in the spelling, it is seldom heard in the local pronunciation of the name. Well-known examples are *Norwich* (= noridž), *Southwark* (= saðək), *Woolwich* (= wulidž), etc. In Sussex O.E. *Bōtwulfes* > *Botolphs* or *Buttolphs* where

the *-w-* has even disappeared in the spelling. See also *Berwick* and *Southwick* (saðik) below.

(c) *Simplification of consonant-groups.*

- ldk- > -lk- O.E. **Bealdcumb* > *Balcombe* (b̥k̥æm).
- ldb- > -lb- O.E. **Ealdburna* > *Albourne*. }
- lhb- > -lb- O.E. **Ealhburna* > *Albourne* (?). }
- lfm- > -lm- O.E. **Ælfmōdantūn* > *Almodington*.
- lfs- > -ls- O.E. **Ælfsigestūn* > *Alciston*.
- lgn- > -ln- M.E. **Hālgñaker* > *Halnaker*.
- lnst- > -lst- O.E. **Ælfwinesstede* > M.E. *Elnes(s)tede* > *Elstead* (Type I). }
- lvst- > -lst- O.E. **Ælfsstede* > M.E. *Elves(s)tede* > *Elstead* (Type II). }
- kst- > -st- O.E. **Ælfricestūn* > *Alfriston*.
- rþw- > -rw- O.E. *norþwudu* > M.E. *Northwode* > *Norwood*.
- st(ə)t- > -st- O.E. **prēostatūn* > M.E. *Prest(i)tun* > *Preston*.
- þst- > -st- O.E. **Fripestūn* > *Friston*.

(d) A similar phenomenon is the complete loss of whole syllables for which see γ (3) above.

(e) *Assimilation.* It is not always easy to draw the line between assimilation and loss of consonants in combinations. In all cases the double assimilated consonant is shortened in mod. Engl. Sussex examples are:

- ht- > -tt- O.E. **hēhtūn* > **hēhtūn* > *Hettun* (1320), early forms of *Heighton* (Type I).
O.E. **höhtūn* > *höhtūn* > *Hotton*, early forms of *Houghton*.
late O.E. **Ractūn* > *Rahtūn* > *Rattun* (in early forms of *Racton* q. v.).
O.E. **Ohtanhām* > *ottehām* > *Otham*.
- ln- > -un- D.B. *Helnache*, 1252. *Hannak*, 1274. *Hannake* but also early forms *Halnaker* (< *O.E. *hālkanæcer*) = mod. *Halnaker*.
- lvl- > -ll- O.E. **Wulflāfantūn* > M.E. *Wullavintun* > *Woolavington*.
- nl- > -ll- O.E. **Beornlāfantūn* > M.E. *Berlavintūn* > *Barlavington*.
- um- > -mm- **Lēōnmynstre* > *Lēm(m)instre* > mod. *Lyminster* (q. v.).
- nr- > -rr- O.E. **Cēnrēdeford* > M.E. *Kenredeford* > *Kerrede-* (1379 *Kerredeford*) > mod. *Kirdford*.
- þt- > -tt- O.E. *Sūptūn* > mod. *Sutton*; *norþtūn* > *Norton*.

Cf. also M.E. *Rademeld* > mod. *Rodmell*. The second element is O.E. *-mylde*; is mod. *-mell* due to the analogy of O.E. *mylen*, "a mill," or is it assimilation of *-ld-* > *-ll-*?

(*f*) By the side of the simplification of consonant-groups, by assimilation or otherwise, the groups *-mr-*, *-nr-* and *-lr-* develop into *-mbr-*, *-ndr-* and *-ldr-* respectively. This is not an "insertion" of a consonant, as those ignorant of phonetics suppose. Cf. French *je viendrai* with *venir*, *je viens*, etc., *chambre*, early O. Fr. *chamre*, Lat. *camera*. Examples in Sussex are:

1. *-mr-* > *-mbr-*. O.E. *brēmre* > mod. *Bramber* (cf. the by-form O.E. *brēmel*, mod. "bramble"). O.E. **Eamherelēāh* > M.E. *Amberlei* and *Aumberlei* > mod. *Amberley*; O.E. **Eomār(es)horn* > M.E. *Emberhorne* > mod. *Imberhorne* (raising of *e* to *i*, see Phonology (β) 7 above).

2. *-nr-* > *-ndr-*. O.E. **alratūn*, D.B. *Eldritūne*, 1278 *Al-dryngton* > *Aldrington* (but this name may contain O.E. *Ealdhere*, see Pt I below), O.E. **Beanheretūn* > *Bēn(e)retun* > 1233 *Bendriton* > mod. *Binderton*.

(*g*) *Metathesis*. (1) *r-* metathesis. O.E. **bridham* > M.E. *Bridham* > mod. *Birdham*. Cf. the independent word *bird*; O.E. **Wealdanærn* > M.E. *Waldern* > mod. *Waldron*. (2) *l-* metathesis. Mod. *Milton* < **Mildeton* < **Mideltun* < O.E. **middeltūn*. So Skeat, Berks. Pl.-Ns., pp. 98-99, but for another explanation of the Sussex name, see Pt I below.

(*η*) *Inflexion and Word-formation*.

(*a*) *The suffix of the genitive singular*. See Alexander's article in the *Modern Language Review*, VII. pp. 65 ff.

1. The following names have no genitive suffix in the earliest forms. This seems specially to be the case with names in *-here* and *-wine*. *Amberley* (683? *Amberla*, 957 *Amberle*, D.B. *Ambrelie* < O.E. **Eamherelēāh*); *Binderton* (M.E. *Bendriton* < O.E. **Bēānheretūn*); *Goodwood* (M.E. *Godnewude* < O.E. **Gōdwinewudu*); *Imberhorne* < O.E. **Ēōmārhorn*, *-hyrne*; *Kirdford* (1379 *Kerredeford* < earlier M.E. *Kēnredeford* < O.E. **Cēnrēdeford*); *Walderton* (D.B. *Waldere* 1167 and passim, *Walderton* < O.E. **Wealdheretūn*); *Wod-*, *Woodmancote* (D.B. *Odemancote* < O.E. **Wudumancote*).

2. A strong *-es-* is substituted for a weak *-an-* in *Avisford* < M.E. *Avesford* < O.E. **Afesford* for **Afan-*.

3. A weak *-an-* replaces a strong *-es-* in *Almodington* < O.E. **Ælmōdantūn*; *Barlavington*, *Barlton* < O.E. **Beornlāfantūn*; and *Woolavington* < O.E. **Wulflāfantūn*. See all these names, and also *Lavington*, in Pt I below.

(b) *The particle -ing-*. This has also been investigated by Alexander, in *Essays and Studies by Members of the English Association*, vol. ii. (1911), pp. 158 ff. The medial *-ing-* may be: (1) Seldom the O.E. patronymic suffix, but certainly such in *Beddingham* and *Washington* (q.v. below). (2) Most often the O.E. weak genitive suffix *-an-* > M.E. *-in-*. O.E. **Bebbantūn* > *Bebbin-* > *Bebing-*, mod. *Bebyngton*; O.E. **Dallantūn* > *Dallington*; O.E. **Wernan(ge)læd* > *Warninglid*. Examples are very common in the names under Part I below. (3) The O.E. adjective suffix *-en-*, *-egn-* as in Lancs. *Haslingden* < O.E. **hæslenden* (cit. Wyld) and Sussex *Hollington* < O.E. **holegntūn*. (4) The O.E. pers. n. suffix *-wine* as in *Jevington* < **Gefwinetun*. Or *Jevington* may equally well be derived from a form *Gefan-* where *Gefa* is a shortened form of the above *Gefwine*. For the examples of *-ing-* in Sussex, see the Index of Separate Elements in Pt II below.

(c) *Substitution of one suffix for another*. See Walker's article in E. St. 48, Heft 1. It frequently happens that a mod. pl.-n. has a different suffix from that which it shows in its early forms, owing to confusion between certain similar elements. This was very likely to happen in the unstressed second part of the compound, especially between such pairs as O.E. *-dūn* and *-denu* which appear in M.E. as *-don* and *-den*, probably both pronounced (-dæn). Indeed almost all names in *-dcn* and *-dean* have a *-don* amongst their early forms, and vice versa. Some Sussex examples of this interchange are (1) O.E. *berg* and *burh* (*burg*). Modern *Pulborough* and *Swanborough*, both with *-bergh*, *-berwe* in the early forms, but seldom *-burgh*. Also 1411-2 *Wisebergh*, 1409 *Wysbergh*, modern *Wyseberg* and *Wisborough Green*. (2) O.E. *-camp* and *-k + ham(m)*. Mod. *Barcombe* with earlier types, I. *Berkham(m)* < **beorchamm*,

II. *Bercamp*, a new suffix from an imagined etymology such as **Beorncamp*, III. *Bercombe*. The pronunciation of all three types was in M.E. the same, the official spelling of the modern name is of course that of III. Also *Warningcamp*, which is probably O.E. **Wernancamp* < **Wyrnan*-, but which may also be **Werne-canham* (or *-hām*) > M.E. *Wernecamp* as in the early forms noted below. (3) Mod. *-den* (*-dene*, *-dean*) and *-don*. This is the commonest example in Sussex. I note some here; see also Pts I and II below. 1278 *Egedene*, 1539 *Eggedean*, 1279 *Egedon* = *Egdean*; mod. *Findon*, early forms in *-don* and *Findene* once in 1280; mod. *Marden* has several early spellings like *Meredon*; for *Standean* we have D.B. *Standene* and two other forms in *-dene* but 1253, 1409 *Standon*; D.B. *Playdene*, other forms in *-den* and *-don*, mod. *Playden*, etc.

4. *-don* also sometimes alternates with *-ton*, cf. M.E. *Fontin* and *Funtinton*, 1330 *Fontyngdon* = mod. *Funtington*, also modern *Willingdon* for which we find usually types like *Wylindon*, but also 1248 *Wilenden*, *Wylinden* and 1633-4 *Willington*.

5. O.E. *-feld* and *-fald* is also fairly common; cf. 1287 *Ashfelde* = *Ashfold*.

6. O.E. *lāah*, *lāh*, *lāge* often interchanges with other elements, for instance *-lei*, *-low*; *-lei*, *-hill*; *-lei*, *-lake* (O.E. *lacu*), etc. Cf. D.B. *Baldeslei*, *Badeslei*, 1274 *Baldeslowe*, 1316 *-lawe* = *Baldslow*, 1253 *Hadlegh*, 1409 *Hadleg*, mod. *Hadlow Down*; O.E. **byxalāh* (mod. *Bexhill*) > Type I *Bixele*, *Bexele*, Type II *Buxhull*, *Bexhill*, *Bixhelle*, etc.; O.E. **scēplāh* > M.E. *Schiplee*, *Sheplei* (Type I), cf. Type II *Schiplake*, *Shepelake* = mod. *Shipley*. See also remarks on *Fairlight* in Pt I below.

7. O.E. *-mere*, *gemāru*, **gemāre* (unmutated < W. Gmc. **ga-mair*-), *mōr*. With names in *-mere* and *-more* it is often difficult to tell what the second element really is. At any rate the interchange of *-mere*, *-more* is frequent. Cf. 1294 *Bromere*, 1439 *Brommore* (< **brōm(ge)māru*, *-māre*, or **brōmmere*, *-mōr*), mod. *Broomer's Green*, also *Udimore* with all its early forms in *-mere*.

8. The M.E. spelling *-ston(e)*, in default of evidence from O.E., may be sometimes referred to *stān*, sometimes to *-es + tūn*.

Sussex *Hunston* is definitely O.E. **Hunesstān*, as the early forms prove, but *Bishopstone* may be either O.E. **biscopestān* or **biscopestūn*. See both names below.

9. A suffix has completely disappeared in the modern *Monks*, which is 1316 *Moneksy*, 1317 *Monekeseye*, and in *Rye* which is *Rieberge* in D.B.

(θ) Foreign Influence.

1. *Norse influence* is hardly possible in Sussex, but there are two or three older forms which would seem to point to it. The pers. n. *Hæsten* seen in mod. *Hastings* was certainly the name of a Danish chief, but it may also have been an Engl. name, since *Hæsten*, *Hasten* appears in an O.E. pl.-n. from C.D. (see *Hastings* below). Again there never appears in Sussex a modern -yett, -it, or -itt < O.E. *ġeat*, but only the form *gate*, which may either be from the O.E. plural type *gatu*, *gatum*, or from the O.N. *gata*, which however meant "thoroughfare," "path," a meaning not known in the case of the O.E. word. Since these -gate forms first appear in M.E. times, it is just possible that they are derived from the Scand. word, or that their meaning has been influenced by it. There is, however, no definite indication of Scandinavian influence in Sussex names, but see remarks under *Tangmere* below.

2. *Norman-French influence*. The standard authority is of course Zachrisson (*Anglo-Norman Influence on English Place-names*, Lund 1907). Sussex names do not show as many effects of such influence as might be expected from the geographical position of the county. The following characteristics are certainly Anglo-French:—(1) Alternation of -ling and -ning in the early forms of *Ditchling*, q.v. (Z., p. 140, considers this an actual sound-change, not a mere variation in spelling). (2) Substitution of (s) for English (tf) as in *Cissbury Hill* (< O.E. **Cissanbyrig*, cf. *Chichester* and its early forms below) initially, medially in *Lancing* < O.E. **Wlancing* < *Wlenicing*, and *Ticehurst* < O.E. *ticcenhyrst*. (3) Substitution of (s) for Engl. (f) medially, as in *Maresfield* and *Merston* (< O.E. **mersfeld*, **mersetūn*). The English type survives in *Marsham* (māʃəm) < O.E. **merschām*.

See all these names below. (4) Certain names are purely French, e.g. *Beachy Head* (< *bel-chef*, the spelling being affected by the M.E. *beach*), *Beauport*, *Bewbush* (< *beau-buisson*), *Broyle*. The common combination of an Engl. pl.-n. with a French family name is seen in *Herst-* or *Hurstmonceaux* and *Horsted Keynes* (q.v. below). (5) Certain French words appear as elements in Sussex pl.-ns., as *-boys*, "wood," *-ett(e)* (diminutive suffix), *bel-*, *-beu*, and *beau*. Also *port*, if of Romance origin, but this was already a loan-word in O.E.

PART I

Adsdean.

1314 Addesdene, Cal. Inq. ad quod D. p. 240.

O.E. *denu*, a dene, valley. The first element is probably a pers. n. Cf. *Adda* in Bede iii. 21, p. 170, and also *Æddi* (ibid. iv. 2, p. 205). The latter is more likely, since *Adda* would normally have a weak genitive.

Albourne.

1294 Aleburn, Cal. Inq. P.M. vol. i. p. 127.

1316 Aleburna, F.A. v. p. 135.

circa 1320 Aleburn, T. de N. p. 222.

1400 Albourne, Cal. Inq. P.M. vol. iii. p. 273.

1456 Albourne, ibid. iv. p. 273.

The *Al-*, *Ale-* in the above forms probably represent an O.E. pers. n. *Ealh-*. Cf. *Ealhmund*, *Ealhnōþ*, etc. in Searle. For O.E. *burna*, "stream," see Pt II. Possibly also the first element might be O.E. *eald*, "old," or *Eald* as a pers. n., but in this case one would expect some early spellings in *Aldb-*. For O.E. *Ealhmund* see also Moorman, W. Rid. Pl.-Ns., under *Almond-bury*.

Alciston.

1085 Alchitone? D.B. i. 19 b. }

Alsistone, D.B. i. 17 b. }

Alsitone, D.B. i. 19 a. }

temp. Edw. I Alsistun, Cust. B. Abbey, p. 33.

circa 1320 Alsiestun, T. de N. p. 227.

1340 Alsiston, Cal. Inq. P.M. vol. ii. p. 97.

"Ælsige's tūn," O.E. *Ælfsigestūn*. The name *Ælsige* is well authenticated; see Searle. Cf. Duignan's remarks, Worcs.

Pl.-Ns., on the *Alston* in that county. The T. de N. forms *Alsiestun* is the M.E. precursor of the modern pronunciation (ælsistən).

Aldingbourne.

- 683! Aldingburne, C.D. v. p. 33.
 880-5 Ealdingburnan, C.D. ii. p. 115.
 1085 Aldingeborne, D.B. i. 16 b.
 1226, 1230 Aldingburne, Cal. Rot. Ch. pp. 34, 47.
 1274 Aldingburn, H.R. ii. p. 212.
 1278 Aldingburne, Plac. de quo War. p. 758.
 1334 Aldyngbourne, Cal. Inq. P.M. vol. ii. p. 63.

Probably O.E. *Ealdinga burna*, "the brook, stream of the Ealdings." The *Ealdings* themselves are not directly mentioned by Searle, but there are columns of names in *Eald*, such as *Ealdbeorht*, *Ealdhelm*, etc. *Ealda* is the name of a witness to a Charter, Cart. Sax. No. 197. See O.E. *burna* in Pt II.

Aldrington.

- 1085 Eldretun, D.B. i. 26 b. }
 Eldritune H., D.B. i. 28 b. }
 1121 Aldrinctona, Anc. Ch. Pipe Rolls, vol. x. No. 8, p. 12.
 1278 Adryngton, Plac. de quo War. p. 750.
 1298 Alrington, Cal. Inq. P.M. vol. i. p. 149.
 1386 Aldrington, *ibid.* iii. p. 83.
 1450 Aldryngton, *ibid.* iv. p. 247.

Probably "the *tūn* of the alder-trees," O.E. *alratūn* > M.E. *aldrītun*. The *-ing-* in the above forms and in the modern name is probably due to the analogy of some name containing medial *-ing-* such as *Aldingbourne*. For the second element see O.E. *tūn* in Pt II.

Cf. *Allerton* in Wyld, Lancs. Pl.-Ns., and *Alderton*, Wilts., for which the Ind. Ch. and Rolls gives early forms: 1535 *Aldrin-*, *Aldryntone*; 1536 *Aldryngton*, and 1675 *Aldrington*.

Or possibly the above name contains the O.E. pers. n. *Ealdhere* (or the gen. plur. of the patronymic *Ealdheringa-*).

Aldsworth.

1397 Aldesworth, Cal. Inq. P.M. vol. iii. p. 227.

1477 Allysworth, Ind. Ch. and Rolls, p. 9.

O.E. *Ealdesweorþ*, "the 'worth' or farm of Eald." *Eald* is probably shortened from such pers. ns. as *Ealdhelm*, *Ealdwine*, etc. *-weorþ* = "farm"; see Pt II.

Aldwick.

1291 Aldewyk, Cal. Inq. P.M. vol. i. p. 108.

Simply O.E. *eald wīc*, "the old house." O.E. *wīc* always appears in Sussex as *-wick* or *-wyke* (wik) or (waik). On this point see remarks on the element in Pt II.

Aldworth.

1296 Aldingworth, Cal. Inq. P.M. vol. i. p. 135.

The form *Aldingworth* above seems to point to an O.E. **Ealdanweorþ*, *Ealda* being a pers. n., discussed under *Aldingbourne*. But the modern form presupposes O.E. **ealdworth* > M.E. *āldworth* either (1) "the old farmstead," or (2) "the farmstead of Eald(a)," the genitive suffix *-an-* of *Ealdan-* being lost in late O.E. Either is equally probable.

Alfriston.*Type I.*

1085 Alvricestone, D.B. i. 21 b.

1136 Alfrichetunam, Fr. Ch. No. 1391, p. 512.

temp. Edw. I Alurichtun, Cust. B. Abbey, p. 33.

1428 Alfryston, F.A. v. p. 148.

1588 Alfriston, Ind. Ch. and Rolls, p. 10.

Type II.

1314 Alfretheton, Cal. Rot. Ch. p. 147.

O.E. *Ælfrices tūn*. *ċ* (= M.E. *tj*) is lost before *-st*. See Phonology above. Type II shows confusion of the first element with another O.E. pers. n., possibly *Ælfrēd*.

Almodington.

13th cent. Almodentone, Exch. Red Bk. vol. i. p. 200.

1386 Almodityton, Cal. Inq. P.M. vol. iii. p. 84.

1421 Almoditon, *ibid.* iv. p. 64.

1501 Almodityton, Ind. Ch. and Rolls, p. 11.

"The *tūn* of Ælfmōd." Grueber (Cat. of English coins in the British Museum) gives *Ælfmōd* or *Elemōd* as an O.E. pers. n. (see Searle, *Onomast.* p. 14).

The name must have had a weak genitive *Ælfmōdan* instead of the strong **Ælfmōdes*, hence O.E. *Ælfmōdantūn* > *Almodington*.

Amberley.*Type I.*

683! Amberla (Latin), C.D. v. p. 33.

Amberley }

Type II.

1274 Aumberley, H.R. ii. p. 215.

1278 Aumberly, Plac. de quo War. p. 759.

Searle records a pers. n. **Eamhere*, for which he gives two examples—*Eamer* from a coin of Æthelred II, and *Eammer* (c. 1045), the name of a landowner from C.D. No. 912.

O.E. **Eamhere* *lēāh* > late O.E. **āmerelāh* > M.E. *ambrelei*. The genitive suffix was often omitted with pers. ns. in *-here*; see Wyld, *Lancs. Pl.-Ns.*, Phonology. If this etymology be true, the C.D. forms must have been copied from some M.E. document, since we could hardly have an intrusive *-b-* so early. Type II shows the common M.E. (Norman-Fr.) diphthongising of *a-* to *au-* before nasals. Cf. Chaucerian forms like *launce*, *commaunde*, etc. See O.E. *lēāh* in Pt II.

Ancton, Ankton.

1085 Antone? D.B. i. 25 b.

1274 Aniggedon? H.R. ii. p. 202.

Angmering, East and West.

- 880-5 Angemæringtūn, C.D. ii. p. 115.
 1085 Angemare, D.B. i. 24 b.
 1274 Angemeryng', H.R. ii. p. 214.
 1288 Westangemare, Abbr. Plac. p. 218.
 1291 Angemerynge, Cal. Inq. P.M. vol. i. p. 109.
 circa 1320 Angemere, T. de N. p. 222.
 1383-4 Estangmering, Cal. Rot. Ch. p. 190.
 1545 Westangmeryng, Mallings Surv., Ssx. Arch. Soc. xxi.
 p. 165.

The C.D. form above explains this name as the *tūn* of the *Angemæringas*. No other authority exists for the O.E. *Angemæ̃r*; Searle quotes it as "local," from the evidence of this Sussex pl.-n. The ending *-tūn* has been lost in the modern name, and already before 1085.

It is possible also that the name was really O.E. *Angemæ̃ring-tūn*, i.e. "the *tūn* by the meadow (O.E. *ing*) of Angemæ̃r." In this case the *tūn* may have been dropped as a third and superfluous element. But the O.E. *tūn* generally occurred in conjunction with a personal name, and this seems rather to favour the first explanation. See O.E. *ing*, *incg* and *tūn* in Pt II.

For similar instances of pl.-ns. compounded with three elements cf. *Ashburnham* below, *Berkhampstead* (Hants.), *Ashampstead* (Berks.), *Ashleyhay* and *Alderwasley* (Derby).

Appledram or Apuldram.

 1409 Ardingleg, Cal. Rot. Ch. p. 213.
 1441 Erthynglegh, Ind. Ch. and Rolls, p. 18.

Type II.?

- 1213 Erdinton, Abbr. Plac. p. 89.
 circa 1320 Erdinton } T. de N. pp. 222-23.
 Erdenton }

The medial *-e-* in the 1278 and 1409 spellings in Type I above suggests an O.E. patronymic, in the gen. plur.—such a name as *Eardinga*—"of the sons of Earda." *Earda* would be a shortened form of one of the many names beginning with *Eard-*, of which perhaps *Eardwine* is the most common. Skeat explains the Herts. *Ardcley* as **Eardanleah*. See O.E. *leah* in Pt II.

If Type II represents the same name, it shows an exchange of O.E. *-tūn* for O.E. *leah*.

Arlington.

- 1085 Herlintone, D.B. i. 19 a.
 1302-3 Erlynton, F.A. v. p. 132.
 1306 Erlington, Cal. Inq. P.M. vol. i. p. 225.

 1318 Erlington, Cal. Rot. Ch. p. 153.
 1331 Erlinton, Cal. Inq. P.M. vol. ii. p. 45.

O.E. *Eorlan tūn*, "the *tūn* of *Eorla*." *Eorla* is a short form of some pers. n. beginning with *Eorl-* such as *Eorlbeald*, *Eorlwine*, etc., for which Searle gives good authority. The initial *H-* in the D.B. form is a Norman-French scribal peculiarity, and means nothing. See *Hailsham* below.

1421 Arundel, Cal. Inq. ad quod D. p. 377.

Simply "the dell on the Arun," a river in Sussex. This is the only example of the element *dell* in Sussex. It represents an O.E. **dell* from **dalja* (cf. O.E. *dæl*, "a dale"). But for the -*ll* in the above forms the second element might represent an unstressed form of O.E. *dæl*. There are no -*dales* in modern Sussex.

See O.E. *dell* in Pt II.

Ashburnham (eʃbrəm).

- 11th century? Ashbornhamo (Latin ablative), C.D. iv. p. 268.

 1341 Ashbournham, Cal. Inq. P.M. vol. ii. p. 100.
 1633-4 Ashbornham, Vist. Ssx. p. 68.

O.E. *æscburnahām*, "the homestead by Ash's stream." Or possibly *æsc* may be here the name of the tree. The modern pronunciation (eʃbrəm), given by Hope, is just what one should expect the O.E. *æscburn(a)hām* to become in Sussex.

See O.E. *æsc*, *burna*, and *hām* in Pt II.

Ashdown Forest.

- 1234 Essendon, Cl. Rolls, Hen. III (1231-4), pp. 461, 485.
 1275 Ashedon forest, Cal. Inq. P.M. vol. i. p. 58.

 1407 Ashdonne, Cal. Inq. P.M. vol. iii. p. 320.
 1545 Ashdown, Ch. Du. Lancs. No. 45, p. 354.

Æsca is probably a pers. n. The second element is O.E. *dūn*, "a down, hill" (q.v. Pt II). Skeat (Berks. Pl.-Ns.) takes *Æsc* to be a pers. n. in the *Ashdown* in that county. The name occurs in the A.S. Chron. annis 648, 661, 871. Cf. *Ashington* below.

Ashfold.

- 1287 Ashfelde, Abbr. Plac. p. 215.

Æsc may be here the name of the tree, but the absence of the genitive suffix does not necessarily exclude the pers. n. O.E. *-fald* and *-feld* are frequently confused as second elements. Cf. *Cowfold* below.

Ashington.

- 1073 Essingetona, Fr. Ch. No. 1130, p. 405.

 1473-4 Asheynghon, Cowfold Accs., Ssx. Arch. Soc. ii. p. 317.
 1633-4 Ashengton, Vist. Ssx. p. 71.

O.E. *Æscantūn*, "*Æsca*'s *tūn*." *Æsca* is well authenticated in O.E. It occurs for instance in C.D. Nos. 287, 295 and Cart. Sax. Nos. 506, 518.

Ashling, East and West.

- 1451 Estasshelyng }
 Westasshelyng } Cal. Inq. P.M. vol. iv. p. 253.

The above forms differ very little from the modern. Probably *Ashling* is O.E. **Æscelingas*, "descendants of *Æscele*." **Æscele* is a diminutive of the common pers. n. *Æsc*, formed from it by the addition of the suffix *-el(e)*, *-ol*. For other O.E. diminutives in Sussex pl.-ns. see *Brightling* and *Duncton* below.

O.E. *æschyrst*, "the ash wood." *æsc* is here probably the name of the tree. See O.E. *hyrst* in Pt II.

1349 Atheryngton, Cal. Inq. P.M. vol. ii. p. 162.

1695 Ederington, Camden's Britt. p. 173.

The first element is possibly an O.E. *Æpela*, shortened from one of the numerous names in *Æpel-*, for which see Searle. Hence O.E. *Æpelantun* > M.E. *Athelington*, wherein the substitution of *-r-* for *-l-* may be a sign of Norman-French influence (Zachrisson, p. 142).

Or perhaps the first element may be the common O.E. pers. n. *Æpelwine*, with loss of *-w-* in M.E. and change of *-ine* to *-ing*. See remarks on *-ing* in Pt II.

1361 Avesford, Cal. Inq. P.M. vol. ii. p. 243.

1418 Anesforth? *ibid.* iv. p. 38.

The first element is a pers. n. There is an *Afa* mentioned in Kemble C.D. No. 1313 (circa 1017), and another of the same name was a witness to a charter in Birch, Cart. Sax. No. 1248 (circa 970). The second element is O.E. *ford*, "a ford." Normally the genitive of *Afa* would be *Afan*, but the strong type *Afes* has persisted, and given rise to the modern *Avisford*. If we may take the 1418 form above seriously, the second element shows substitution of the O. Norse *fjorðr* for O.E. *ford*.

See O.E. *ford* in Pt II.

A -v- (< O.E. -f-) between vowels does not normally disappear in Sussex. Cf. the names *Barlavington*, *Woolavington*, *Lavington*, *Bevendean*, *Ovingdean*, and see Wright's E. D. Gr. p. 227.

"The *tūn* of Babba (or Bæbba?)," O.E. *Babbantūn*. Searle gives *Babba* as a "mon," and as the first element of a pl.-n. in *Babbanbeorh* from C.D. Nos. 389, 623. Neither Searle nor Birch (Cart. Sax. vol. iv. Index of Pers. Ns.) cites the form **Bæbba*, but it may have existed side by side with the commoner *Babba*; and, compounded with O.E. *tūn*, would have given rise to Types II and III (O.E. *Bebbantūn* and *Bebbatūn*, with the Kt. or Southern *e* for Pr. O.E. *æ*).

The first element of Types II and III might further be derived from an O.E. *Bebba*, mentioned by Bede as the name of the queen of Bernicia in 593-617 (Eccl. Hist. Bk. iii. § 6, p. 138, in Plummer's Ed.).

In any case Type I represents O.E. *Babbantūn* > *Babbintun* > *Babington* (= *bæbintən* or *bæbiŋtən*). The modern *Babintone* is a survival of the D.B. spelling. Type II is late O.E. *Bebbantūn*, and Type III is from a form without a genitive suffix, *Bebbatūn* (or **Bæbbatūn*), the development of the name being *Bebbatūn* > *Bebiton* or *Bebeton* > *Bebton* > *Bepton*, the second -b- being naturally unvoiced before the following -t-.

Type II.

Type III.

1633-4 Bawcomb, Vist. Ssx. p. 88.

The second element is O.E. *comb*, *cumb*, "a hollow," "valley"; cf. Pt II.

The first element may be O.E. *bæ̃l*, "a flame, fire of funeral pyre," but a funeral pyre was more likely to be burnt on a hill-top than in a valley.

The F.A. form in Type I suggests confusion with a pers. n. beginning with *Bald-* (O.E. *beald-*, as in *Bealdhere*, *Bealdwine*, etc.).

Type III shows M.E. diphthongising of *a* to *au* before *-l* with subsequent loss of the *-l*. I cannot explain the diphthong *-ai-* in Type II.

Baldslow.*Type I.*

Type II.

1274 Baldeslowe, H.R. ii. pp. 216, 218.

1316 Baldeslawe, F.A. v. p. 133.

Originally O.E. *Bealdes* or *Baldes lēah*, "the pasture-land of Bald." *Bald* is a shortened form of some name beginning with this component, like *Bealdhere*, *Bealdwine*, etc.

Searle gives more than three columns of names in *Bald-*, *Beald-*. [He also quotes *Bald* as a "nomen viri" from Förstemann, i. 202, but he quotes from the edition of 1856-72. The

second edition (1900) has *Bald*, and *Baldo*, i. 235, and place-names *Baldisheim*, *Baldingen*, *Paldinperc*, *Baldenstat* (under *Bald* and *Baldo*).]

Type II shows a change of suffix from O.E. *lĕāh* to O.E. *hlĕw* (= tumulus, burial-ground). The latter suffix becomes a modern *-law* or *-low* (l̄ or lou), according to its derivation from O.E. *hlāw* and O.E. *hlā* respectively. Both these forms are illustrated in Type II above. Cf. the name *Cudlawe* or *Cudlow* below: see also *Lowfield Heath*. For the interchange of *-low* and *-ley* see also Wyld's remarks and the forms cited under *Osmotherley* in Lancs. Pl.-Ns.

The D.B. form, No. 2 above, may be a mere spelling variation for *Baldeslei* or it may indicate a real loss of *-l*. See Zachrisson, p. 148, under *B*.

Type III.

- 1289 Bercombe, Cal. Inq. P.M. vol. i. p. 102.

The original form was probably O.E. *beorc hām* or *beorc-hamm*, as suggested by Type I above. O.E. *beorc* is another form of *birce*, "a birch tree," and corresponds etymologically to the modern "bark" (O.E. *bcorc* < Gmc. **berka*; O.E. *birce* < Gmc. **berki*). The *-hamm* and *-hom* spellings in 1361 and 1446 (Type I) above suggest that the second element was originally O.E. *hamm*, which meant (1) "a dwelling," "enclosed land," i.e. "something *hemmed* in," or (2) "the ham," "hind part of the knee," and in pl.-ns. "bend of a river." This element was indistinguishable in M.E. from O.E. *hām*, which being unstressed had become M.E. *-hām*. (See *hamm* (1) and (2) in Pt II.)

At any rate Type I is the earliest, and represents O.E. *beorc-hām* or *beorc-hamm*.

Type II shows a different second element, O.E. *camp*, "camping-ground," which Skeat (Hunts. Pl.-Ns.) says is not English, but a loan-word direct from Latin. The forms in Type II are generally written *Bercamp* or *Berecamp*, and possibly were felt to contain the O.E. *bere*, "barley" (?). This *Bercamp* again was identical in pronunciation with *Berkham* in Type I.

Type III shows yet another second element, O.E. *cumb*, "a valley," and this type is the precursor, as far as spelling is concerned, of the modern name. All three types have regularly developed into the modern (*bākm*).

"The *tūn* of Beornlāf," O.E. **Beornlāfantūn*, with weak genitive. Searle quotes one instance of *Beornlāf* from Cart. Sax. No. 543, C.D. No. 1062; also a *Bēōrlāf* from C.D. No. 981.

The modern *Barlavington* is normally descended from this O.E. form.

Barlton seems to be derived from an O.E. **Beornlāftūn* > M.E. **Berlvtūn*, and by simplification of the group -*rlvt*- **Berlton* and finally *Barlton*.

I cannot account phonetically for the form *Belton*. See *Lavington* and *Woolavington* below.

1322 Bernham, *ibid.* iv. p. 432.

1411-2 Bernham, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 136.

The earliest form from C.D. (if Kemble's identification is correct) seems to point to an O.E. *burn(a) hām*, "the homestead by the brook." All the later forms, however, have *Bern-*, and the modern (*bānəm*) could not possibly develop out of O.E. *burnhām*.

The first element *bern-* may be the O.E. *bern*, *bere-ærn* (a "barn," properly "barley-house"), but more probably it represents a pers. n. O.E. *Beorna-*, a short form of one of the numerous names beginning with this element, like *Beornheard*, *Beornwulf*, etc.

Skeat takes the first element of *Cambs. Barnwell* to be the pers. n. *Beorna*.

 1406 Abbas de Bello, Ch. Du. Lancs. No. 19, p. 149.
 1633-4 of Battell in Sussex, Vist. Ssx. p. 30.

Battle Abbey was founded by William the Conqueror to commemorate his victory at Hastings, and the explanation of the name is sufficiently obvious.

The various forms in *de Bello* above are of course from the Latin *bellum*, a "battle," "war," although the earliest form and the modern name contain the Norman-French *bataille*, "a battle."

Beachy Head.

1278 Beuchef, Plac. de quo War. p. 760.

Norman-French *bel ch(i)ef*, "fair promontory." N.-Fr. *Bel-* in Engl. pl.-ns. has two developments:

1. It appears as *Bel-* and is pronounced as (bel-) or (bi-), the latter being possibly due to loss of *-l-* and vowel lengthening. Cf. *Belmont* (= belmónt or bēlmənt) and *Belvoir* (= bīvə). Luick, *Anglia* xvi. pp. 499 ff., explains it as due to the loss of the *u* in the M.E. diphth. *-eu-*.

2. It is diphthongised by an early (N.-Fr.) process, and appears in modern names as *Beau-*, *Beu-* (= bjū-), as in *Beaulieu* (bjūli). The name *Beauchamps* (bītʃəm) has the spelling of the second type and the pronunciation of the first.

Despite the 1278 form above, the modern (bītʃi hed) seems to be from a type *bel chef* (with loss of *l*?). The spelling seems to indicate confusion with the common "beach," helped by popular etymology. For the loss of final *f* cf. hasty, M.E. *hastif*.

O.E. *Beccanlēah*, "Becca's meadow." The pers. n. *Becca* is also recorded in another O.E. pl.-n. *Beccanford* (Kemble, C.D. No. 184; Birch, Cart. Sax. No. 309).

The difficulty is that O.E. *Beccanlēah* should give a modern (betfli). But the modern form may be explained by assuming the loss of the genitive suffix in late O.E. The name would then be O.E. **Becc(a)lēah*, and the *-cc-* would normally be simplified to *-c-*, and unfronted before the following *-l-*. For another example of this sound-law cf. modern dialectal *mickle* and *muckle* (from O.E. *miclum*, *myclum* type) with M.E. *micel*, *muchel* (from O.E. *micel*, *mycel* type).

Note the 1167 *Bikelea* above. This may contain the O.E. variant pers. n. *Bicca* (see Searle). The 1408 form *Betteley* is interesting. The change of *-kl-* to *-tl-* is common in children's speech, and occurs sporadically in Standard Engl. For instance, Shakspeare rhymes "brittle" (O.E. **bricol*, cf. *breccan*) with "fickle." (Passionate Pilgrim, Stanza 7.) Cf. also *Bricklehampton* < **Briht-helmestūn* in Duignan, Worc. Pl.-Ns., and compare it with *Brighton* below.

Probably O.E. *Beadingham* (as suggested by the 880-5 C.D. form, No. 2 above), the *ham*, "enclosure," of the *Beatings* or descendants of *Bead*. *Bead* occurs in another O.E. pl.-n. *Beadanheal* in C.D. No. 461 and Cart. Sax. No. 936. It is probably a shortened form of some name in *Beadu-*, such as *Beaduheard*, *Beaduhelm*, etc., which were common in O.E. See *ham* in Pt II, and note that after 1085 only *-ham* is written as the second element. For *ǣ* instead of *i* see Phonology above.

Type II.

1280 Bodinges, Cal. Rot. Ch. p. 109.

Simply O.E. *Beadingas*, "the descendants of *Bead*" (cf. preceding name). There are many place-names which seem to consist simply of an O.E. patronymic without any determinative second element.

Sometimes they end in *-ings* (i.e. *Hastings*), sometimes in *-ing* (i.e. *Goring*). Cf. also *Lancing* below, which represents an O.E. *Wlencing*.

Type II I cannot explain. If the O.E. form were *Bēadingas* it might be accounted for by shifting of stress (**Bēadingas* > **Beādingas* > *Bōdinges*), but it seems that the quantity of the *-ea-* in O.E. *Beadingas* was short. It may, of course, be a mere scribal error.

Kemble's identification of the C.D. form *Berkamystede* (No. 2 above) with the Sussex *Bersted* seems incorrect; possibly it represents *Berkhampstead* (Herts.).

I take the first element of the Sussex *Bersted* to be an O.E. *Beorga* (pers. n. = "the protector"). Searle records only one example of this name from the C.D. form, No. 1 above. He also cites continental *Beorga* and *Berga* from Piper (which Piper?) and Förstemann.

The development is O.E. **Beorganstede* > late O.E. **Bergstede* > **Berhstede* > M.E. *Bersted* by interconsonantal loss of *-h-* (q.v. under Phonology above).

1474 Beningden (= Bev-?), Cal. Inq. P.M. vol. iv. p. 329.

The first element is a pers. n., O.E. **Beofa*. There are three instances of *Beoba* in Cart. Sax. Chs. No. 108, 145, 211. The last two charters refer to Sussex. It is possible that this *Beoba* represents an earlier **Beofa*, the -b- being a survival of the older attempts to spell intervocalic -f- (=v).

If this etymology be correct O.E. **Beofandene* > M.E. **Bēven-den(e)* > *Bēvingden* by shortening of the first stressed long vowel in a trisyllable. (See Phonology ante, and cf. *Beddingham* above.)

Duignan, Warw. Pl.-Ns., derives *Bevington* from O.E. **Beffantūn*, but does not explain the voiced -v- for -ff-.

Type III.

2. 1306 Bexle, Cal. Rot. Ch. p. 138. }
3. Bexle, Cust. B. Abbey, p. 23. }

From the evidence of the three types above it would seem that the first element is O.E. **byxa*, a mutated form of O.E. *box*, "a box tree" (q.v. Pt II, and under *Boxgrove* below). The modern form is descended from the Kentish Type III above.

The second element may have been originally O.E. *lēāh*, for which O.E. *hyll* was later substituted (there are no *-hull*'s before 1325, Type II (No. 3) above).

Zachrisson (A.-N. Influence, p. 147) suggests O.E. *Becca* (cf. *Beckley* above) as the first element, but this etymology will not explain Types I and II.

Bignor.

Type I.

- 1085 Bigenevre, D.B. i. 25 a.
- 1261 Biggeneure, Cal. Rot. Ch. p. 91.
- 1283 Bigenevere, Cal. Inq. P.M. vol. i. p. 84.
- 1316 Bygenever, F.A. v. p. 142.
- 1340 Biggeneywre, Cal. Rot. Ch. p. 176.
- 1397 Bygenevere, Cal. Inq. P.M. vol. iii. p. 227.
- 1411-2 Bygenevere, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
p. 131.
- 1423 Begenever, Cal. Inq. P.M. vol. iv. p. 81.

Type II.

- 1165-6 Begenoura, Pipe Rolls, vol. ix. p. 92.
- 1278 Bigenou, Plac. de quo War. p. 755.
- 1283 Bignore, Cal. Inq. P.M. vol. i. p. 83.
- 1314 Bignonore, *ibid.* p. 262.
- 1397 Bygenoremille, Bignore, *ibid.* iii. pp. 226, 227.
- 1633-4 Bignore, Vist. Ssx. p. 52.

The first element would seem to be a pers. n. **Bīga*, but I can find no evidence of such a name. Searle, *Onom.* p. 106, gives *Bīga* as a "nomen viri" from Ellis' *Introd. to D.B.*, *Bigo* and *Bigweald* from Förstemann.

I can make nothing of the second element in Type I, unless it represents **ēfer*, a mutated form of *ōfer*, "bank." Jellinghaus (*Engl. und Nddtsche Ortsn.*, Anglia xx. p. 309) gives ? *myceldefer* C.D. iii. 203, *Candeverē*, *Cendefer* v. 86 (*Candover*, Hants.), *Endefer* iii. 203 (? *Andover*, Hants.). These names seem to contain this **ēfer*.

The second element of Type II is O.E. *ōfer* (q.v. Pt II).

Billingshurst.

Type I.

1202 Bellingesherst, *Abbr. Plac.* p. 37.

1290, 1312 Billinghurst, *Cal. Inq. P.M.* vol. i. pp. 105, 252.

1304 Byllingeshurst, *ibid.* p. 204.

1521 Byllyngeshurst, *Ind. Ch. and Rolls*, p. 73.

Type II.

1278 Boleynsherst, *Plac. de quo War.* p. 750.

"The 'hurst,' 'wood' of *Billing*," O.E. *Billingshyrst*, not of the *Billings*, which would be O.E. *Billingahyrst*, and modern (*bilin*æst). Names in *Bill-* were common in O.E. and *Billinga* occurs in an O.E. pl.-n. *Billingabyrig*, *Cart. Sax.* No. 144. Cf. *Billingley* in Moorman, *W. Rid. Pl.-Ns.*

Type II seems to contain a Normanised form of *Billinges* for its first element. Or possibly the *Bol-* = *Bul-* and is due to lip modification. See Phonology above and cf. *busschoppedē* (pret.) in Langland, *Text C. Passus xviii.* l. 268. See also Dibelius, *Engl. Schriftspr.*, Anglia xxiii. p. 332.

Bilsham.

Type I.

1085 Bilesham, *D.B.* i. 25 a.

Type II.

1302 Bulsham, *Cal. Inq. P.M.* vol. i. p. 182.

1307 Bulesham, *ibid.* p. 228.

1345 Bulsham, *ibid.* ii. p. 124.

1414 Bulsham, *Cal. Inq. ad quod D.* p. 368.

Type III.

1266 Belesham, Cal. Inq. P.M. vol. i. p. 30.

1411-2 Belsham, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 136.

"The *hām* or 'homestead' of Bill." Cf. preceding name. The *i*, *e* and *u* forms above point to O.E. **Bylla* < **Bul-ja*, which is not recorded but which may have existed, since we have *Bola* < **Bul-a*. See *Bolebrook* below.

Binderton.

1233 Bendriton, Cl. Rolls of Hen. III (1231-4), p. 239.

1428 Bynderton, F.A. v. p. 157.

"The *tūn* of Bēānhere?" The pers. n. **Bēānhere* is not recorded by Searle, but *Bēān-* did exist as a first element, and *-here* was very common as a second.

The development is O.E. **Bēānheretūn* > **Bēneretun* > *Bēn(d)-ertun* > *Binderton* (bindætŋ) by raising of *e* to *i* before *n* + cons. On this change see Phonology above, *Binsted* and *Grinstead* below.

Bineham.*Type I.*

1244 Bynelham, Cal. Rot. Ch. p. 60.

1339 Bynilham, Cal. Inq. P.M. vol. ii. p. 92.

Type II.

1273 Buneldham, Cal. Inq. P.M. vol. i. p. 51.

1341 Bunelham, *ibid.* ii. p. 100.

The first element is a pers. n. Searle gives instances of *Buna*, *Byni*, also *Buno* from Förstemann. A diminutive **Bynele* < **Bunila* may be the first element of this name.

If this etymology be correct the early forms above are from a diminutive form **Bynele*, but the modern name contains the O.E. *Byni*. If so (*bainəm*) must be either due to Norman-French influence, which tended to lengthen *ī* to *ī* (see *Ticehurst* below), or it may be a spelling-pronunciation.

The second element is O.E. *hām*, q.v. Pt II.

Binsted.

- 1085 Benestede, D.B. i. 17 b, 25 a, b.
 1278 Bynstede, Plac. de quo War. p. 752.
 1316 Benstede, F.A. v. p. 143.
 1342 Byenstede, Cal. Inq. P.M. vol. ii. p. 107.
 1411-2 Benstede, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
 p. 136.
 1414 Benstede, Cal. Inq. ad quod D. p. 368.
 1618 Binsted, Cal. Inq. P.M. vol. iv. p. 482.

The first element is O.E. *bēān*, "bean," "vetch," "faba," "bean-tree." O.E. **Bēānstede* > late O.E. **Bāenstede* > M.E. *Bēnstede*, then by raising of *e* to *i* before *n* + cons. > *Binstede* and the modern (binstød). Cf. *Binderton* above.

The first element of the Berks. *Binfield* is O.E. *beonet*, "bent grass." Skeat, Berks. Pl.-Ns., gives the early forms *Benetfeld* and *Bentfeld* from Inq. P.M. (no reference or date). See O.E. *bēān* and *stede* in Pt II.

Possibly also the first element of the Sussex *Binsted* may be an O.E. pers. n. in *Bēān*-, of which Searle cites *Bēānstān* from Beowulf, l. 524, and *Beanhard* without reference.

Birdham.

- 683? Bridham, C.D. v. p. 33.
 957 Bridham, C.D. ii. p. 341.

 1501 Byrdeham }
 1579 Bordham } Ind. Ch. and Rolls, p. 76.

O.E. *bridhām*, "the homestead where young birds were plentiful." Or *Brid*- may have been a pers. n., but Searle gives no reliable authority for its use as such. The modern form

shows metathesis of *-ri-* to *-ir-*, as in the separate word "bird." On the 1579 *Bordham* see Phonology above (*bi-* > *bu-*).

Birling Gap.

Type I.

- 1253 Berlinge, Cal. Rot. Ch. p. 82.
- 1266 Berling, *ibid.* p. 95.
- 1294 Berlyng, Cal. Inq. P.M. vol. i. p. 123.

- 1316 Berlinge, Cal. Inq. ad quod D. p. 252.
- 1411-2 Berlyng, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
p. 134.

Type II.

- 1357 Byrlyngg, Cal. Inq. P.M. vol. ii. p. 203.
- 1428-39 Byrlinge, Cal. Inq. ad quod D. p. 380.
- 1436 Byrlinge, Cal. Inq. P.M. vol. iv. p. 177.

There is an O.E. *byrle* (< **burila*), which means a "cup-bearer," "butler," "calicum magister" (B.-T.). This may be the first element of *Birling*, and the sense of the name "the butler's meadow," O.E. *byrle-ing*. This would account for the two types above, but the meaning is not very satisfactory. See *Birlingham* in Duignan, Worcs. Pl.-Ns., and O.E. *-ing*, *-incg* in Pt II.

Bishopstone.

- 1085 Biscopestone, D.B. i. 16 b.
- 1197 Bissopeston, Early Stat. Chichr.; Archæologia xlv. p. 209.
- 1230 Bissopeston, Cal. Rot. Ch. p. 47.
- 1274 Bissopeston, Bissopiston, H.R. ii. p. 208.
- 1278 Bissopestone, Bisepeston, Plac. de quo War. p. 759.
- 1389 Bysshoppiston, Cal. Inq. P.M. vol. iii. p. 119.

The first element is O.E. *biscope*s, genitive singular of *biscop*, "a bishop." The second element may be O.E. *stān* or O.E. *tūn*, and the 1278 form *Bissopestone* makes the latter more likely, although the modern form has *-stone*.

See *Hunston* below, and O.E. *stān* and *tūn* in Pt II.

Blachington, East and West.*Type I (blatf-).*

- 1121 blacintona, Anc. Ch. Pipe Rolls, vol. x. No. 8, p. 12.

Type II (blak-).

- 1375 Blakyndon, Cal. Inq. P.M. vol. ii. p. 348.
 1386 Blackington, *ibid.* vol. iii. p. 83.
 1471 Blackington, *ibid.* vol. iv. p. 316.

O.E. *Blæccantūn*, "the *tūn* of Blæcca," a well-known O.E. pers. n. This is Type I above. Type II shows confusion with another common pers. n., namely O.E. *Blaca*. See O.E. *tūn* in Pt II.

Blackboys.

- 1397 Ricardi Blakeboy. Bundell Forisfactum 21 Richard II, No. 11, cit. Daniel Tyssen in Mallings Surv., Ssx. Arch. Soc. xxi. p. 188.

Probably "Blaca's wood." M.E. *Blakebois*, *-boys*. For the second element, Norman-French *bois*, "a wood," see Pt II, and cf. Skeat's remarks under *Worboys*, Hunts. Pl.-Ns. p. 320.

Or the first element may simply be the adjective *black*; M.E. *blak*, *black*; O.E. *blæc*.

Blackham.*Type I.*

- 1316 Blakehame, F.A. v. p. 139.
 1354 Blakehamme, Cal. Inq. P.M. vol. ii. p. 188.
 1371 Blakhamme, *ibid.* p. 313.
 1411-2 Blakhame, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 143.

Type II.

1314 Bletcham, Cal. Inq. P.M. vol. i. p. 262.

The forms in *-hamme* under Type I above make it probable that the second element was originally O.E. *hamm*, either (1) "enclosure," or (2) "bend in a river."

Type I is O.E. *Blacanhamm*, "the *hamm* (q.v. Pt II) of Blaca." O.E. *Blaca* normally becomes M.E. *Blāke* > mod. (bleik). The short vowel in the model (blækəm) may be due to syncope of the O.E. compound to **Blacnhamm* > E.M.E. *Blāk(n)-hamm* > later M.E. (*Blākam*).

Type II shows a confusion of the first element with the O.E. pers. n. *Blæcca* (q.v. under *Blachington* above).

Blackstone.

1296 Rogero Blackstone } Lewes Subs. Roll, Ssx. Arch. Soc.
Alexandro Blakstone } ii. p. 304.

Either simply "black stone," O.E. *blæc stān*, or possibly just the opposite, O.E. *blāc stān*, "shining, white stone." Or again the first element may be the pers. n. O.E. *Blaca* (with a strong genitive), and the second O.E. *tūn*.

The forms in *-stone* above tell us nothing about the second element. *-stone* may be O.E. *stān* or O.E. *-s* (genitive) + *tūn*.

See *Hunston* below, which has O.E. *stān* as its second element.

Boarzell.

1633-4 Borsell, Vist. Ssx. p. 106.

The evidence is scanty, but the name may be O.E. **bāreshyll*, "boar's hill." *-ell* is the remains of the Kt. **hell* for O.E. *hyll*.

See both elements in Pt II.

Bodiam (bodžəm).

1050-4 Bodesham (?), C.D. vi. p. 199. (Kemble identifies this with *Bosham*, but see early forms under this name.)

1085 Bodehā, D.B. i. 20 a.

1267 Bodyham, Bodiham, Abbr. Plac. p. 177.

1274 Bodyham, H.R. ii. p. 217.

temp. Edw. I Bodiham, Cust. B. Abbey, p. 5.

- 1324 Bodeham, Cal. Inq. P.M. vol. i. p. 319.
 1381-2 Bodiham, Cal. Rot. Ch. p. 189.
 1393 Bodynham (O.E. Bodan-), Cal. Inq. P.M. vol. iii. p. 176.
 1442 Bodyham, *ibid.* iv. p. 215.
 1695 Bodigham, Map of Ssx., Camden's Britt. p. 164.

The first element is a pers. n., O.E. *Boda*, for which Searle gives authority. A diminutive *Bodeca* is found also in *Bodecan-leah*, Cart. Sax. No. 300.

The -i- in the above forms and the modern name is all that remains of the O.E. genitive -*an*. Cf. Wyld, Lancs. Pl.-Ns., under *Padiham* (= O.E. **Paddanhām*).

For the second element see *hām* in Pt II.

Bognor.

- 680 Bucganora, C.D. i. p. 23.
 701 Bucganoran (dat.), C.D. v. p. 40.
 953 Boganora, C.D. ii. p. 303.
 1274 Bugenor', H.R. ii. p. 211.

The first element is a pers. n., which is only found in the above charters, O.E. **Bucga*.

The second element is O.E. *ōra*, "a shore," "bank" (q.v. Pt II), O.E. *Bucganōra* > late O.E. **Bucgnōra* > M.E. **Bugnor* (unfronting of *ġ* before *n* immediately following). In this case the pronunciation (bognə) is a spelling-pronunciation for (bagnə).

Bolebrook.

- 1272 Bolebrok, Cal. Inq. P.M. vol. i. p. 48.
 1411-2 Bolbrook, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 142.

Probably "the brook of Bola," O.E. *Bolanbrōc*. *Bola* is mentioned as a witness to a ch. of 824, Cart. Sax. No. 379, C.D. No. 218. For the second element, see O.E. *brōc* in Pt II.

Bolney (boulni).

- 1284-5 Bolnee, F.A. v. p. 129.
 1296 Bolenye, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 300.
 1312 Bolene, Abbr. Plac. p. 315.
 1325 Bolneye, Cal. Inq. P.M. vol. i. p. 328.
 1470 Jam^s. Costedel de Bollene. Cowfold Accs., Ssx. Arch. Soc. ii. p. 321.

The first element is O.E. *Bolan*, genitive of the pers. n. *Bola* (q.v. preceding name). The second is probably O.E. *ĕā*, "water" (q.v. under *-ey* in Pt II). Hope (Dial. Pl.-Nomenclature) gives the pronunciation of this name as *Bōleney* (= boulni). This is from O.E. *Bolanĕā*, M.E. **Bōlene(y)*, and not **Bōlne(y)*, or perhaps from the M.E. short type by the modern lengthening before *l* + cons., cf. M.E. *göld* > mod. (*gōuld*).

Borde Hill.

1294 Borede (?), Cal. Rot. Ch. p. 126.

1633-4 Thomas Borde (Boord), Vist. Ssx. p. 93.

N.-Fr. *borde* "cottage." Bardsley, Surname Dict. (1901), p. 114, gives *Board*, *Boards*, *Bord*, *Boord* as a local surname. He cites *Robert Bourde* co. Somers. 1 Edw. III (Kirby's Quest, 228); 1634. Baptism of Thomas, son of James Boord (Kensington Ch. p. 29), etc.

borde, "a little house," "lodging," "cottage of timber standing alone in a field" (Cotgr.). Cf. French "de la Borde" (Bardsley, loc. cit.).

Bosham.

1050-4 Bodesham (?) (Kemble's identification), C.D. vi. p. 119.

1050-1100 Bosanham, A.S. Chron. MS. D, anno 1050, p. 169.

1085 Boshā, D.B. i. 17 b, 27 a. }

1315 Bosham, Abbr. Plac. p. 325.

circa 1320 Bosham, T. de N. p. 222.

1340 Bosham, Cal. Inq. P.M. vol. ii. p. 97.

1405 Bosham, Cal. Inq. ad quod D. p. 354.

The C.D. form *Bodesham*, which Kemble identifies with *Bosham*, seems hardly to square with the others cited above. More likely it represents *Bodiam* (q.v. above).

The O.E. form is **Bosanhām*, "the homestead of *Bosa*." *Bosa* is a well-authenticated name in O.E., see Cart. Sax. Index.

Hope gives the modern pronunciation as *Bos-ham*, but Professor Mawer tells me it is normally (bozəm). See O.E. *hām* in Pt II.

Botolphs, Buttolphs.

1121 Capelle sci Botulfi, Anc. Ch. Pipe Rolls, vol. x. No. 8, p. 13.

1620 Botolphs, Ind. Ch. and Rolls, p. 90.

O.E. *Bōtwulfes*, genitive singular of *Bōtwulf*, a well-authenticated pers. n.

This name has two developments :

(1) It became M.E. *Bōt(w)ulfes*, with shortening of the *ō* before *-tw-*, and gave rise to the modern form.

(2) It lost the *-w-* of the second element already in O.E., and became M.E. *Bōtulfes*, 16th cent. (būtulfs) and modern (batølf).

The early forms above seem to be this second type.

Boxgrove.

1085 Bosgrave, D.B. i. 25 b.

1245 Boxegrave, Cal. Rot. Ch. p. 61.

1278 Boxgrave, Plac. de quod War. p. 755.

1379 Boxgrave, Cal. Rot. Ch. p. 210.

1428 Boxgrave, Cal. Inq. P.M. vol. iv. p. 120.

O.E. (*æt þæm*) *boxgrāfe*, "at the box-tree grove." The *s* in the D.B. *Bosgrave* is probably due to faulty hearing on the part of the scribe. Cf. *Bexhill* above, and see O.E. *box* in Pt II.

The modern (-græv) or (-grouv) for the second element is descended from the O.E. dative type *grāfe*.

[The Cambs. *Boxworth* has early forms *Bochesuuorde* in D.B., *Bokesworth* in F.A. (1284). Skeat (Cambs. Pl.-Ns.) takes the first element to be O.E. *bōces* (?), perhaps Norse, Icel. *bokkr*, Swed. *bock*, "he goat," have O.E. *buc*, "back," "although" (he says) "we find the spelling *Bukeswrth* in Pedes Finium, 1228."]

Bracklesham.

945 Brakelesham, Cart. Sax. vol. ii. p. 562 (No. 807).

1363 Brakelesham, Ind. Ch. and Rolls, p. 94.

temp. Hen. VI Bracleshm, Tax. Eccl. p. 135.

I suggest for the first element a pers. n. **Braccol* or **Braccele*, a diminutive of *Bracca*, of which Searle quotes only one instance, a pl.-n. *Braccanheal*, Cart. Sax. No. 778, and C.D. No. 1142.

For the second element see O.E. *hām* in Pt II.

Bramber.

Type I.

Type II.

1274 Brambre, H.R. ii. p. 210.

1471 Brambir, Cowfold Accs., Ssx. Arch. Soc. ii. p. 322.

Probably simply O.E. *brēmre*, a by-form of *brēmel*, "bramble." B.-T. cites the forms *brēmel*, *brēmbel*, *brāmbel*, *brēmber* = "bramble," "briar," "tribulus," etc. See next name.

 p. 133.
 1438 Bramyltye, Cal. Inq. P.M. vol. iv. p. 193.

The first element is O.E. *brēmel*, *bræm(b)el*, "bramble." The second element is *-tye*, < M.E. *tighe* < O.E. *tēāg*, "enclosure," "paddock." See discussion under this element in Pt II.

Brantridge.

- 1296 Brenteregge, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 300.

The first element is O.E. *brant*, "lofty," "high," which is still used in the mod. dialects (mainly in the North) in the sense of "lofty," "steep," said of hills. See E.D.D. The second is *hrecg*, the (later) Kentish form of O.E. *hrycg*, "ridge," "hill-side." See both words in Pt II.

Brede.

Type I.

- 1160-1 Brade, Pipe Rolls, vol. iv. p. 13.

Type II.

- 1251 Bredde, Cal. Rot. Ch. p. 74.
 1278 Brede, Plac. de quo War. p. 749.
 1285 Brede, Cal. Inq. P.M. vol. i. p. 92.

 1315 Brede, Cal. Inq. ad quod D. p. 249.
 1409 Brede, Cal. Inq. P.M. vol. iii. p. 328.
 1633-4 Breade, Vist. Ssx. p. 15.

This seems to be an O.E. **bræde*, a mutated form of the common *brād*, "broad," "wide." It would thus mean "the broad place," "the wide field" or something of the kind. See the early forms of *Bradkirk* in Wyld, Lancs. Pl.-Ns., and remarks under that name.

Type I above shows the usual O.E. unmutated *brād*.

Type II is the ancestor of the modern name.

Brightling.

- 1016-20 Byrhtlingan, C.D. iv. p. 10.
 1085 Brislinga, D.B. i. 18 b.
 1273 Brihtlinge, Cal. Inq. P.M. vol. i. p. 63.

 1294 Brighling, *ibid.* p. 126.
 1325 Brightling, Cal. Inq. P.M. vol. i. p. 328.

Possibly O.E. **Byrhtelingas* or rather **Bryhtelingum* (dative plural), "(among the) sons of **Bryhtele*, or **Brihtele*." O.E. **Brihtele* is a diminutive of *Briht-*, a shortened form of one of the numerous names in *Briht-*, *Beorht-*, *Byrht-*, etc. Probably it is a form of the name *Brihthelm*, since this name, in its full form, was the first element of the neighbouring *Brighton* (q.v. below).

Or the *-ing* may represent O.E. *ing(un)*, an inflected form of O.E. *ing*, *incg*, "a water-meadow" (q.v. Pt II).

The D.B. *Brislinga* probably = *Bristlinga*, where *-st-* is the common Norman-French rendering of O.E. *-ht-*, cf. Introduction under *Spelling*.

The *tūn* of *Brihthelm*, earlier *Beorhthelm*. Both Searle and Birch give numerous instances of *Beorhthelm* in O.E. On the D.B. *-s-*, cf. *Brightling* above.

The modern (*braithn*) shows a total loss of the second syllable of the original *Brihthelmestūn*, and if we may take the 1335 form *Bruyton* seriously, the syllable was already lost in early M.E., although scribes continued to write *Brighthelmeston*.

See *Brighthampton* in Alexander, Oxf. Pl.-Ns., for another development of O.E. *Brihthelmestūn*, and for yet another see *Bricklehampton* in Duignan, Worcs. Pl.-Ns.

Harrison (Liverpool District Pl.-Ns., under *New Brighton*) says that "the Sussex *Brighton* was...anciently called *Brihthelmesstān*"; but surely he could not have seen the D.B. forms above.

Brimfast. (In Kelly's Directory; I cannot find it on the map.)

957. *Brimfaston*, C.D. ii. p. 341.

The second element is O.E. *fæsten*, "a fastness," "fort," "castle." The first is probably O.E. *brim*, "ocean," "sea."

Broadbridge.

1633-4 *Bradbridge*, Vist. Ssx. p. 71.

æt þære brādan brycg, "at the broad bridge," or O.E. *brāda brycg*, "the broad bridge." The M.E. forms have a short *ǣ* in the trisyllabic compound *brādebrugg*; the modern name is a new formation from the independent word *broad*.

Type II.

1361 Brutforde, Cal. Inq. P.M. vol. ii. p. 239.

Type III.

1274 Bradeford, Abbr. Plac. p. 187.

Type I is the commonest and earliest form, and contains as its first element O.E. **bræde*, a mutated form of *brād*, "broad" (see *Brede* above).

The modern form (brōdfəd) is not descended from any of these Types, but is a new formation, as in *Broadbridge* above.

I can make nothing of Type II, unless the first element be O.E. *brȳd*, "a bride," which is not probable.

See O.E. *brād* and *ford* in Pt II.

Broadwater.

946-55 Bradanwætere, C.D. v. p. 333.

1085 Bradewatre, D.B. i. 26 b, 28 b.

1633-4 Brodewater, Vist. Ssx. p. 29.

1695 Broodwater, Camden's Britt. p. 171.

O.E. *æt þæm brādan wætere*. Here again, as in *Broadbridge*, the vowel was shortened in M.E. The M.E. form *Brōdewater* occurs 1633-4 above, the exact precursor of modern (brōdwōtə).

No. 5 above, *Brawatre*, is probably merely a scribal error. A loss of -*d*- before -*w*- is not proved for M.E.

Brookham.

1317 Brokesham, Cal. Rot. Ch. p. 152.

"The homestead by the brook." The form above points to an O.E. *brōceshām*, with the first element in the genitive singular.

See both elements in Pt II.

Broomer's Green.

1294 Bromere, Cal. Rot. Ch. p. 136.

1439 Brommore, Cal. Inq. P.M. vol. iv. p. 157.

Probably O.E. *brōm gemāru* (*brōm* = *genista*). The 1439 *-more* is from the O.E. unmutated **gemāre*.

See both elements in Pt II.

The "*Green*" has been added in post-M.E. times, possibly because it was felt that *Broomer* was a pers. n.

Broomhill.

1293 Bromyknoll? Cal. Inq. P.M. vol. i. p. 122.

The first element is O.E. *brōm*, "broom," "genista," combined in the 13th cent. with the adjectival suffix *-ig* > *-y*.

The second was originally O.E. *cnoll*, "knoll," "hill-top," for which the commoner *-hill* (O.E. *hyll*) has been substituted in the modern name.

See O.E. *brōm*, *cnoll*, and *hyll* in Pt II.

1294 Broyle, Abbr. Plac. p. 235.

1366 Broyl, Mallng Surv., Ssx. Arch. Soc. xxi. p. 160.

B.-T. says "O.E. *broel*, *brogel*" (no reference for its appearance in O.E.), "... 'a park,' 'warren stored with deer,' hence the *Broyle*, a wood in Sussex, belonging to the Archbishop of Canterbury; *vivarium*, *hortus cervorum*, O.H.G. *brogil*, *broil*."

I take the name to be O.Fr. *breuil* (mod. Fr. "breuil"), "a thicket" < Late Lat. **brogilus*. The word exists also as an element in continental pl.-ns. See Heilig, *Ortsn. d. Grossherzogtums Baden*, p. 19, under O.H.G. *brugil*, M.H.G. *brüel*; Leithaeser, *Bergische Ortsn.*, p. 189, under *Bröhl*, and Jellinghaus, *Westf. Ortsn.*, p. 8, under *bröggel*, *bröhl*. All these authorities agree with the above etymology.

Buckhurst Park.

 1428 Bokherst, F.A. v. p. 148.
 1450 Bookherst, Cal. Inq. P.M. vol. iv. p. 246.

The first element is probably O.E. *bōc*, "a charter" ("book"). See O.E. *bōc* and *hyrst* in Pt II. The (a) in (bak-) is 17th cent. unrounding of *ǣ* < *ū* < M.E. *ō* < O.E. *ō*. On this point see Wyld, Hist. Study, chapter on Modern Period.

The independent word (*bŭk*) is probably descended from early 19th cent. (*bŭk*), with shortening of *ū* to *ǔ* before *-k*.

Bucksteep Manor.

 1411-2 Bokstepe, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 145.

The second element is probably O.E. *stēāp*, "lofty," "tall," "mountainous," used as a noun in the sense of "hill." The first is O.E. *bōc*, "a charter" (q.v. under *Buckhurst Park* above, and in Pt II).

Buddington.

- 1283 Bodeton, Cal. Inq. P.M. vol. i. p. 84.
 1432 Buddington, *ibid.* iv. p. 151.

The first element is a pers. n. O.E. *Budda*, which is found in Cart. Sax. No. 189.

For the second, see O.E. *tūn* in Pt II.

Bulver Hithe.

Buncton.

 1343 Bongeton, Cal. Inq. P.M. vol. ii. p. 109.
 1361 Bengeton (?), *ibid.* ii. p. 240.

I cannot suggest any etymology for the first element *bung-*, *bong-*. Neither the E.D.D. nor the N.E.D. gives any meanings of *bung* that would suit.

There is a *Bungay* in Suffolk, amongst the early forms of which are 1594 and *passim* *Bongey* (Ind. Ch. and Rolls), 1358 *Bungey* and Edw. I *Bungheye* (cit. Bardsley, Engl. and Welsh Surnames, p. 147). These *Bung-*, *Bong-* spellings may represent an unrecorded O.E. pers. n. **Bung-*, although I can find no continental cognates to support the assumption.

Burpham (bāfām, E).

No early forms. Very probably *Burpham* represents O.E. **burghām* > **burhhām* > M.E. **burh^wām* > (bāfm). The *-ph-* is merely a N.-Fr. spelling, which frequently appears in early documents for *-f-*, cf. *Grapham* (= *Graffham*, Hunts.) in F.A. ii. anno 1285. See *Felpham* below.

Burton, and Burton West.*Type I.*

 1284 Burton, Cal. Inq. P.M. vol. i. p. 86.
 1324 Burton, Cal. Inq. ad quod D. p. 280.

Type II.

- 1226 Burtham ? Cal. Rot. Ch. p. 33.

O.E. **burgtūn* > **burhtūn*. O.E. *burg* meant first a "fortified place," "a fastness," and later "a city." The medial *-h-* was normally lost between two other consonants. Type II, if it may be taken seriously, seems to be a mixture between O.E. **burhtūn* and O.E. **burhhām*.

Burwash (barif).*Type I.*

- 1274 Borwhesse, H.R. ii. p. 217.

 1320 Burghershe, Cal. Inq. ad quod D. p. 263.
 1372 Burghersh, J. of G.'s Reg. i. p. 56.

The modern name is descended from Type I, O.E. **burgæsc*, "ash-tree by the burgh." O.E. **burgæsc* > M.E. **burgash* > **burg^wash* > **burwash* > mod. (barif) by loss of *-w* in the unstressed syllable. Cf. *Borrowash* in Walker, Derby. Pl.-Ns.

Type II has as its second element O.E. *ersc* which Kemble (C.D. iii. preface, p. xxiv) defines as "ersh," "edish," "aftermath," or "stubble." It is found in O.E. pl.-ns., *langanersc* C.D. No. 589, *héan ersc* No. 18 (cit. Kemble).

B.-T. defines O.E. *ersc* as "a park," "preserve," and glosses Lat. *vivārium* from Bentley and Lye's 18th cent. A.S. dict., and refers to *edisc*, "aftermath."

(K. (loc. cit.) says that "*ersh* still (1845) survives in Surrey. Near *Chertsey* are some meadows, commonly called *Wettish*, i.e. 'the wheat-ersh,' *hwæt-ersc*, according to the explanation given me on the spot.")

See O.E. *burg* and *æsc* in Pt II.

Type III.

1285 Byry, Abbr. Plac. p. 210.

O.E. (*æt þære*) *byrig*, dative of O.E. *burg*, *burh*, "castle," "fortress"; later "city," "borough."

The modern name has the spelling of the M.E. Saxon type, but the pronunciation is that of the Kentish (*beri*).

Buxted.

1404 Bokstede, *ibid.* iii. p. 300.

1411-2 Bokstede, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 141.

O.E. *bōcstede*, "the 'stead,' 'place' given by charter (*bōc*)."
Most modern names in *Buck-*, *Bux-* are derived from an O.E. *bōc-* or *bōces*. Cf. *Buckhurst Park* and *Bucksteep* above, and see *stede* in Pt II.

Byworth.

1539 } Byworth, Ind. Ch. and Rolls, p. 139.
1595 }

Possibly simply O.E. *bī weorþe*, by the "worth." Skeat explains *Bygrave* in Hunts. as containing the stressed form of the preposition O.E. *bī(g)* = "by," "near."

See O.E. *weorþ* in Pt II.

Castle Hill.

1243 Castelow, Cal. Rot. Ch. p. 59.

The etymology is obvious. See *Castley* in Moorman, W. Rid. Pl.-Ns. The form above has O.E. *hlāw*, "tumulus," "burial-mound," as its second element. See *Cudlawe* below.

Catsfield Place.

 1411-2 Cattisfeld, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
 p. 143.

"The field of Catt," O.E. *Cattesfeld*. Searle records pers. ns. *Ceatta*, *Catta*, and *Catto*; the last two seem to be variants of *Ceatta*. Duignan finds for the Staffs. *Catshill* 14th cent. *Catteslowe* and 15th cent. *Catteslowe*, alias *Catteshill*. An O.E. pers. n. *Catt* appears to form the first element of some O.E. pl.-ns. in *cattesfleet*, C.D. No. 956, and the weak *Catta* in *Cattanege* (C.D. v. p. 236).

The genitive singular in the first element makes it unlikely that *Catt-* is the name of the animal.

Chailey.

 1439 Chaglegh, *ibid.* iv. p. 198.
 temp. Hen. VI Chaggelye, Tax. Eccl. p. 136.

The first element is a pers. n. O.E. *Ċege* < **Ċæge*, a variant of the *Ceagga* recorded by Searle. The name *Ċege* is recorded by Kemble, Index to C.D. from *Cegham*, C.D. 363 and *Ceigham* 532, 896 (= Surrey *Cheam*). The Sussex *Chailey* goes back to an O.E. **Cægan lēah* > M.E. *Chai(e)ley* > (t)jeili).

O.E. **Cealfantūn*, "the tūn of Cealfa." Names of animals frequently formed components of pers. ns., or were used as such themselves. Cf. such names as *Catt*, *Fisc*, and the numerous names in *Wulf*.

The following names from Kemble's C.D. Index may contain *Cealfa* as a pers. n.—*Cealfadūn* 812, *Cealfaleah* 526, 1091, *Calfhealas* 150. Or *Cealfa* may equally well be the name of the animal.

The mod. pronunciation (tʃɔ̃tn) is developed out of O.E. **Cealfantūn* > M.E. **Chalvetūn* > (tʃaulvtun) > (tʃɔ̃tn), while the spelling preserves the M.E. -ing- < O.E. -an-.

See O.E. *tūn* in Pt II.

1358, 1361 Charlaxton, *ibid.* ii. pp. 206, 226.

1401-2 Charlaxton, F.A. v. p. 147.

I can find no authority for a pers. n. to fit the first element. The evidence of the early forms points to an O.E. **Ceorlāc* (or **Ceorllāc*), and this name, though not recorded by Searle, may have existed, since both *Ceorl-* and *-lāc* are common constituents of pers. ns. Cf. names like *Ceorlwulf*, *Ceorl*, and *Hygelāc*, king of the Gauts, in *Beowulf*. If the O.E. form be **Ceorlācestūn*, the second (unstressed) syllable has been completely lost. For other examples of this change, see *Brighton* above and *Wiston* below; cf. also Wyld's remarks, *Lancs. Pl.-Ns.* § 14, pp. 27, 28.

O.E. *Ċissan ceaster*, "the city of Cissa." *Cissa* is a well-authenticated O.E. pers. n.; see Searle.

The modern pronunciation (tʃitstə) is normally developed from late O.E. *Cissecester*, thus tʃisetfestər > tʃistfestər > tʃitfestər > tʃitʃtər > tʃistə.

Note that most of the early form appear as *Cicestr*, i.e. are Norman forms which the scribes persisted in writing. Had the

Norman type of pronunciation survived, the modern name would be (sisistə) or (sistə). On this point, see remarks under *Cissbury Hill* below. Note that the popular (English) type *Chichester* only appears once, and that very late.

Chick Hill.

1284 Chikehull, Cal. Inq. P.M. vol. i. p. 88.

For the Beds. *Chicksands*, Skeat finds early forms D.B. *Chicesane*; F.A. and H.R. *Chikesaund*; *Chiksond*, Inq. P.M. He assumes for the first element a pers. n. **Cicc*, for which Searle gives no authority. **Cicc*, he says, "has nothing in common with M.E. *chike*, a shortened form of *chiken*, a chicken; for this *chike* was unknown till after 1300."

Type II.

1349 Chudingley, Cal. Inq. P.M. vol. ii. p. 154.

There is a pers. n. *Cedda* for which Searle gives authority from *Ceddanleah* in Birch, Cart. Sax. No. 506.

Type I above is from the W.S. **Cieddanlēah* type; Type II is *Cieddan* -> *Cyddan* -> *Chuding* (= *tfydiŋ*) in M.E.

The interchange of *-t-* and *-d-* in Type I above is considered by Zachrisson (A.-N. Influence, p. 43, footnote) to be due to the influence of Norman-French. He seems to consider that the Normans could not properly distinguish between Engl. (*t*) and (*d*), and pronounced or wrote either indifferently. In *Chiddingly* the *-t-* forms have vanished entirely, but they persist in *Chithurst* (q.v. below), and O.E. **Tottantūn* is in modern Sussex called both *Toddington* and *Tottington* (q.v. below).

 1428 Chydham, F.A. v. p. 170.
 1633-4 Chidham, Vist. Ssx. p. 55.

The first element is the O.E. *Cedda* discussed under *Chid-dingly* above. The above spellings show the three M.E. types—
 I. *Cedd-* undiphthongised; II. *Cedd-* > *Ciedd-* > *Cydd-*; III. *Cedd-* > *Ciedd-* > *Cidd-*, with late O.E. monophthongising of *-ie-* to *-i-*.
 The modern name is descended from Type III.

See O.E. *hām* in Pt II.

Chilgrove.

Type I.

- 1278 Chelegrave, Plac. de quo War. p. 761.
 1305 Chelegrave, Cal. Inq. P.M. vol. i. p. 209.
 1307 Chelgrave, *ibid.* p. 228.

Type II.

- 1341 Chilgrave, Cal. Inq. P.M. vol. ii. p. 100.

The first element is doubtful. It may represent :

1. O.E. *ceole*, "throat," used in pl.-ns. in the sense of "narrow valley."
2. O.E. *ceōl*, "a ship" (always so in O.E.), but also perhaps "a keel," "ridge," applied to geographical features.
3. A pers. n. O.E. *Cēōla* or *Cēōl-*, a "familiar" or shortened form of *Cēōlmund*, *Cēōlbald*, *Cēōlwulf*, etc.

4. O.E. *iele* (W.S. *ciele*), "cold, chill." (Wyld, Lancs. Pl.-Ns. Pt II, under *Chel*-.)

Phonetically speaking, No. 4 above would fit the early forms of Sussex *Chilgrove* best, with Type II from the W.S. type *Ciele*. But the meaning of an O.E. *ielegrāf*, "cold grove," is hardly satisfactory.

More probably No. 3 above is the first element. O.E. (*æt*) *Cēōlangrāfe* > M.E. *chelegrave* (Type I).

Type II and the modern (*t*filgrouv) must be due to popular etymology, the association of the first element with the word "chill," common in all periods of English.

Cf. Somerset *Chilcot* < O.E. *Celicot*, C.D. No. 1065; Wilts. *Chelworth* < *Chellewrōða* in the same charter (cited by Wyld, Lancs. Pl.-Ns., under *Chel*- in Pt II).

1344 Chiltington, Cal. Rot. Ch. p. 178.

1426 Chiltington, Cal. Inq. P.M. vol. iv. p. 109.

Under O.E. *Cilt-ern* (*Chiltern*, Oxf.) B.-T. notes "*ceald*, 'cold,' and *ern* 'place.'" But I do not see how the authors account for the *-t-*. In the above spellings there are six *Chilt-* forms against one *Child-*.

The D.B. spellings may represent an O.E. *cild(an)tūn* (*Cild*, *Cilda*, a pers. n.; see Searle). This would square with the 1313 form *Childyngton* above, but it would not account for *Chilt-*.

Possibly *Child-* and *Chilt-* existed side by side, showing the N.-Fr. interchange of *-t-* and *-d-*. See *Toddington* below and cf. Zachrisson, p. 43, fn.

1341 Chedehurst, *ibid.* ii. p. 100.

1605 } Chithurst, Ind. Ch. and Rolls, p. 175.
1630-2 }

The first element is probably the O.E. pers. n. *Cedda* (q.v. under *Chiddingly* and *Chidham* above). If this be so, the early (Norman-French) confusion between (*d*) and (*t*) has persisted at least till the 14th cent., and the form with (*t*) has been chosen for the modern. See remarks on (*d*) and (*t*) under *Chiddingly* above.

For the second element see O.E. *hyrst* in Pt II.

Chorley Common.

No early forms. Probably O.E. *ceorla lēāh*. Cf. *Charlton* and *Charleston* above, and see *Chorley* and *Chorlton* in Wyld, Lancs. Pl.-Ns.

Cinque Ports.

1308 de libertate Quinque Portuum, *Abbr. Plac.* p. 308.

"The five ports," familiar to all students of English history.

Cissbury, Cissbury Hill.

No early forms. The first element is probably the same O.E. *Cissa* that forms the first element of *Chichester* (q.v. above). The modern pronunciation (*sisbəri*) is due to Norman-French substitution of *ts* > *s* for the English -*ts*-. For another example of this substitution see early forms of *Ticehurst* below, and remarks under that name. The second element is O.E. *byrig*, dative of *burg* (q.v. Pt II).

1428 Clopham, F.A. v. p. 167.

Type II.

1432 Clapham, Cal. Inq. P.M. vol. iv. p. 151.

Skeat finds for the Beds. *Clapham* early forms exactly like those given above. Moreover he says (Beds. Pl.-Ns. pp. 25-6) that, "In a genuine ch. of the time of Ælfred, *Clapham* in Surrey appears as *Cloppa-hām*, see Sweet, O.E. T. p. 451. *Cloppa* must be a gen. plu. of a form *clōp*, which occurs in *clōp æcer* (clōp-acre) and *clōp hyrst* (clōp-hurst) in Birch, Cart. Sax. iii. 589, 590.... The meaning of *clōp* is not certainly known; but Kalkar's Middle Dan. Dict. has *klop* in the sense of 'stub' or 'stump,' which would suit all three forms. The mod. Engl. 'clump' may be related.... It would then mean 'enclosure of stubby ground,' lit. 'of stubs.'"

Furthermore, the same authority (Berks. Pl.-Ns. p. 94, under *Clapton*) says, "The prefix *Clap-* or *Clop-* is common; the A.S. form, in both cases, is usually *clōp-*."

This word is not mentioned either in B.-T. or Sweet's A.S. Dict. It is difficult to see how O.E. *clōp-* became mod. *clap-* (klæp-), except by the dialectal interchange of *a* and *o* (= *a*, *o*) (by isolative change?). This change (Wright, E. D. Gr. p. 74) may well go back to the 15th century. Cf. Diehl, Anglia xxix. pp. 154 ff., Horn, Untersuchungen, pp. 26 ff. Wright mentions that the change is spread over a large area and seems to be specially common before *-p*. Cf. *strap* and *strop*, *flap* and *flop*.

Moorman, W. Rid. Pl.-Ns., takes the first element of the Yorks. *Clapham* to be a pers. n., O.E. *Cloppa*, *Clappa*, or *Clapa*. He does not explain the interchange of *-o-* and *-a-*. So also Duignan, Warw. Pl.-Ns., under *Clopton*, for which he reconstructs O.E. **Cloppantūn*.

Type II.

1346 Cleton, Cal. Inq. P.M. vol. ii. p. 137.

O.E. *clæg tūn*. O.E. *clæg* meant "clay," "mud," "slime."

Type I represents O.E. *clæg tūn*, M.E. *claiton*, and has normally developed into modern (kleitn).

Type II represents an O.E. *clæ tūn*, with loss of *g* in *clæg* before the following *-t-*. This, had it survived, would have given a modern (klitæn).

Cliffe.

1544 Clyva, Malling Surv., Ssx. Arch. Soc. xxi. p. 169.

1547 Cliva juxta Lewes, Ind. Ch. and Rolls, p. 182.

Simply O.E. *clif*, "the cliff." The above forms are from the O.E. dative *clife* > mod. *Clive* (klaiv), a pers. n. The pronunciation (klaiv) for *Clive* is either due to Norman-French lengthening of *ĭ* to *ī*, or to a spelling-pronunciation.

Climping.

1085 Clepinges ? D.B. i. 25 a.

1367 Climping, Cal. Inq. P.M. vol. ii. p. 279.

1390 Clinpyng, *ibid.* iii. p. 130.

The Ind. Ch. and Rolls, p. 185, mentions 1633 *Climesfeild* (= *Climpsfold*, nr. *Slindon*, now lost), and *Climeslande* (1217-20) = *Stoke Clinsland*, *Cornwall*. These names seem to contain the same first element as the Ssx. *Climping*.

Searle quotes an O.E. pers. n. *Clima*, "local," from Cart. Sax. No. 751. This may be the first element, O.E. *Clima(n)ing* ("Clima's meadow") > **Climning* > *Climping* (?). But this does not satisfy me.

Coates.

1314 Cotes, Cal. Inq. P.M. vol. i. p. 262.

1345 Cotes, *ibid.* ii. p. 129.

1399 Cotes, *ibid.* iii. p. 261.

1501 Cotes, Ind. Ch. and Rolls, p. 184.

O.E. *cotes*, genitive singular of *cot*, "a dwelling," "house" (not necessarily a *small* dwelling or cottage). Skeat, under *Coates* in Cambs. Pl.-Ns., says that this name is O.E. plu. *cotas*, but *cot(t)* was either neut. or fem. (plu. *cotu* or *cotan*), never masc.

Duignan, Staffs. Pl.-Ns. p. 45, under *Coton*, discussing the *Cotes* forms which he finds, says they are from the gen. sing. *cotes*.

(N.B. The name *Coates* must be from the gen. sing. of the *cot* type; O.E. *cottes* must have given modern (*kots).)

See O.E. *cot(t)* in Pt II.

Cocking.

1314 Cockingg, Cal. Inq. P.M. vol. i. p. 262.

1379 Cockinge, *ibid.* iii. p. 27.

The first element may be the rare O.E. **coc* which Middendorff explains as "Gurgel," "Schlund," "Schlucht," comparing O.Norse *kok*, "a throat" (i.e. "a ravine," "chasm," applied to geographical features). The *-inge* and *-ingg* spellings make the assumption of O.E. *incg*, "water-meadow," as the second element very tempting. See *Cockleach* in Wyld, Lancs. Pl.-Ns.

Cokeham.

1085 Cochehā, D.B. i. 28 a.

1316 Cokehamme, Cal. Inq. ad quod D. p. 252.

1336 Cokham, Cal. Inq. P.M. vol. ii. p. 72.

1357 Coukeham, *ibid.* p. 202.

The first element may be O.E. *cocc*, "gallus," or it may be O.E. **coc*, "a narrow valley" (cf. preceding name). Or again, as is probable, it is the O.E. pers. n. *Cocca*, which Searle cites from *Coccanburh* in Cart. Sax. No. 246.

The second element is O.E. *hām*, "a homestead," or *hamm*, (1) an enclosure, (2) bend in a river, land enclosed therein.

On the whole, I think that O.E. *Coccanhām*, "Cocca's homestead," is the most likely prototype of the modern name.

Coleman's Hatch.

1544 Colmans hache, Malling Surv., Ssx. Arch. Soc. xxi. p. 170.

The "hatch" or "gate" of Coleman, a M.E. surname (Modern Coleman, Colman). "Hatch" is O.E. *hæcce*, "a gate" (q.v. Pt II). The name *Coleman* is also given by Ellis in Index B (Introd. to D.B. vol. ii.) as the name of persons holding land in Surrey, Hunts., Berks., and Oxf. (p. 70).

Colworth.

988 Coleworð, C.D. iii. p. 236.

The first element is a pers. n., O.E. *Cola*, of which Searle gives several instances. He cites, for example, the O.E. pl.-n. *Col-antrēow* from C.D. Nos. 712, 780.

See O.E. *weorþ* in Pt II.

1337 Cumpton, Cal. Inq. P.M. vol. ii. p. 79.

1411-2 Cumpton, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 131.

O.E. *combtūn*, *cumbtūn*, "the enclosure in or by the valley." Type I represents O.E. *combtūn*, and is the ancestor of the modern (komtən). Type II is O.E. *cumbtūn*, and would give a modern (*kamtən).

See Duignan's remarks in Staffs. Pl.-Ns. under this name, and see *comb* and *tūn* in Pt II.

Zachrisson (A.-N. Influence, p. 16 note) considers *Compton* to be a mere spelling variation of *Cumpton* due to the M.E. habit of writing *o* for *u* before *m*. On the other hand, probably both *comb* and *cumb* existed in O.E., and were presumably equally common, and would normally give rise to two M.E. types, and two modern pronunciations (komtən) and (kamtən).

Conyboro.

1370 Le Conyngber, Cal. Inq. P.M. vol. iv. p. 453.

The first element is M.E. *coni*, *conyng*, "a rabbit" (mod. "coney"), q.v. Pt II.

The second may be M.E. *-ber* < O.E. *bearu* (nom.), "a grove," or O.E. *berh*, *beorh*, "a hill."

"Rabbit grove" is a very convincing meaning. The second element of the mod. Engl. pl.-ns. *Kingbeare* and *Loxbear* (Dev.), has been shown by Wyld, E. St. 47, pp. 145-53, also p. 166, to be from O.E. *bȳre*, through the stages (*bīr*, *bēr*, *bīr*) by a series of sound-changes peculiar to the S.W. dialects.

The dative O.E. *bearwe* > M.E. *barwe*, and is thus indistinguishable from the *barwe* which arose out of O.E. *beorge*, the dative of *beorg*, "a hill."

1535-43 Cowdrey, Leland's Itinerary, iii. p. 92.

1633-4 at Cowdrey, Vist. Ssx. p. 22.

The first element is probably O.E. *cū*, "a cow." On the other hand, many pl.-ns. in *Cow-* have a pers. n. *Col-* as their first element. Cf. *Cowdown* (Worcs.) which is *Collesduna* (1108), *Coulesden* (1300), etc. (Duignan, Worcs. Pl.-Ns. p. 45). Similarly *Cowthorpe* (Yorks.) is *Coletorp* in D.B. (cit. Wyld, Lancs. Pl.-Ns.).

But the meaning of the second element, O.E. *gedræg*, "a shelter," "cot for shelter" (q.v. Pt II), makes it probable that the first is the name of the animal.

[Bardsley, Engl. and Welsh Surnames, p. 211, explains *Cowderoy*, *Cowdery*, *Couldery* as being from earlier *Coudray* (1273), *Coudraye* (1307), *Cowdrye* (1618), etc. This he takes to be O.Fr. *coudraie*, "a filbert," "orchard," Mod. Fr. *coudrier*, "hazel." I still hold, however, to the above explanation; I consider the name is as English as it can be.]

Cowfold (kaufould, E).

3. 1460 Cowfold, Cowfold Accs., Ssx. Arch. Soc. ii. p. 318.

Here again, the spelling *Cu-* in No. 1 above points to O.E. *cū*, "cow," as the first element. The second was originally O.E. *fald*, but it has been confused, as usual, with O.E. *feld*. (See both elements in Pt II.) The form *Cufaude* (No. 1) above shows Norman-Fr. diphthongising of *a* to *au* before *l*.

Crawley Down.

1274 Crauledun, H.R. ii. p. 210.

See *Crowhurst* below, and O.E. *dūn(e)* in Pt II.

Crocker Hill.

1428 Crockershelle, F.A. v. 157.

Bardsley, Surnames, gives for *Crocker* early forms *Crochere*, co. Devon, Hen. III—Edw. I, later *Crocker*. He considers it as a "surname of occupation" meaning simply "a maker of crocks" or "crockery." But there is a *Crōc* mentioned as a "nomen viri" by Ellis in Indices to D.B. A and B, and Searle cites *Croc*, *Crocc* temp. Cnut and Harold I, from Grueber. It is not going too far to assume that this *Crōc* was increased to **Crochere* by

the addition of the common pers. n. suffix *-here*, which ends hundreds of O.E. names. The early form *Crochere* given by Bardsley would seem to bear out such an assumption.

- 1316 Crauehurst, F.A. v. p. 133.
 1319 Crauherst, Cal. Inq. P.M. vol. iv. p. 429.

The first element may be the O.E. feminine name *Crāwe* (q.v. under *Crawley* above), or it may be the name of the bird, O.E. *crāwe*. The second is the common O.E. *hyrst* (q.v. Pt II).

Type I and the modern (krouæst) is derived from the O.E. *crā-* type (with loss of final *-w*). Type II, modern (*kr̥æst), is from O.E. *crāw-* > M.E. *crāw-* > *crau-* > modern (kr̥-).

Crowlinke.

- 1265 Crawelinke, Abbr. Plac. p. 162.
 1302-3 Crawelinke, F.A. v. p. 131.

For the first element cf. preceding name. The second is O.E. *hlinc*, "a slope" (q.v. Pt II). Cf. Wyld, Lancs. Pl.-Ns., under *Lench*, and Duignan, Worcs. Pl.-Ns., also under *Lench*.

Cuckfield.

 Cuckfeild }

Type II (-feud).

- 1278 Cokefeud, Plac. de quo War. p. 750.
 1321 Cokefeud, Cal. Inq. P.M. vol. i. p. 229.
 1408 Cokefeud, Cal. Inq. ad quod D. p. 359.

No trace of the N.-Fr. type ending in *-feud* has survived in the modern (kukfild). Compare *Henfield*, *Hayfield* below.

The first element of the Sussex *Cuckfield* is probably a pers. n. Searle quotes *Cuca* from an O.E. pl.-n. *Cucanhealas*, Cart. Sax. No. 936, C.D. No. 461. A diminutive *Cucola* also exists.

The O.E. **Cucanfild* develops normally into M.E. *Cukefeld*, and mod. (kukfild).

For the second element see O.E. *fild*, Pt II.

Cudlawe, Cudlow.

Type I (-lāwe).

- 1264 Codelawe, Cal. Rot. Ch. p. 92.
 1267 Codelawe, Abbr. Plac. p. 176.
 1274 Cudelawe, H.R. ii. p. 214.

 1421 Codelawe, Cal. Inq. P.M. vol. iv. p. 60.

Type II (-lōwe).

- 1534-43 Cudlo, Leland's Itinerary, iii. p. 93.

The first element is a pers. n., O.E. *Cudda*, cf. Searle. The modern spellings presuppose two M.E. types *Cudlawe* < O.E. **Cuddanhlāwe* (dative), and *Cud(ε)lōwe* < O.E. **Cuddanhlā(w)* (nom.). Both *-lawe* and *-lōwe* are pronounced locally merely as (-lə).

For the second element see O.E. *hlāw*, "a tumulus," "mound," "burial-mound," in Pt II.

Dallington (dæliŋtən).

- 1085 Dalintone, D.B. i. 18 b.

- 1406 Dalington, Cal. Inq. P.M. vol. iii. p. 310.
- 1484 Dalyngton, *ibid.* iv. p. 421.

The first element is a pers. n. There is no authority in O.E. for **Dalla*, which would suit the above name perfectly, but Searle gives a few examples of *Dealla*. An O.E. **Deallantun*, however, might give a modern (dæliŋtən), although its normal development would be (dōliŋtən), from the O.E. diphthongised type (not found, however, among the early forms) **Daulington*.

For the second element see *tūn* in Pt II.

- 1383 Denne, Cal. Inq. P.M. vol. iii. p. 57.
- 1437 Dene, Cal. Rot. Ch. p. 214.

Simply O.E. *dene*, dative of *denu*, a "dean," "valley."

The 1274 and 1383 *Denne* above is probably due to the influence of the unstressed form (which was often thus written) or to the O.E. *denn*, a "den," "lustrum fearum." See Wyld's remarks under *denu* and *denn* in *Lancs. Pl.-Ns.*, Pt II.

Denne Hill.

- 1274 Denne, H.R. ii. p. 207.

This is probably the O.E. *denn* referred to in the last name. See Pt II.

Of the Hunts. *Denton* Skeat remarks (Hunts. Pl.-Ns.), "the prefix may represent either O.E. *denu*, 'a valley,' or the gen. plu. *Dena* 'of the Danes,' of which the plu. nom. was *dene*." The C.D. forms above make it probable that the Sussex name contained O.E. *denu* as its first element.

Does this mean "the ditcher's," i.e. "the ditcher's place" or "hut"? This is the only definition in E.D.D. for *dicker* which would suit this name. The O.E. word for a "digger" or "ditcher" was *dicere* (cit. B.-T. from Ælfric's Gr. and Gloss).

 1439 Dychenyng, Cal. Inq. P.M. vol. iv. p. 198.
 1486 Dyckening, ibid. p. 379.

Is it possible that this name meant "place of the dwellers near the ditch"? < O.E. **dīcel-* or *diccel-*, a diminutive of *dīc*, "a ditch"? But there is no evidence of (*ditʃl) or (*dikl) in the modern dialects.

The spellings in Type II are considered by Zachrisson to be due to Norman-French interchange between *-l-* and *-n-*. (A.-N. Influence, p. 140.)

Donnington.

temp. Edw. I Donnynton, Cust. B. Abbey, p. 5.

Possibly O.E. *Dunnantūn*, "the 'tūn' of Dunna," cf. Searle. (*doniŋtən*) is merely a modern spelling-pronunciation.

Duddleswell.

1305, 1309 Dodewell, Cal. Inq. P.M. vol. i. pp. 207, 237.

1315 Dodeswelle, *ibid.* p. 275.

O.E. *Duddeleswell*. Searle gives *Duddel* as a witness to a charter, Cart. Sax. No. 426, and C.D. No. 256 (anno 824). Cf. *Didling* above for *Dyddel*, the mutated type of the name.

Dumpford.*Type I.*

1418 Dempford, *ibid.* iv. p. 38.

1428 Demford, F.A. v. p. 156.

It seems that the first element is a pers. n., but I can find no evidence of one to fit the above types.

There is no **Dem-*, **Dum-* or **Dymm-* recorded by Searle. On the other hand, S. gives authority for the name *Dynne* in eight instances. But for Type I above, this name might fit the mod. *Dumpford*, and would also explain the forms under Type II (Kt. *e* for *y* < (u + i)). But this is unsatisfactory. The second element is O.E. *ford*, q.v. Pt II.

The "tūn" of *Dun(n)eca*. The first element is a diminutive of the O.E. *Dunn* or *Dunna*, both of which are recorded by Searle. He further quotes the form *Dunnic* as occurring once. Note that the ancestor of this name is late O.E. *Dun(n)ecatūn*,

where the first element has lost its genitive suffix. See *Dunkenhalgh* in Wyld, Lancs. Pl.-Ns.

Durrington.

1085 Derentune, D.B. i. 28 b (bis).

The D.B. form above has the Kentish type of the vowel (O.E. $y < u + i$), while the modern form is derived from the southern type.

O.E. *earnalēāh*. The O.E. *earn* meant "an eagle," but it may also have been a pers. n., as was *Hafoc*. Note that O.E. *Earnleie* in a charter dated 994 develops into *Arley* in Worcs. (see Duignan under *Arley Kings* in Worcs. Pl.-Ns.), and that O.E. *Earnanford* > *Arnford* (Moorman, W. Rid. Pl.-Ns.). The *Ern-* forms are probably southern.

 1411-2 Esbourne, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 137.

The first element is probably O.E. *Esan*; M.E. *Ēse(n)*-, the genitive singular of the pers. n. *Esa*, for which see Searle, p. 235. Cf. also *Easington* and *Easingwold* in Yorkshire.

Eastbourne.

The name was originally simply O.E. *burna*, "brook," the qualifying *East*- being added in the early M.E. period. There is also a *Westbourne* in Sussex. See O.E. *burna* in Pt II.

Eastdean.

1411-2 Echynghame, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 143.

1437 Echingham, Cal. Rot. Ch. p. 214.

From the evidence of the *-inge-*, *-ynge-* spellings above this name would seem to be O.E. *Eccinghām*, "the homestead of the Eccings." Searle records several examples of O.E. *Ecca* (which I take to be *Ecca*, with the double front stop). Duignan explains the Worcs. *Eckington* thus, but see *Eckington* below.

Eckington.

- 1085 1 Echentone, D.B. i. 19 a. }
 2 Achintone, D.B. i. 22 a. }
 3 Achiltone, D.B. i. 22 a. }

1325 Eghynton, Cal. Inq. P.M. vol. i. p. 324.

From the 1325 form above, it is probable that the back-stop (k) existed in this name in the O.E. period. *Achintone* and *Achiltone* (Nos. 2 and 3 above) are due to Norman-French interchange of *-l* and *-n* in the unstressed syllable (cf. Zachrisson, A.-N. Influence, p. 141).

Moreover the D.B. forms point to a long vowel, either \bar{e} , or $\bar{e}\bar{a}$ in O.E. There is a pers. n. *Eacca* in Cart. Sax. No. 519, but the quantity of the *ea* is doubtful.

Possibly the first element is O.E. $*\bar{e}cen$, "oaken," a form not given in the dictionaries, but which may have existed in popular speech. I take this $*\bar{e}cen$ to be a mutated form of the adjective $\bar{a}cen$ (i.e. $\bar{e}cen < *\bar{a}cinn-$), with restoration of the back-stop through the influence of $\bar{a}c$.

Thus O.E. $*\bar{e}cent\bar{u}n > M.E. (*\bar{e}kintun)$. On the shortening of the first syllable see Phonology above. Cf. also *Oakendean* below.

Edburton.

 1633-4 Edberton, Vist. Ssx. p. 64.

O.E. $\bar{E}adburgt\bar{u}n$, "the 'tūn' of $\bar{E}adburg$." All O.E. names in *-burg* are feminine. *Eadburg* occurs in O.E. in an Essex pl.-n. (D.B. *Edburgetun*, 46 b, 73 b). See Alexander, Oxf. Pl.-Ns., under *Adderbury*, and Wyld, Lancs. Pl.-Ns., under *Abram*.

Egdean.

Type I (-dene).

- 1278 Egedene, Plac. de quo War. p. 757.
 1539 Eggdean, Ind. Ch. and Rolls, p. 252.

Type II (-dūne).

- 1279 Egedon, Cal. Rot. Ch. p. 109.

The first element is probably O.E. *Ecg-*, a familiar form of one of the numerous names in *Ecg-*, such as *Ecgbald*, *Ecgeberht*, *Ecgheard*, etc., of which Searle gives copious examples.

The *-ĕg-* was unfronted to *g* in late O.E. before the following *-d*. The second element was originally O.E. *denu*, "a valley," but it has been confused with O.E. *dūne*, "down," "hill." Cf. *Findon* and *Playden* below, and O.E. *dene* and *dūne* in Pt II.

Or the first element may be O.E. *ecg*, "hill-side," "hill." If so the sense is "the valley by the hill-side." But the explanation above is just as likely.

Type III.

1411-2 Ellistede, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 133.

O.E. *Ælfwinesstede*, "the 'stead,' 'place' of *Ælfwine*," a well-known O.E. pers. n. Type I above represents the M.E. form of *Ælfwinesstede*, while Type II appears to stand for O.E. *Ælfesstede*, where *Ælf* is a short form of the full name, like the modern *Alf* for *Alfred*, *Will* for *William*, etc. Very often we find pl.-ns. containing these short forms of O.E. names, while the earliest records write the full name. On this point see Wyld, Lancs. Pl.-Ns., under *Ainsdale* and *Ainsworth*.

It is interesting to note that this name preserves the late Kt. or southern vowel *e* for pr. O.E. *æ* in the old forms as well as in the modern.

Type III appears to be a later development of Type II, through the simplifying of the consonant-group *-lvt-* to *-lst-*, and is the immediate precursor of the modern (elsted).

Eridge Green.

1349 Erugg, *ibid.* ii. p. 160.

Skeat, Cambs. Pl.-Ns., derives *Earith* from O.E. **ēarhȳþ*, where *ēār* is used in the sense of "earth," "soil." He refers to the Scand. cognates, O.Norse (Icel.) *aurr*, "wet clay," "slime," "mud"; Danish *ør*, "gravel," and Swedish Dial. *ör*, "a sandy shore." See B.-T.

The second element is O.E. *hrycg*, the spelling *Erysshe* above is probably a scribal error. O.E. *-ċġ-* can hardly develop phonetically into M.E. *-sh-*.

1378 Uhurst, *ibid.* iii. p. 17.

1411-2 Ewherst, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 139.

The first element is O.E. *īw*, *ēōw*, "a yew tree," the second O.E. *hyrst* (q.v. Pt II). Zachrisson (A.-N. Influence, p. 66 note) explains the 1073 *Luechest* simply as = *iuehest*, with (French) orthographical confusion between *i* and *l*.

Fairlight.

 1316 Farlegh, Cal. Rot. Ch. p. 150.
 1320 Farleye, Cal. Inq. ad quod D. p. 263.
 1535-43 Fareley, Leland's Itinerary, iii. p. 113 (the editor identifies *Fairlight* with a query).
 1592 Farlighe, Ind. Ch. and Rolls, p. 272.
 1695 Fairleigh, Map of Ssx., Camden's Britannia, p. 164.

The absence of M.E. *-ai-*, *-ay-* spellings makes O.E. *fæger* as the first element unlikely. I suggest an O.E. pers. n. in *Fær-*, of which Searle gives numerous examples: *Færþegn*, *Færwulf*, *Færwine*, etc. Cf. also *Færscaga*, C.D. No. 658 (= Fairshaw, Hants.), *Færden*, No. 187. The modern *Fairlight* must be due to popular etymology, both as regards the first and second elements.

The second element was originally O.E. *lēage* (dative) > M.E. *lēghe*, *līghe* > *ly*, *ley*, pronounced in Sussex till quite recently (lai). Possibly this (lai) was increased to (lait) to make the name mean something.

Falmer.

- 1085 1 Falemere H., D.B. i. 16 b, 26 a. }
 2 Falemere, D.B. i. 26 a, b. }
 3 Felesmere, D.B. i. 22 b. }
 1107-18 Fallemella, Anc. Ch. Pipe Rolls, vol. x. No. 5, p. 6.
 1278 Falemere, Plac. de quo War. p. 750.
 1283 Falemere, Cal. Inq. P.M. vol. iv. p. 426.
 1316 Falemere, F.A. v. p. 135.

Zachrisson explains the Anc. Ch. form *Fallemella* above as due to Norman-French assimilation of *l—r* > *l—l* (p. 122, § 4 b).

The first element may be O.E. *fealu* (dat. *fealwe*), "fallow," the second either *mere*, "a lake," or *gemæru*, "a boundary." The *-es* in the D.B. No. 3 form *Felesmere* above may point to a pers. n., but I can find no authority for such a name as **Fæle*, **Fala*.

The O.E. dative *fealwe* persists to-day in the Lancs. *Fallow-field*.

and 1328 Fulkyng, *ibid.* p. 160.

1404 Folking, Cal. Inq. P.M. vol. iii. p. 300.

1439 Folking, *ibid.* iv. p. 198.

The first element is an O.E. pers. n. **Folc(a)*, a shortened form of one of the numerous names like *Folchere*, *Folcwine*, etc., for which Searle gives nearly three columns of instances. He also cites forms in *Fulk-*, and Ellis (Introd. to D.B.) gives numerous names in *Fulc-*, i.e. in vol. ii. pp. 114-15 (Index of persons holding land before the Survey). This *Fulc-* is a variant of *Folc-* (i.e. *Fulc* < Gmc. **Fulk-(u)*; **Folc* < Gmc. *Fulk-a(o)*). The *-ing* may be patronymic, or it may be O.E. *ing*, *incg* ("water-meadow," q.v. Pt II).

Felpham (felfm, E).

880-5 Felhhamme, C.D. ii. p. 115.

953 Felhham, C.D. ii. p. 303.

1085 Falcheham, D.B. i. 17 b.

1428 Felgham, F.A. v. p. 154.

1695 Felpham, Map of Ssx., Camden's Britt. p. 164.

Whatever the first element, it is obvious that the modern *-ph-* = *-f-* goes back to an O.E. back-open-voiceless. The only *fealh*, *fælh* given in the dicts. means "a felly of a wheel" or "a harrow," neither of which will suit. Nor can I adduce any evidence for such a pers. n. as **Felth*, **Fælh*. For *-h-* > *-h^w-* > *-f-*, cf. *Burpham* above. The second element was probably originally O.E. *hamm*, "enclosure," "land enclosed in a river-bend," which was levelled with O.E. *hām* in M.E.

Fernhurst.

1331 Farnhurst, Cal. Inq. P.M. vol. ii. p. 39.

O.E. *fearnhyrst*, "fern wood." Cf. *Fearnleage* (Thorpe, *Diplomatarium*, p. 146, anno 900), *Farncombe* in Somers. and see Wyld's remarks, *Lancs. Pl.-Ns.*, under *Farnworth*; Skeat, *Beds. Pl.-Ns.*, under *Farndish*; Duignan, *Warw. Pl.-Ns.*, under *Farnborough*.

- 13th c. Feringes, Exch. Red Bk. vol. ii. p. 199.
- 1274 Fering, Ferynges, H.R. ii. p. 213.

I cannot make much of this name. Possibly the first element is O.E. *Fær-*, a shortened form of *Færbeorht*, *Færgrim*, etc., for which see *Fairlight* above, but the spellings in *Ferr-* above do not favour this suggestion. Another possibility is O.E., M.E. *ferre*, "further." In this case the name would mean "the further meadow," i.e. "one further off than a given point or landmark."

- 1394 Fyndon, Cal. Inq. P.M. vol. iii. p. 185.

Type II (-dene).

- 1280 Findene, Cal. Rot. Ch. p. 109.

The first element is a pers. n., O.E. *Finn*, for which Searle gives good authority. A *Finn* is mentioned in the A.-S. Chron. anno 855. Type I is O.E. *Finndūne*, and the ancestor of the modern form, as spelt.

Type II shows substitution of O.E. *-dene* for *-dūne* in the unstressed position. Cf. *Playden* below.

 1406 Firle, Cal. Inq. P.M. vol. iii. p. 309.
 1439 Fyrles, *ibid.* iv. p. 198.

Is this O.E. **fȳrel* < **furhil*, a diminutive of *furh*, "a furrow"? This **fȳrel* is not recorded in the O.E. dicts., but it would be just as normally developed from a W. Gmc. **furhilo* (Idg. **pr̥kwilo*; cf. Lat. *quercus*) as O.E. *fyrhþe* is from Gmc. **furhiþo*. (See Wyld, *Lancs. Pl.-Ns.*, Pt II, pp. 328-9.) If we accept this hypothetical **fȳrel*, the above spellings in *Fer-* and *Fir-* can be explained, and so can the mod. pronunciation (farəl), from the O.E. W.S. type.

 1440 Fishborne, *ibid.* p. 200.

O.E. *fiscburna*, "a brook where fish were plentiful." Or the first element may be a pers. n. *Fisc*. See *Fishwick* in Wyld, *Lancs. Pl.-Ns.*, and O.E. *fisc* and *burna* in Pt II.

Fishergate.

 1361 Fissheresgat, Cal. Inq. P.M. vol. ii. p. 239.
 1486 Fishergate, *ibid.* iv. p. 379.

O.E. *fisceresgeat*, "the fisher's gate," or rather *fisceresgatu* or *-gatum*, with the second element in the nominative or dative plural. O.E. *geat* would develop into *-it*, *-yet*, or *-ett* as in *Ditchett*, Devon. Cf. *Polegate*, near East Dean.

1438 Fetilworth, Cal. Inq. P.M. vol. iv. p. 187.

1488 Fitelworthe, *ibid.* p. 389.

O.E. **Fitelanweorþ*, "the enclosure of Fitela."

Fitela is mentioned in *Beowulf* as the son of *Sigemund*, and Searle gives examples of the name in O.E. charters. Note the loss of the genitive *-an-* in M.E.; O.E. **Fitelanweorþ* might also give modern (fitliŋwəp).

1409 Flescinge, Cal. Rot. Ch. p. 213.

1450 Fleccynge, Cal. Inq. P.M. vol. iv. p. 247.

The above forms present some curious (Norman-French) attempts to express (tʃ) (< O.E. *č*?). It is written in no less than eight different ways, of which *-sc-*, *-ts-*, *-ss-*, *-gg-*, *-t-* are probably Norman. Only the English type has survived in the modern *Fletching* (fletʃɪŋ).

I can find no satisfactory explanation of the name, if it be really English. If it is French, the only word which would suit the first element is O.Fr. *fleche* (mod. "flèche"), "an arrow," possibly in connexion with a battlefield. Duignan, Warw. Pl.-Ns., suggests O.E. *flæx* for the first element of *Flehamsted* (D.B. *Flehamstude*), but the variety of the spellings above makes this doubtful for the Sussex name.

Folkington.

- 1411-2 Fokyington, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 141.

The first element may be the same O.E. **Folca* discussed under *Faulking* above. The absence of an *-l-* in the majority of the above forms is noteworthy. See O.E. *tūn* in Pt II. Searle gives *Focco* as a "nomen viri" from Piper, but there is no evidence of a **Focce* or **Focca* in O.E.

- 1366 Fremfeld, Malling Surv., Ssx. Arch. Soc. xxi. p. 161.
- temp. Hen. VI Fremefeud, Tax. Eccl. p. 138.

The first element is probably a pers. n. in *Fram*-. Searle gives *Fram* from Grueber, also *Frambeald*, *Frambolt*, and *Franpalt*. The spellings in *Frem*- above are probably descended from an O.E. mutated form **Freme*, not recorded by Searle.

Friston.

Type I.

- 1294 Fristone, Cal. Rot. Ch. p. 126.
 1317 Frystone, Cal. Inq. ad quod D. p. 254.
 1328 Friston, Cal. Rot. Ch. p. 159.

Type II.

- 1288 Freston, Cal. Inq. P.M. vol. i. p. 100.

The first element may be O.E. *friþ*, *fyrhþe*, "forest land," used in the genitive (see this element in Wyld, Lancs. Pl.-Ns., Pt II; no connexion with O.E. *friþ*, "peace"). But more probably the first element is O.E. *Fripes*-, the genitive singular of a pers. n. such as *Fripubeald*, *Fripstan*, or *Fripustan*. Searle gives five columns of names beginning with O.E. *Fripu*-.
 The development to mod. *Friston* is normal; O.E. **Fripestūn* > *Friðestun* > M.E. *Friðstun* < by loss of (ð); M.E. mod. *Friston*.

[There is an O.E. pl.-n. *Friðesleah* in C.D. No. 187, which Kemble identifies as mod. *Friesley* in Kent. This name seems to contain the O.E. pers. n. *Friþ*- discussed above.]

 temp. Hen. VI Funtitone, Tax. Eccl. p. 136.

Type II (-dūn).

- 1330 Fontyngdon, Cal. Inq. P.M. vol. ii. p. 37.

The second element was originally O.E. *tūn* as in the modern name, but in Type II above it has been confused with O.E. *dūn*, "hill."

Furnace.

1306 Furneysllond, Cust. B. Abbey, p. 18.

M.E. *furnace*, *furneis* < Fr. *forneys*, *forneise* < Lat. *fornācem* (acc.) = "furnace," "fire." The second element, O.E. *land*, has been lost in the mod. name.

Glynde (glaind).

1369 Glinde, Cal. Inq. P.M. vol. ii. p. 299.

1411-2 Glynde, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 143.

1418 Glynde, Cal. Inq. P.M. vol. iv. p. 34.

1544 Glynde, Malling Surv., Ssx. Arch. Soc. xxi. p. 169.

This is probably a Celtic word. Skeat, Etym. Dict., cites as cognates of *glen* Gael. and Ir. *gleann*, Welsh *glyn*, "valley," "glen." Dr Imelmann, of the University of Bonn, suggests that the word was brought by the English from their continental home in the form **glind*, where the final *-d* is due to some popular etymology. But for the 1274 form above one might assume that the *-d* was added in late M.E. times, but this would not account for the modern (glaind), nor is the date of the addition of the *-d* definitely determined. See N.E.D. under *astound*, *pound*, *laund*, *sound*; also Horn, Hist. Gr. p. 150; Jespersen, N. E. Gr. pp. 218-9.

Goodwood (gudæd, gudwud).

1252 Godynewod, Cal. Rot. Ch. p. 81.

1379 Godmewude, *ibid.* p. 210.

The first element is probably the well-known O.E. pers. n. *Gōdwine*. The 1252 form above shows the normal development of O.E. *Gōdwine* to M.E. *Gōdyne*, *Gōdine*. The 1379 form *Godmewude* is due to assimilation of the *n* of *God(i)ne* to *m* before the following lip-cons. The second element is O.E. *wudu* (q.v. Pt II). For loss of medial syllable see Phonology above.

- 1306 Guldeford, Abbr. Plac. p. 260.
- 1511 New Guldeford }
 1546 East Guldeford } Ind. Ch. and Rolls, p. 317.

The first element is probably an O.E. pers. n. **Gylða* (< Gmc. **guldja*), but I can find no authority for such a name. Names in O.E. *Gold-*, such as *Goldwine*, etc., are common; cf. the modern *Gould*.

If we assume O.E. **Gyldanford*, Type I (gilfæd) is from the M.E. Midland type, Type II (gal(d)fæd) from the Saxon type. See O.E. *ford* in Pt II.

Hadlow Down.

1253 Hadlegh, Cal. Rot. Ch. p. 83.

1409 Hadleg, *ibid.* p. 213. (Cf. *Hæðlēah* in C.D. No. 685 = *Hadleigh*, Essex.)

Possibly O.E. *hæðlēah* > M.E. *hæðlei* > *hadlei*, by stopping of ð to *d* before *l* or *r*. Cf. O.E. *byrðen* > *burden*; O.E. *morðor* > *murder*; O.E. *sul(h)þorn* > *Souldern* (Alexander, Oxf. Pl.-Ns., sub. nom.).

The first element might also be an O.E. pers. n. *Hadd* (cf. Cart. Sax. Nos. 677, 702; C.D. Nos. 353, 364), but here we should expect a medial *-es-* in M.E., although the genitive suffix was often dropped, especially after names in *-here*.

Note the change of the second element from *-ley* (O.E. *lēah*) to *-low* (O.E. *hlā(w)*).

Hailsham.

1378 Hailesham, J. of G.'s Reg. i. p. 30.

1487 Haylesham, Cal. Inq. P.M. vol. iv. p. 387.

Probably O.E. **Æg(e)leshām*, "the homestead of *Ægel*." Searle, *Onomasticon*, p. 5, says that *Ægel-* is a late form of *Æpel-* which first appears on coins of *Æpelred* II (978-1017). The *H-* is a Norman-French addition, and has survived till the present day.

Zachrisson (A.-N. Influence, pp. 101-6) attempts to prove that the change of *Æpel-* to *Ægel-* is a sound-change, and is due to the influence of N.-Fr. On the other hand, names like *Ægelbriht*, *Agilbert*, *Agilberct* are found quite early (cf. *Agilberct*, Eccl. Hist. iii. 7; *egilmund* in Lib. Vitæ (O.E.T.), p. 157, etc.). I consider that the late forms in *Ægel-* are merely substitutions of this (early English) element for *Æpel-*, and are not due to sound-change. In support of this are the many continental

names in *Agil-* (O.E. *Ægel-*) and *Adhal-*, *Adhil-* (O.E. *Æpel-*), two separate and distinct elements. Förstemann (Altd. Nbch.) gives 10 columns (27-36) of *Agil-* in continental names, and 25 (158-182) of *Adhal-*, *Adhil-*.

For the second element see O.E. *hām* in Pt II.

Halnaker.

 Halfnakedede }
 1337 Halnaked, *ibid.* ii. p. 78.
 1346 Halvnaked, *ibid.* ii. p. 136.

The first element may be a pers. n. **Hala-*, a short form of such names as *Halmund*, *Halweard*, for which Searle gives authority (p. 279), or just as probably it may be O.E. *hālga*, "a saint," although the D.B. form has no -g.

If so, O.E. **hālganæcer*, "the saint's land" > L. M.E. **hāl(3)-naker* > *halnaker*. The spellings in -nn- in Type I above are due to assimilation of the *l* and the *n*; cf. Pr. Gmc. **fulla* < Idg. **pln-* for the opposite assimilation of -ln- to -ll-.

The forms in Type II above show a curious popular etymology.

See O.E. *æcer* in Pt II.

 1375 Hammes, *ibid.* p. 349.

O.E. *hamm*, either (1) "an enclosure," "dwelling," or (2) "a bend of a river." See this element in Pt II.

Hampden Park.

- 1274 Hamden, H.R. ii. p. 216.

Probably O.E. **hāmdenu*, "valley where the homestead or estate stood." Or possibly the first element may be O.E. *hamm* (2), "bend in a river." The early form does not justify the reconstruction of the O.E. *æt þære hēān dene. See *Little-hampton* below.

Hamsey.

- 1321 Hammes Say, Cal. Inq. P.M. vol. i. p. 299.

Either O.E. *hammes ēā*, "stream bordering the enclosure" (*hamm* (1)), or *hammes ēg* (*hamm* (2)), "island or marshy land in the bend of a river."

See in Pt II *hamm* (1) and (2), and *-ey* (1), (2) and (3).

Hangleton.

- 1085 Hangetone, D.B. i. 26 b.
 1107-18 Hangel tuna, Anc. Ch. Pipe Rolls, vol. x. No. 4, p. 5.
 1278 Hangelton, Plac. de quo War. p. 750.
 1296 Hangelton, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 302.
 About 1320 Hangelton, T. de N. p. 222, § 63 (bis).
 1327 Hangleton, Cal. Rot. Ch. p. 158.
 1339 Hangelton, Cal. Inq. P.M. vol. ii. p. 90.

I can find no authority for an O.E. pers. n. **Hangel*. Possibly the initial *H-* in the above forms is due to Norman scribes, and the first element is really a pers. n. in *Angel-*, such as *Angelpeow*,

which is mentioned in the A.-S. Chron. annis 626 and 755. Förstemann also in the Altdeutsches Namenbuch gives numerous examples of *Angil-* (107-19), also of *Engel-* and *Ingel-* (loc. cit.).

But this is rather unsatisfactory, since forms in *H-* are the rule, and no forms are found without it. The second element is O.E. *tūn* (q.v. Pt II).

Hankham.

1085 Henechā, D.B. i. 22 a (bis).

This name probably contains the O.E. pers. n. *Haneca*, which is found in an O.E. pl.-n. *Hanecanhām* in Cart. Sax. Nos. 821, 822 and C.D. No. 416.

Haneca is a diminutive of *Hana*, just as *Dun(n)eca* is a diminutive of *Dunn*, *Dunna*. See *Dunton* above. For the second element see *hām* in Pt II.

Harbreating.

1085 herbertinges, D.B. i. 26 a.

1121 herbertinges, Anc. Ch. Pipe Rolls, vol. x. No. 8, p. 12.

The above forms point to O.E. *Herebeorhtingas*, a patronymic from *Herebeorht*, a well-authenticated name in O.E. (modern *Herbert*). A late O.E. variant *Herebrehtingas* would give a modern pronunciation (hābritɪŋ), and would account for the spelling of the modern name.

Hardham.

1618 Hardham, Cal. Inq. P.M. vol. iv. p. 482.

Probably O.E. *heordhām*, "herd-enclosure." Or the first element may be O.E. (non-W.S.) *heorde*, "a shepherd, pastor" (W.S. *hirde*, non-W.S. *heorde*, both < W.Gmc. **hirdja*). See O.E. *heordwīc* in Wyld, Lancs. Pl.-Ns., Pt II.

Type II (-fold).

- 1315 Hertfold, Cal. Inq. ad quod D. p. 246.

O.E. *heorot feld*. O.E. *heorot* is found also as a first element in *Hertford* (= hātfæd) which is (æt) *Heorot forda* in A.-S. Chron. Parker MS. anno 913.

In the Sussex name *Type II* shows O.E. *-fald* as a second element.

O.E. *Hæstingas*, "sons of Hæsten." *Hæsten* is mentioned as a Danish chief in A.-S. Chron. MS. A, annis 893, 894. Searle also quotes *Hæsten*, *Hasten* as a "nomen viri" from Ellis, Index to D.B. B, and *Hæsten*, *Hastin* (anno 1019) from C.D. No. 730, which refers to Dorset. For the *-ing* see *Goring* above.

Hazelwood.

- temp. Edw. I Robertus de Heselholt, Cust. B. Abbey, p. 41.

 1432 Haselhelte, Cal. Inq. P.M. vol. iv. p. 151.

If the above forms really represent *Hazelwood*, the second element has changed from O.E. *holt*, M.E. *holt* to O.E. *wudu*, M.E. *wude*, *woode*, which meant the same thing, namely, "a wood," "copse," "thicket." *Holt wudu* was a common compound in O.E. poetry.

The first element is O.E. *hæsel*, "hazel," a common element in Engl. pl.-ns. Cf. *Hæslwic*, C.D. v. p. 313, *Hæseholt*, C.D. v. p. 243. See *Haselhurst* in Wyld, Lancs. Pl.-Ns., and *Haslewood* in Moorman, W. Rid. Pl.-Ns.

Heathfield (hæfəl).

Type I.

- 1274 La Hethfeld, H.R. ii. p. 212.
 1315 Hethfylde, Cal. Rot. Ch. p. 148.

 1377 Hethfelde, Cal. Inq. P.M. vol. ii. p. 339.

Type II.

1312 Hethingfeld, Cal. Inq. P.M. vol. i. p. 252.

1448-54 Hethingfeld, Cal. Inq. ad quod D. p. 388.

The modern name is descended from Type I, O.E. *hæþfeld*. Type II seems to contain O.E. *hæþen*, "a heathen," or the adj. form of *hæþ* with suffix *-en*, as its first element. Had it survived, it would have produced a modern (*hīðingfild*) or (*heðingfild*). See O.E. *hæþ* and *feld* in Pt II.

Heathfield in Yorks. is explained by Moorman as O.E. *Hildegāresfeld*.

Heene.

1432 Heen, Cal. Inq. P.M. vol. iv. p. 151.

1448 Hyen, *ibid.* p. 238.

All the above spellings point to a M.E. tense *ē*. I assume an O.E. **hēna*, which is connected with the common *hōh*.

Just as O.E. *hēla*, "heel," < **hōh-ila*, with the suffix *-ila*, so might there be another diminutive **hēna* < **hōh-ina*, with the suffix *-ina*. But this word is not recorded in the dicts., nor can I find any Norse cognate. The reconstruction is tempting.

3. 1438 Heighton, *ibid.* iv. p. 193.

O.E. *hēh tūn*, "the high town." Type I is O.E. *hēhtūn* > M.E. *hēhtun* > M.E. *hettun*, as found in T. de N. (Type I, No. 6 above), and, had it survived, would have produced a modern (**hetn*).

Type II is O.E. *hēhtūn* > M.E. (early) *hēh tūn* (with long *ē* through the influence of the independent word *hēh*) > later M.E. *heihtun*, with diphthongising before the front (*h*). This M.E. *heihtun*, with subsequent loss of (*h*) (written *gh* above), is the ancestor of the modern (*heitn*).

- 1309 Hillyngleghe, *ibid.* p. 235.
- 1377 Hilyngeleghe, *ibid.* ii. p. 362.

Skeat, Cambs. Pl.-Ns., p. 57, connects *Hilgay* with a tribal name in *-ing*, represented by *Hellingly* in Sussex. But there is no evidence in O.E. for the existence of such a tribe. It is possible that *Helling-* (Type I) and *Hilling-* (Type II) < O.E. **hylling*, "hill-dweller." The suffix *-ing* frequently had the sense of "dwellers in or among" (Skeat, Berks. Pl.-Ns., under *-ing*). O.E. **hyllinga lēah*, "hill-dwellers' meadow," would give a modern *Hellingly* (Kt. *e* for *y* < *u* + *i*).

See O.E. *lēah* in Pt II.

 1324 Henfeld, Cal. Inq. P.M. vol. i. p. 318.
 1633-4 Enffeild, Vist. Ssx. p. 29.

The presence of the *-e-* in the first element of Type I, annis 770 and 1377 above, excludes the tempting derivation from *æt þēm hēān felde* (thus Duignan for the Worcs. *Hanley*) and favours O.E. **hananfeld*, "cock's field," as the prototype of this name. Type II, the ancestor of the modern name, shows alteration of the first element from O.E. *hana* to O.E. *hen*, *henna*, "a fowl," "hen."

Type II (Hurst-).

- 1378 Hurstmonceux, Cal. Inq. P.M. vol. iii. p. 12.
 1440 Hurst Monceux, Cal. Rot. Ch. p. 220.

The "hurst" or "wood" of *Monceux*, a Norman-French family n., originally meaning "at the mound" (Lat. *monticulum*). The name *Joh'es de Monceux* appears above the entry for 1316 in the Cal. Inq. P.M. vol. i. p. 280.

Hope (Dial. Pl.-Nomenclature, p. 126) gives the pronunciation of this name as *Harmouncy*, *Hossmouncies*, and *Hurstmounceys*, by which he probably means (*hāmaunsi*), (*hosmaunsiz*), and (*hāstmaunsiz*). The first of these is normally descended from the Kt. type (I) above, the third from the Saxon type (II); (*hosmaunsiz*) I cannot account for phonetically.

1428 Heyshete, F.A. v. p. 156.

1538 Heyshott, Ind. Ch. and Rolls, p. 364.

The first element is O.E. (*ge*)*hæge*, "fenced-in land," "paddock," "enclosure," and the second O.E. *scēāt*, "a corner," "angle," or "nook." O.E. *scēāt* appears as the second element of the Berks. *Bagshot*, on which see Skeat, Berks. Pl.-Ns., p. 87.

See O.E. *gehæge* and O.E. *scēāt* in Pt II.

Hickstead.

1633-4 Hicksted, Vist. Ssx. p. 40.

There is an O.E. pers. n. *Hicca* which is found in a pl.-n. *Hiccan þorn*, Cart. Sax. No. 1143, C.D. No. 1252. This may be the first element of the Ssx. *Hickstead*; O.E. *Hiccanstede* > late O.E. *Hiccastede* > (*hikstēd*), but the form given above is very late.

For the second element see O.E. *stede* in Pt II.

Higham, alias Iham.

1303 Iham
1346 Ihamme
1731 Higham alias Igham manor } Ind. Ch. and Rolls, p. 365.

Probably O.E. **iēghamm* (*iēg* the W.S. form; non-W.S. *ēg*), "the enclosure round the marshy ground." If so, the *High*-, which does not appear before the 18th cent., is the result of popular etymology, the deliberate substitution of the common word *high*- for the unfamiliar first element.

See *Ifield* and *Iford* below.

Highden.

1203 Hiden, Abbr. Plac. p. 45.

1316 Hydiny, Cal. Inq. ad quod D. p. 253.

1361 Hiden, Cal. Inq. P.M. vol. ii. p. 240.

The spelling *Hi*- in 1203 cannot represent O.E. *hēāh*. It may stand for O.E. *Hyge*-, a familiar form of one of the many names like *Hygebeald*, *Hygebeorht*, *Hygemær*, *Hygewine*, etc., for which Searle gives good authority (p. 311).

An O.E. **Hygedenu*, "Hyge's valley" > late O.E. **Higedene* (unrounding of *y*) > by loss of *ġ* and compensatory lengthening *Hiden* > (*haidn*). The spelling of the modern name has been influenced by the common word *high*, which was doubtless felt to be the first element.

Hoathly.

1278 Hodlegh, Plac. de quo War. p. 750.

1289 Hodlegh, Cal. Inq. P.M. vol. i. p. 102.

1407 Hotheleth, *ibid.* iii. p. 317.

1408 Hothelech, Cal. Inq. ad quod D. p. 359.

1633-4 Hotheyley, Vist. Ssx. p. 30.

The first element may be O.E. *hāþ*, an unmutated form of *hēþ*, not however recorded in B.-T. Cf. *gemāre* side by side with *gemæru*. *Gemāre* is also not recorded, although it exists (in the form *imāre*) in *Ælfwines imāre* (anno 1001), C.D. iii. p. 321. Cf. *Hadlow Down* above. The 1407 form *Hotheleth* is probably a scribal error, although *-leth* may be a Mercian form of O.E. *hlip*, "slope." For the interchange of *hlip* and *lēāh* in the second element see Wyld, Lancs. Pl.-Ns., under *Adgarley*.

1390 Holyngton, *ibid.* iii. p. 131.

1442, 1452 Holyngton, *ibid.* iv. pp. 215, 254.

O.E. *holentūn*, *holegntūn*. O.E. *holen*, *holegn*, "holly," is found in an O.E. pl.-n. *Holenhyrst*, C.D. ii. p. 228 (cit. Wyld, Lancs. Pl.-Ns., under O.E. *holen* in Pt II). See Wyld's remarks, loc. cit., and under *Hollingworth* in Lancs. Pl.-Ns., p. 156.

The 1284 *Holindale* above is interesting as the only example I have found of the suffix *-dale* in Sussex, although it is common in the North and Midlands. This lends colour to the supposition that *-dale* in pl.-ns. is the Scand. *dalr* more probably than the O.E. *dæl*.

***Holmestrowe.**

1085 Homestreu, D.B. i. 26 a.

1296 Holmestreuwe, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 296.

1411-2 Holmestrowe, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 132.

The first element can hardly be the O.Norse *hōlmr*, "an islet." It is more probably the O.E. **holm*, which Skeat finds in *Holmhurst Hill* (Herts.), a word meaning "holly" or "holm bush," connected with O.E. *holegn*, *holen*. E.D.D. gives the distribution of modern *holm* as Glouc., Ssx., Hants., Dors., Somers., Devon and Cornwall, entirely in the south. The second element is O.E. *trēowe*, dative of *trēō*, "tree."

Holmstead.

1312 Olmested, Cal. Inq. ad quod D. p. 233.

The first element is probably the same O.E. *holm* which is found in *Holmestrowe* above (q.v.). See O.E. *stede* in Pt II.

Hooe.

- 1085 Hou? D.B. i. 17 b, 18 a, 22 a (or Hove?).

 1411-2 Lady de Hoo, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
 p. 144.

O.E. *æt þæm hōe*, dative of *hōh*, "heel," "hill," "promontory." The modern pronunciation (*hū*) is the normal development of this O.E. dative. For other forms of *hōh* when used as a second element see *Piddinghoe* below.

The Hooke.

 1296 atte Hoke, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 301.
 1423 Hoke, Cal. Inq. P.M. vol. iv. p. 78.

O.E. *æt þæm hōce*. O.E. *hōc* (modern "hook") is used in pl.-ns. to denote (1) "bend or turning in a river, land enclosed by such a bend," (2) "a piece of land situated on a slope" (Wyld, Lancs. Pl.-Ns., Pt II, under O.E. *hōc*).

Horsey.

- 1085 Horselie, D.B. i. 22 a.
 1202 Horseie, Abbr. Plac. p. 35.
 1304 Horseye, Cal. Inq. P.M. vol. i. p. 204.
 1327 Horssye, *ibid.* ii. p. 20.
 1406 Horsye, *ibid.* iii. p. 310.
 1484 Horsey, *ibid.* iv. p. 421.

The first element may be O.E. *hors* (< **hros*), "a horse," or it may represent the pers. n. *Horsa*. The second element may be O.E. *ĕā*, "water," or O.E. *ĕg* (1) or (2), "island" or "water meadow." See these elements under *-ey* in Pt II. Note that the D.B. form shows O.E. *lēah* as the second element.

Horsham.

- 947 Horshám, C.D. v. p. 313.
 963 Horshám, C.D. vi. p. 67.

 1325 Horsham, Cal. Inq. P.M. vol. i. p. 325.
 1448-54 Horsham, Cal. Inq. ad quod D. p. 388.

The C.D. forms above point to O.E. *hors*, the name of the animal, as the first element. The diacritics of the second element in the first two forms make it fairly certain that O.E. *hām* was meant, and not O.E. *hamm*.

Horsted, Little.*Type I.*

- 1085 Horstede, D.B. i. 22 a, 22 b.

- 1361 Hirstede, Cal. Inq. P.M. vol. ii. p. 236.

Type III.

- 1278 Herstede, Plac. de quo War. p. 753.

Type I is the O.E. *hors stede* or *horsa stede*, "place for horses," and the ancestor of the modern form. Types II and III show confusion of the first element with O.E. *hyrst*, "a wood."

Horsted Keynes.

- 1294 Horstede Kaynes, Cal. Inq. P.M. vol. i. p. 125.
 1306 Horsted Kaynes, *ibid.* p. 225.

 1345 Horstedekeynes, Cal. Inq. P.M. vol. ii. p. 127.
 1388 Horstedekeynes, *ibid.* iii. p. 107.

The *Keynes* were a well-known Norman family residing in Sussex. E. V. Lucas in *Highways and Byways in Sussex*, p. 233, says that the name is "an anglicisation of N.-Fr. '*de Cahanges*,' a family which sent a representative to assist in the Norman Conquest." I have found in the Red Exch. Bk. 16th cent. *Kahaynges*, i. 65; *Chahaynges*, i. 72; 13th cent. *Kaynes*, ii. 554.

Houghton.

4. 1278 Houton, Plac. de quo War. p. 750.
5. 1411-2 Houghton, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 135.

Type II.

1. 1256 Hoton, Cal. Rot. Ch. p. 86.
2. 1273 Hoton, Cal. Inq. P.M. vol. i. p. 51.
3. 1278 Hotton, Plac. de quo War. pp. 753, 759.
4. 13th cent. Hottone, Red Exch. Bk. vol. ii. p. 556.

Type I, No. 2, *Hoghton* above, is evidently a later (M.E.) spelling, since O.E. *-h-* (back-open-voiceless) was not written *-gh-* so early as 957. The evidence points to O.E. *hōh*, "hill," "ridge," as the first element, and not O.E. *hōc* (q.v. under *The Hook* above). Most of the Engl. *Houghtons* have as their first element either O.E. *hōc* or a pers. n. *Hōc* (see, for instance, Wyld, *Lancs. Pl.-Ns.*, and Walker, *Derby. Pl.-Ns.*, under *Houghton*). The spelling *Hoctone* in No. 3, Type I above, tells us nothing, since M.E. *-ht-* was generally written thus by Norman scribes.

Houndean.

1316 Houndeden, Ind. Ch. and Rolls, p. 386.

O.E. *Hundandenu*, "the valley of Hunda," for which name see Searle. See O.E. *denu* in Pt II.

1296 Houve, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 294.

1306 Northehou, Cust. B. Abbey, p. 21.

O.E. *æt þēm hofe*, "at the hall." O.E. *hof* meant a "house," "dwelling" in the sense of a *large dwelling* such as a lord's abode. Cf. modern German *Hof*, "court," and also (especially in Westphalia) "a large farm."

How.

1085 How, D.B. i. 29 a.

M.E. (*at þe*) *hōȝe*, dative of *houh*, O.E. *hōh*. The *-w* in the D.B. form seems to prove that the voiced open *g* was lip-modified already in the O.E. period. For another dative of O.E. *hōh* cf. *Hooe* above and *Piddinghoe* below.

Hunston.

The second element is obviously O.E. *stān*, not O.E. *tūn*. The first is *Hun*, a well-authenticated O.E. pers. n. See Kemble, C.D. vol. vi. Index, and Searle, who gives several examples of *Hunbeald*, *Hunbeorht*, etc.

The "hurst" of Pierpoint, M.E. *Picrrepoint* or *Pierrepund*, a Norman-French personal name. See *Herstmonceaux* above.

On *Pierpoint*, Bardsley, Engl. and Welsh Surnames, p. 605, says "Local, 'of Pierrepoint,' from the castle of that name on the Sthn. borders of Picardy (Lower). The name is Latinized into 'de Petroponte.' *Godfrey de Perpont* occurs in Domesday." B. also gives early forms, *Perpunt*, *Perpont*, *Perepont*, *Perpount* (1273-1575), loc. cit.

O.E. *Iceles hām*, "the homestead of *Icel*." This is a fairly well-known pers. n. in O.E. There is an entry in the A.-S. Chron. anno 626, "*Cnebba wæs Iceling, Icel wæs Eomæring*." For the second element see *hām* in Pt II. Cf. *Ickleton* in Skeat's Cambs. Pl.-Ns., and see O.E. *hām* in Pt II.

 1385 Idenne, *ibid.* iii. p. 77.
 1443 Iden, *ibid.* iv. p. 218.

I can hazard no other suggestion but that the first element may be O.E. *īeg* (W.S. form), "an island."

O.E. *īeg* meant not only "an island," but also "any elevated piece of land, wholly or partially surrounded by marshy country or flooded depressions." If we accept the latter meaning here, then O.E. *īegdenu* would mean "a valley wherein lay a flooded piece of land." Such a compound as O.E. *īegdenu* would develop into a modern (aidn). See *denu* in Pt II.

"The ford in the marshy ground"? O.E. *ieġford*(?). See preceding names. The D.B. forms show confusion of *-ford* with *-f + weorþe*. Cf. *Offord* < O.E. **Offanweorþ* in Duignan, Warw. Pl.-Ns.

Imberhorne.

circa 1336 Hymberhorne, Docs. Lewes Pr., Ssx. Arch. Soc. xxv. p. 145.

O.E. **Ēōmāer(es)horn*, "Eomær's corner," *horn* is a by-form of O.E. *hyrne*, "a corner," "angle" (B.-T., Sweet, A.-S. Dict.). For *Ēōmāer* see examples in Searle.

The development is O.E. **Ēōmāer(es)horn* > late O.E. *ēmēr-* > M.E. **Ember-* > *Imber-* by raising of *-e-* to *-i-* before nasals. See Phonology ante and *Grinstead* above. An intrusive *-b-* often occurs after *-m-* between vowels; cf. mod. *thimble* < O.E. *þȳmel* (cf. *þūma*, "thumb"); *embers* < M.E. *ēmeres* < O.E. *āmyrgean* in Leechdoms, iii. 30 (Skeat, Etym. Dict.).

Possibly O.E. *Ipingas*, "descendants of Ipa." I have only found one instance of this pers. n. in a charter, C.D. No. 1281, *Ipan lea*.

Iridge Place (airidž, E).

1251 Irrigeham maner', Cal. Rot. Ch. p. 71.

1411-2 Ysefeld, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 141.

O.E. *īsīg feld*, "icy field." The medial *-e-* in the early forms is all that remains of the O.E. adjectival suffix *-ig*. Note the Norman-French diphthongising of *-e-* to *-eu-* in the 1313 *Isfeude* above. See O.E. *feld* in Pt II.

The first element is an O.E. pers. n. *Icca*, but Searle quotes as the only instance of *Icca* the C.D. form (1) above. The early forms make it certain that the second element is O.E. *ōra*, "bank," "shore." Many pl.-ns. ending in *-or* have as their second element O.E. *ōfer*, "bank of a river," or even O.E. *hofer*, "a hill," literally "a hump or swelling." On O.E. *hofer* see Wyld, *Lancs. Pl.-Ns.*, and Alexander, *Oxf. Pl.-Ns.*; for *ōfer* cf. *Bignor* above.

The above spellings, if they really represent the Sussex *Itchingfield*, throw no certain light. The first element may be (1) O.E. *Icca*, the pers. n. discussed under *Itchenor* above, or (2) O.E. *Ecca* (with fronted *-cc-*) for which see *Echinham* above.

1438 Gevyngeton, *ibid.* p. 193.

O.E. *Gefantūn*, "the tūn of *Gefa*." Cf. such names as *Gefwine*, *Gefwulf* in Searle. The modern form, and the early forms cited above, show substitution of initial *dž-* for the usual *Y-* from O.E. front *Ġ-*. On this sporadic development of *ġ-* to *dž-* see Wyld's article in *Olia Merseiana* (Liverpool) ii. pp. 129-42. Among other instances occur *jicks*, "hiccough" and *jallow*, "yellow" in W. Cornw. (Wyld, *loc. cit.*). Thus the normal English development of O.E. *Gefantūn* would have been

**Yevington* (jevintən). For other examples of this change see Zachrisson, *Anglo-Norman Influence*, pp. 57 ff.

Or possibly, *Jevington* may be from O.E. *Gefwinetun*, where *-(w)ine-* > *-in-* > *-ing-*.

9. 1416 Kymer, *ibid.* iv. p. 27.

One is tempted to assume as the first element O.E. *cȳ*, plu. of *cū*, "a cow," although M.E. *ī* for O.E. *ȳ* is not usual in Sussex. I cannot make anything satisfactory out of Nos. 3 and 4 unless they are scribal errors for **Kymore* (*n*, *nn* written for *m*). No. 7 shows a new second element, O.E. *mersc*, "marsh" (q.v. Pt II).

If this assumption be correct, the *-ey-* represents a tense (*ē*), the Kt. vowel for O.E. *ȳ* (= *ū* + *i*), those in *y*, of course, represent (*ī*), the Midland type, which is preserved in the modern local pronunciation (kaimə).

The second element is probably O.E. *mere*, "lake," "pond."

The meaning then is "drinking-pond for cows." This sounds quite plausible.

The first element is the O.E. pers. n. *Cēnrēd*. The development of the modern name is interesting. O.E. *Cēnrēd(es)fora* > M.E. *Kēnredeford* > by assimilation *Kerredeford* > Mod. (kādfəd). The assimilated form first occurs above in 1379.

Simply originally O.E. *Wlencing*, a pers. n. The second element, whatever it may have been, had been lost already in O.E. Earle, on p. 12 of vol. ii. of the A.-S. Chron., says in a note that *Wlencing* came over with *Ælla*, founder of the South Saxons, and gave his name to the place where he landed.

The late O.E. form of the name must have been **Wlancing* (preserving the fronted (i), through the influence of the independent adjective *wlanc*, "proud," "imperious").

This is Type I above, the ancestor of the modern (lānsɪŋ), with N.-Fr. substitution of -c- (=s) for -ch- (=tʃ). Type II shows M.E. (Norman-French?) diphthongising of a- to au- before -n, and would be the precursor of a pronunciation (lōnsɪŋ).

On the substitution of N.-Fr. (s) for Engl. (tʃ) see *Cissbury Hill* above, *Ticehurst* below, and the section on "Norman-French Influence" in Phonology ante.

Type I is O.E. *lang lēah*, "long meadow," and the ancestor of the modern form. Type II, if it really represents the same name, is O.E. *æt lāngan ēā*, "by the long water-meadow." O.E. *lēah* meant "meadow," "pasture land," and O.E. *ēā* (-ey (2) in Pt II) meant a "watery meadow" or "marsh land."

The development of Type II is O.E. (*æt*) *lānganēā* > *lāngnēā* (syncope) > M.E. *lāngnee*. Otherwise O.E. *lāng* > mod. *long* (= loŋ). See Wyld, Lancs. Pl.-Ns., under *Langtree*.

O.E. **lēāhtūn*, late O.E. **læhtūn*, "vegetable garden."

Type I is O.E. *lēāctūn* > **lēhtūn* > M.E. **lēhtun* > *leihtun* > mod. **Leighton* (leɪtn). See *Leighton* in Walker, Derby. Pl.-Ns., and in Skeat, Beds. Pl.-Ns.; the latter also takes O.E. *lēāc*, "leek," as the first element.

Type II shows a different development—O.E. *læhtūn* > M.E. **lāhtun* > **lauhton* by -u- diphthongising of -a- before the following back -h-. The modern spelling and the "polite" pronunciation of the name are descended from this **lauhtun* type, seen in Type II, Nos. (1), (4), (5), (9), and (10) above.

The local pronunciation (*læftn*) is from the undiphthongised forms, Type II, Nos. (2), (3), (6), (7), and (8) above.

The first element is a pers. n., either *Lufa* (masc.) or *Lufu* (fem.), for both of which Searle gives good authority. *Lufandun* occurs in C.D. v. p. 103 and refers to Somers. *Lovington*. Duignan, Worcs. Pl.-Ns., takes O.E. *Lufu* as the first element of the Worcs. *Lovington*.

The Sussex name, then, is O.E. **Lufantūn*, which would normally develop into mod. (*laviŋtən*). The form *Lavington* (*læviŋtən*) is due to the influence of the name *Woolavington*, a town only a little to the west of *Lovington*. Hence the popular etymology *West Lavington* for *Woolavington* (= **Wulflāfantūn*) and the substitution of this new *Lavington* for the normally developed *Lovington*. See *Woolavington* below.

The forms in Type I probably represent O.E. **Lēōfantūn*. *Lēōfa* is well-authenticated in O.E., and is of course in ablaut relation to *Lufa*.

Probably simply O.E. *hlæwas*, plu. of *hlæ(w)*, "a mound," "tumulus." The ordinary plural of *hlæw* is *hlāwas*; *hlæwas* is due to analogy of the singular. The absence of an initial *h*- in the C.D. forms above is rather a difficulty, but in O.E. charters, especially the later ones, many peculiar forms are found. In fact many of the so-called early charters are pure forgeries by later scribes, since they often include purely M.E. forms. See the C.D. forms of *Selsey* below, and see *hlæw* in Pt II.

The 957 form above would seem to be O.E. *Ludesēg*, where *Lude* is a well-authenticated pers. n. (see Searle). But the other forms and the modern (lidzi) point to a name containing *y*, possibly **Lyde*, a hypothetical mutated form of *Lude*. See *-ey* in Pt II.

The second is the common O.E. *feld* (q.v. Pt II).

The first element is possibly the same O.E. pers. n. *Lude* as discussed under *Lidsey* above. Or it may be O.E. *Hlōþ*, a shortened form of some name like *Hlōþhere*, or *Hlōþgār* (for the latter see *Lurgashall* below). The second element is O.E. *weorþ* (q.v. Pt II). If O.E. *Lude* is the first element, the above *o* spellings are purely graphic, and the modern (lodzwəþ) a spelling-pronunciation.

I cannot find any O.E. word or pers. n. for the first element. It certainly is not O.E. *hlāford*, which occurs in early M.E. variously as (*h*)*lāverd*, *lōverd*, *lōerde*, etc. (see Strat-Bradl. M.E. Dict.).

Nor can I find any pers. n. **Hlyrd-* or **Lyrd-*, which would account for the *e*, *o*, and *u* spellings above.

The second element is certainly O.E. *tūn*, q.v. Pt II.

Probably O.E. **hlā-feld*, "field of the mound." O.E. *hlā(w)* arose from the nominative *hlā̅(w)* through analogy of the plu. type *hlāwas*.

The 1274 form *Lowesfeud* does not necessarily point to a pers. n. as the first element; it probably represents the O.E. compound **hlāwesfeld*. See *hlāw* in Pt II.

If the forms under Type I represent this name, the second element has been altered from O.E. *-mynstre* (q.v. Pt II) to O.E. *-tūn*. The first element is a well-known pers. n., O.E. *Lulla*. See *Lullington* in Walker, Derby. Pl.-Ns.

"Hlōþgar's corner," O.E. (*æt*) *Hlōþgares hāle* (*halh*). The modern (-əl), of course, is not normally descended from the O.E. dative *hāle*, but has been developed from the M.E. shortened (unstressed) *-(h)āle*, as in No. 1 above.

The *Letegareshale*, No. 1 above, is probably the error of a Norman scribe. The modern pronunciation (ladžəfəl) is normal, but I cannot explain the spelling *Lurgashall*.

Lydhurst.

1343 Lyndhurst, Cal. Inq. P.M. vol. ii. p. 113.

The evidence is scanty; the above form seems to have as its first element O.E. *lind(e)*, "lime-tree" (q.v. under *Lindfield* above), whereas the modern name has *Lyd-*, which may be the O.E. pers. n. **Lyde* (q.v. under *Lidsey* above). The second element is O.E. *hyrst*, "wood."

"*Leo's minster.*" A Pope *Leo III* who reigned (795-816) is mentioned in the A.-S. Chron., and *Leo VII* (936-9) in Birch, Cart. Sax. No. 732.

I take the *Leone-*, *Lene-* forms above to contain as their first element Latin *Leon-* an oblique case of *Leo*.

The 1250 *Limestre* and the 1421 *Lynemenstr* must have been influenced by the English word *lion* (also used as a pers. n.), which was borrowed from Norman-French. The development was *Leoneminstr* > *Lion(e)minster* > *Lionminster*, and by assimilation of *nm* to *-m-* > modern (*laiminstə*). See *mynster* in Pt II.

"Mada's wood," O.E. *Madanhurst*. Duignan had assumed an O.E. (unrecorded) *Mad*, *Mada* to explain *Madeley* in Staffs., and given references to Ssx. *Madehurst*, Cambs. *Madingley* and Heref. *Madley*. The name *Mada* appears, however, in Cart. Sax. No. 1312 in the pl.-n. *Madanleah*, which is the very form that Duignan needed.

It seems that the first element is an O.E. pers. n. Searle records *Mælanbeorh* from C.D. No. 1008, Cart. Sax. No. 622, and a *Mældun* is mentioned in the A.-S. Chron. anno 913. Possibly this *Mæl-* (if the *æ* be short) is the first element in *Malling*, but there are no O.E. names in **Mæll-*, **Meall-*, with double *-l*.

See O.E. *feld* in Pt II.

Maundling, Maudlin (mōdlin).

1411-2 Maudelayn, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 139.

This name doubtless preserves the saint's name *Magdalene*. Bardsley quotes early forms 1275 *Maudeleyn*, *Maudlin*, 1562 *Mawdelyn*.

O.E. *māegfeld*, "the field of the Virgin." O.E. *māeg* meant "a woman," "maiden," and here refers to the Blessed Virgin. See *Maghull* in Wyld, Lancs. Pl.-Ns.

1414 Mershton, *ibid.* iv. p. 7.

O.E. *mersctūn*, "marshy enclosure" > M.E. *mershtun* > *merstun* (N.-Fr. influence *f* > *s*, cf. *Maresfield* above). The 1302, 1352, and 1414 spellings make the etymology fairly certain. See Skeat, Herts. Pl.-Ns., under *Marston*.

Michelgrove.

Type I.

- 1278 Michelgrove, Cal. Inq. P.M. vol. i. p. 66.
 circa 1320 Michelg've, T. de N. p. 222.

 1312 Muchelgrave, Cal. Inq. ad quod D. p. 235.
 1432 Mochelgrave, Cal. Inq. P.M. vol. iv. p. 151.

O.E. *mīcele grāf*, "the great grove." The second element has developed, side by side with the independent word "grove," from O.E. dative *grāfe*. Type II is O.E. (W.-S.) *mycelgrāfe* > M.E. *muchelgrōve* (Sthn. form) > mod. (**matfælgrōuv* or **matfælgrøv*). Cf. O.E. *grāf* in Pt II, and cf. *Micklefield*, *Micklethwaite* in Moorman, W. Rid. Pl.-Ns.

1419 Midhurst, Cal. Inq. ad quod D. p. 374.

Simply O.E. *midde hyrst* or *middhyrst*. O.E. *hyrst* as a second element is normally pronounced in modern names as (-æst).

Milton Hide, Milton Street.

about 1320 Mildetun, T. de N. p. 227, § 83.

Possibly O.E. *middel-tun* > by metathesis **mildtun* > (*miltæn*). Skeat explains the Berks. *Milton* thus.

On the other hand the first element may be a pers. n. **Milda*, with which cf. *Mildburh*, *Mildfriþ* in Searle and *Milda* "libera femina" in Ellis, Introd. D.B. ii. 186. For a *Milton* whose early forms are quite different from the above, see Walker, Derby. Pl.-Ns., sub nomine.

Minsted.

1314 Myntestede, Cal. Inq. P.M. vol. i. p. 262.

Probably O.E. *mintestede*, "the mint place." O.E. *mint* is a loan-word from Lat. *mentha*. For the second element see *stede* in Pt II.

Miswell.

772 meoswille }
meoswyllle } Cart. Sax. vol. i. p. 296 (No. 208).

1085 Mesewelle, D.B. i. 22 b.

The first element is O.E. *mēōs*, "moss." The Mod. spelling represents an Early Mod. shortening of (*mīz-*) from M.E. (*mēz-*). Cf. (*brit/jiz*), earlier (*brīf/jiz*) from *breech* (*ē*). For the second, see O.E. *well*, *wiell* in Pt II.

Monks.

1316 Monekesy, Cal. Inq. ad quod D. p. 253.

1317 Monekeseye, *ibid.* p. 254.

Probably O.E. *muneces ēā* or *muneces ēg̃*, "the 'island' or 'water-meadow' of the monk." The modern (*man̄ks*) shows a total loss of the second element.

Morley.

1309 Morle, Cal. Inq. P.M. vol. i. p. 237.

1339 Marle, *ibid.* ii. p. 92.

1388 Morle, *ibid.* iii. p. 102.

1417 Morle, *ibid.* iv. p. 28.

Either O.E. *mōrlēāh* or (*ge*)*mār(e)lēāh*, where *gemāre* is an unmutated form of *gemāru*, "a boundary." See Wyld, *Lancs. Pl.-Ns.*, under *Moreton*, and for *gemāre* see remarks under *Hoathley* above.

Moulsecombe.

1121 molescumba, Anc. Ch. Pipe Rolls, vol. x. No. 8, p. 12.

1278 Molescombe, Plac. de quo War. p. 750.

1283 Molecumbe, Abbr. Plac. p. 206.

1296 Molscumbe, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 295.

The first element is probably a pers. n. *Moll*, for which Searle gives good authority. I have found it, for example, in Cart. Sax. No. 184. The modern (*maulskm*) is due to M.E. diphthongising of *-ol-* to *-ou-*. For this diphthongising, cf. Wyld, *Lancs. Pl.-Ns.*, Phonology, p. 23, also under *Cowburg* and *Cowford*, and Moorman, *W. Rid. Pl.-Ns.*, under *Cowling Hill* and *Cowthorpe*.

Skeat takes the first element of Berks. *Moulsford* to be O.E. *mūl* (< Lat. *mūlus*), "mule," or *Mūl* as a pers. n.

Mountfield.

1326 Maundefeld, Cal. Inq. P.M. vol. i. p. 334.

1351 Mondefeld, *ibid.* ii. p. 170.

Possibly O.E. **muntefeld*, "the field containing a hill or mount." All the M.E. forms have *Mund-*, *Munde-* (*Maund-* in 1326 is due to some analogy, perhaps that of *Maundlyng*, q.v.). This *Mund(e)-* points to such an O.E. pers. n. as *Mund* or *Munda*, both of which are well-authenticated; see Searle.

I take O.E. **Mundanfeld* to be the original form, and explain D.B. *Montifelle* and the modern name as due to Norman scribes, who substituted French *mun-* for English *Mundan-*.

1343 North Mundham, Cal. Inq. ad quod D. p. 312.

1409 Suthmundham, Cal. Inq. P.M. vol. iii. p. 331.

O.E. *Mundanhām*, "Munda's homestead." The first element is the pers. n. *Munda* referred to under the preceding name; for the second see O.E. *hām* in Pt II. The D.B. *Mundreham* is probably a scribal error, since the form in *-r-* is not found elsewhere. Otherwise it might represent the pers. n. *Mundhere*.

Netherfield.

Type I.

1487 Nederfeld, *ibid.* iv. p. 384.

Type II.

1479 Netherfeld, Cal. Inq. P.M. vol. iv. p. 476.

The oldest forms seem to point to an O.E. **nāddran feld*, "adder field," and this is confirmed by the frequency of the spellings with *-dd-*. Although Norman scribes often wrote *-d-* for *-th-*, we should expect spellings with *-th-* in the 13th and

14th centuries, had the first element been O.E. *neopor*, "lower," as would appear from the modern form and from Type II.

It seems probable that the name was originally **næddranfeld*, and that the *Nether*- forms were due to popular etymology. In most names containing *Nether*- as the first element, this stands for O.E. *neopor*; see Wyld, *Lancs. Pl.-Ns.*, under *Netherlee*, and Duignan, *Worcs. Pl.-Ns.*, under *Netherton*.

(Zachrisson (A.-N. Influence, p. 87) takes O.E. *niperra*- as the first element, and considers Type I above to be due to N.-Fr. substitution of *d* for *th*. But I consider that the numerous *Neddre*-, *Naddre*- spellings cannot admit of this explanation.)

Newbridge.

1278 *de Novo Ponte*, *Plac. de quo War.* p. 752.

The above translates a M.E. (*of*) *nēwe(n)bridge*, or *nēwe(n)brugge* most probably in Sussex. See O.E. *nīwe* and *brycg* in Pt II.

Newick.

2. 1279 *Nimesfeld*, *Cal. Inq. P.M.* vol. i. p. 70.

3. 1320 *Nemefeld*, *Cal. Inq. ad quod D.* p. 263.

4. 1475 *Nenfeld*, *Ind. Ch. and Rolls*, p. 544.

The 1278 form above seems to have as its first element the saint's name *Ninian*, which appears in Bede's Eccl. Hist. in the form *Nynias*, i.e. in Bk iii. cap. iv. (p. 133 in Plummer's Ed. vol. i.). Nos. 3 and 4 above have the by-form *Nennius* (on which see Plummer, vol. ii. (Notes) p. 128).

The second element is O.E. *fēld*, q.v. Pt II.

Northiam (nōdžəm).

The medial *-y-* in the above forms is all that remains of the O.E. *-an-* in *æt þæm norþan hāme*. See O.E. *norþ* and *hām* in Pt II.

See *Northicote* in Duignan, Staffs. Pl.-Ns.

- circa 1320 Nutburn (Nudburn), T. de N. p. 222.
- 1438 Neteborne, Cal. Inq. P.M. vol. iv. p. 193.

O.E. *hnut(u)burna*, "the brook by the nut-tree."

The *Nud-* spellings above (1274 and 1320), if genuine, show a perfectly natural voicing of *-t-* to *-d-* before the following *-b-*. This would give rise to a modern (*nadbæn) or even (*nabæn). See O.E. *hnutu* and *burna* in Pt II.

- 1382 Nytymbre, *ibid.* iii. p. 53.
- 1471 Nitimbre, *ibid.* iv. p. 316.

The Ind. Ch. and Rolls identifies the 960 form above with *Newtimber* (q.v. above), but phonetically it must represent *Nyetimber*. The O.E. *nīwe*, *nēwe* < Gmc. **neuji* (cf. Gk. *veós* < **véfos*, Lat. *novus*) never appeared in O.E. in the form **nīge*, although an adverb *nīge* is well-authenticated (see B.-T.). This *nīge* may have been formed from *nīwe* on the analogy of such pairs as

hweowol, *hweogol*, where the *-g-* and *-w-* represent different O.E. treatments of Pr.-Gmc. $\text{-}\mathfrak{z}^w\text{-}$. Once the adverbial form *nīge* had become well established, it may have given rise to a new adj. **nīge*, but B.-T. cites no instances of the adjectival use of the word.

In this case O.E. **nīgetimber* has exactly the same meaning as *nīwe-*, *nēwetimber* (*Newtimber*), the difference being that the former develops normally to (naitimbə), the latter to (njūtimbə).

Oakendean.

1460 Okynden, Cowfold Accs., Ssx. Arch. Soc. ii. p. 318.

O.E. *ācen denu*. O.E. *ācen* is the adjective to *āc*; see this element in Pt II.

1414 Ovyng alias Evyng, *ibid.* iv. p. 8.

1419 Onyng (miswritten for Ovyng), *ibid.* iv. p. 40.

Possibly O.E. **Ōfan inge*, "the meadow of Ōfa," a name found as that of a witness in Cart. Sax. No. 32. When we find M.E. forms in -*ingg(e)*, we are, I think, justified in assuming

O.E. *inge* (with front *ġ*), since the "patronymic" *-ing(s)* had the back-stop *g* in all periods. The modern pronunciation (*ūviŋ*) points to an O.E. form with long *ō*. Unfortunately no diacritics exist to confirm this.

See O.E. *ing*, *inge* in Pt II.

Ovingdean.

1439 Ovyngden, *ibid.* iv. p. 198.

The first element is probably the O.E. *Ōfa* referred to in the preceding name. For the second element see O.E. *denu* in Pt II.

Moorman, W. Rid. Pl.-Ns., takes the first element of Yks. *Ovenden* to be O.E. *ufenan*, *ofenan*, "from above." The (*ū*) in the Sussex name precludes this explanation here.

The C.D. form above points to an O.E. pers. n. **Pægga* as the first element; cf. Searle.

Nos. (3) and (11) above seem to point to an O.E. variant **Paga* (with back *g*), i.e. O.E. **Paganhām* > M.E. *pageham* > modern (pægm). But this is conjectural. For the second element see O.E. *hām* in Pt II.

Is this O.E. **Pæccanlēah* > M.E. **Patchlei* (=patʃlēi) > (paʃlēi) > (pæʃli)? On (tʃ) and (f) see Zachrisson, pp. 156 ff., and for *Pæcca* cf. next name.

O.E. **Pæccanhām*, "the homestead of **Pæcce* or **Pæcca*." This name is found in O.E. in the patronymic *Pæccingas*, C.D. ii. 360, for which see the next name. Duignan derives the Worcs. *Paxford* from O.E. **Pæccesford*, and **Pæcce*, he says, is "an unrecorded A.-S. pers. n. **Pæcc*, gen. **Pæcces*."

For the second element see O.E. *hām* in Pt II.

Simply O.E. *Pæccingas*, "sons of Pæcce." This name is not otherwise recorded in O.E., but, says Skeat, *Hunts. Pl.-Ns.*, under *Paxton*, p. 345, "it is otherwise known as explaining the place-name *Packington*." (O.E. *Pæcċe*)! See preceding name.

The first element is O.E. *pisa*, M.E. *pese*, pl. *pesen* (Latin *pisum*) = "peas." For the second element see O.E. *mersc* in Pt II. *Pease-* is the first element of Suffolk *Peasenhall*, and Berks. *Peasemore*, which is *Pesemere* in the Inq. P.M. p. 167. See *Peasemore* in Skeat, Berks. Pl.-Ns. M.E. *pēse*, if the *ē* is slack, as the spelling would indicate, goes back to O.E. *peosa* with *a-*umlaut of *-i-* to *-eo-*. If it is tense it represents the M.E. lengthening of *i* to *ē*, for which see Luick, *Beiträge zur engl. Gramm. Anglia*, xvi., xviii., xx.

Penhurst.

 1412 Penherst, Ind. Ch. and Rolls, p. 583.

The first element may be O.E. *penn*, "a cattle-pen," or possibly the Celtic *penn*-, "head," "hillock." In the first case O.E. **pennhyrst* = "the wood by the cattle-pen" and in the second O.E. **penhyrst*, "the wood by the hillock." There is a *Penshurst* in Kent, where *Pen*- is probably a pers. n. See *pennos* in Holder, *Altcelt. Sprachschatz*.

The first element can hardly be O.E. *pipor*, "pepper," in its literal sense, but *Pepper* is a common English surname (originally a nickname?), and Kemble, C.D. Index, vol. vi., records another O.E. pers. n. *Pipernæss*, C.D. No. 737, where *Piper* seems to be a pers. n. See *-ing* in Pt II.

Petworth.

 1369 Putworthe, Cal. Inq. P.M. vol. ii. p. 300.
 1539 Putteworth, Ind. Ch. and Rolls, p. 587.

The first element is probably the O.E. *pytt*, "a pit" (an early loan-word from Latin *puteus*). Type I above, and the modern form contain the Kt. *e* for O.E. *y* the mutation of *u*, Type III is Midland, and Type IV Southern. The form *Patteworth* in Type II above is probably a corrupt spelling, since it cannot, as far as I can see, be accounted for by any known sound-law. For the second element see *wēorþ* in Pt II.

1226 Pevensell, *ibid.* p. 34.

circa 1320 Pevenessell', T. de N. p. 226, § 80.

The second element is O.E. *ēā*, "island"; the *-esell* forms in Type II I take to be Norman-Fr. substitutions of *isele*, *isle* (Mod. Fr. *île*) for the English word. The first element is almost certainly a pers. n., although it is not recorded by Searle. There is a *Pefe* in O.E., which is found in pl.-ns. *Pefesige*, C.D. No. 314, *Peuesige*, No. 380 (= *Pewsey*, Wilts.). *Pefene* may be a form of the same pers. n. base *Pef-*. I can find no Celtic name **Peven*, **Pefen*. (The modern Pevan, Bevan = Ap-Evan (Bardsley) and is much later than the O.E. period.)

temp. Hen. VI Pudingehou, Tax. Eccl. p. 136.

Type III.

1275 Pidingheye, Cal. Inq. P.M. vol. i. p. 58.

There is no word in the O.E. dicts. to fit the first element. Skeat (Etym. Dict.) derives modern *puddle* from "A.-S. *pudd* (ditch, furrow) with suffix (-*el*) = (-*il*)."¹ Possibly a by-form may have existed with suffix *-in*, bearing a semi-adjectival sense, O.E. **pyden*. This hypothetical form would account for the first element of *Piddinghoe*. The second element is O.E. *hōh*, "hough," "hill," "ridge." Type I (modern *-hoe*) represents an M.E. shortened form of O.E. *hō(h)*; Type II is the M.E. dative

-*hōwe* < O.E. *hōze*. See O.E. *hōh* in Pt II, and cf. *Houghton* above.

Type III shows a change of the second element to O.E. (*ge*)*hæge*, "fenced-in land," "paddock," q.v. also in Pt II.

Piecombe, Pyecombe (paikūm, Hope).

Type I.

1085 Picehā, D.B. i. 26 a.

Type II.

1416 Pycombe, *ibid.* iv. p. 27.

1460 Johannes Pycombe, Cowfold Accs., Ssx. Arch. Soc. ii. p. 318.

O.E. *pīchām* originally, as in Type I above. Wyld, *Lancs. Pl.-Ns.*, Pt II, under this element, says O.E. *pīca* (from Latin *pīca*) means "a pick-axe," "point," "pike," and in the mod. dialects. *pike* means, among other things, "a pointed hill," "conical top of a hill or mountain." (*Nthmb.*, *Lakel.*, *Cumb.*, *Westm.*, *N.E. Lancs.*) E.D.D.

Type II above shows an M.E. **pīccumb*, which would be identical in pronunciation with M.E. **pīkām* from Type I above. For another example of the alternation of *-hām* and *-combe* see *Barcombe* above.

Playden.

Type I (dene).

1085 Pleidenā, D.B. i. 19 b.

1379 Plaiden, Cal. Inq. P.M. vol. iii. p. 25.

Type II (dūne).

1298 Pleydonn, Cal. Inq. P.M. vol. i. p. 153.

1316 Pleydonne, F.A. v. p. 133.

The first element is the O.E. pers. n. *Plega* for which see Searle, who gives numerous examples of *Plegwine*, *Pleghelm*, *Plegmund*, etc. Note the interchange of *-den* and *-don* in the second element, for which cf. *Findon* above.

- 1426 Plimpton, Cal. Inq. P.M. vol. iv. p. 111.
- 1503 Plompton, Ind. Ch. and Rolls, p. 592.

O.E. *plūm(a)tūn*, "enclosure containing the plum-tree." O.E. *plūma* meant "a plum-tree," and probably all the English *Plumptions* contain this word as their first element. The 1426 *Plimpton* is probably a corrupt spelling; it might otherwise be accounted for by assuming an O.E. mutated form **plȳme*.

Poling.

Type I.

- 1337 Peling, Cal. Rot. Ch. p. 173.
- 1390 Peling, Cal. Inq. P.M. vol. iii. p. 130.

Possibly O.E. *pāl-incg* or *pāl-ing*, "water-meadow where the 'pole' or 'stake' stood" (i.e. as a boundary mark). Type I is the ancestor of the modern (*poulin*) and represents O.E. *pāling*. Type II would give a modern (**piliŋ*), and represents an O.E. mutated form **pæl-ing*. Cf. the modern pers. n. *Pealing*.

See O.E. *ing*, *incg* in Pt II.

Portfield.

1294 Portfolde, Cal. Inq. P.M. vol. i. p. 123.

1414 Le Portefeld, *ibid.* iv. p. 8.

The first element may be a pers. n. O.E. *Port*, which is found in O.E. pl.-ns. *Porteswudu* in C.D. No. 776, and *Portesmuþa* in A.-S. Chron. anno 501 (MSS. Parker and Laud), pp. 14 and 15 in Plummer's Ed. Or else it may be O.E. *port*, "a town," for which cf. *Port Meadow* in Oxfordshire. The absence of a genitival inflexion rather confirms this.

The second element may have been originally either O.E. *fald* or O.E. *feld* (see both in Pt II). For interchange of these elements, see *Cowfold* above.

circa 1320 Porteslade, T. de N. p. 222.

1385 Porteslade, Cal. Inq. P.M. vol. iii. p. 74.

O.E. *Portes(ge)lād*. The first element is the O.E. pers. n. *Port* discussed under *Portfield* above.

The second element is O.E. *gelād*, "a road," "pathway." Normally this would develop into a modern (*loud*), but in a second element O.E. *(ge)lād(e)* would be shortened in M.E. to **lād(e)*, and the modern pronunciation of the element as (*leid*) is due to the spelling.

Cf. the Wilts. *Cricklade* (krikləd) which is *Creccagelade* in A.-S. Chron. (Parker MS.) anno 905, and *Cræcilade* in A.-S. Chron. (Laud MS.) anno 1016.

(There is also an O.E. *slæd* (slæd?) which Sweet, A.-S. Dict., defines as "valley." The authorities are divided as to the quantity of the -æ-; see Wyld, Lancs. Pl.-Ns., Pt II, and Jellinghaus, "Engl. und Nddtsche Ortsn." in Anglia xx. This may also be the second element of *Portslade*, although I have found no other example of it in Sussex.)

- 1460-80 Pounynges, Cowfold Accs., Ssx. Arch. Soc. ii. p. 322.

O.E. *Pūningas*, "sons of Pūn(a)." This name *Pūn(a)* is not otherwise recorded in O.E. The various spellings *o*, *u*, *oi*, *ou*, in the above forms all express M.E. *ū*, which was shortened to *ŷ* in the trisyllabic **pūninges*, and which gave rise to the mod. (a) in (paniŋz). The "polite" pronunciation (poiniŋz) is purely bogus, and is merely due to the accidental preservation of the spellings in -oy-. [In the North, the spellings -oi-, -oy- were often used to express a sound which was approximately (*ȝ*), and which developed out of the O.E. *ō*. See, for instance, such Northern texts as the "Bruce," where these spellings abound, and compare *Mytholmroyd*, and *Holyroyd* in Yorks., where the second element is apparently O.E. *rōd*.]

4. 1633-4 Pulborough, Vist. Ssx. p. 52.

Type III.

- 1278 Pilleberg, Plac. de quo War. p. 758.

The first element is O.E. *pul(l)*, "a pool," in ablaut relation to O.E. *pōl* (> mod. "pool"). See this word in Pt II.

Type I has the suffix O.E. *beorg*, "a hill." The spellings in *-bergh* are from the O.E. nom., those in *-berwe* from the dative *beorge*.

The form *Poleberethe* (No. 6 in Type I) above is a scribal or editorial error, due to confusion between the O.E. symbols *p*=*w*, and *þ*=*th*. But see *Aigburth* in Wyld, Lancs. Pl.-Ns.

The modern name is descended from Type II, O.E. **pul-burh*. See *beorg* and *burg*, *burh* in Pt II below.

The Plac. de quo War. *Pilleberg*, which I have typed as Type III is, if genuine, the descendant of the O.E. mutated form *pyll*, for which B.-T. gives authority. Had it survived, it would have given rise to a mod. (*pilbræ*).

Rackham.

The first element is probably a pers. n. Searle records no **Raca*, **Hraca*, but B.-T. under *Raculf* quotes from C.D. vi. p. 324 (Index)—“*Raculf*, *Ræculf*, *Reculfcestre*... = *Reculver*, Kent.” I assume a shortened form **Raca*, and an O.E. proto-type **Racanhām*. The first element can hardly be the O.E. *hring*, which means "a ring" or "a circle," "globe," etc., and can scarcely be applied to land-features. It is probably a shortened form of some pers. n. like *Hringweald*, *Hringwine*, *Hringwulf*, etc. O.E. *Hringweald* is found in a pl.-n. *Hringwoldes beorh* in Cart. Sax. No. 729.

The second element may be either O.E. *mere*, "a mere," "lake," or O.E. *gemæru*, "a boundary." See both these elements in Pt II.

E.D.D. under *ripe* sb. (2) gives "a bank," "the seashore" (pronounced (raip), (reip)), and derives the word from Latin *ripa*. This word is mentioned as occurring only in Kent and Sussex.

Jellinghaus (Engl. und Niederdeuts. Ortsn., Anglia xx. p. 311) says "Engl. *ripe* = uferrand, schärfholz für sensen; ostfries *ripe* = rand; thüringisch *riefe* = vertieften streifen," and quotes the Sussex *Ripe* as an example. See this element in Pt II.

 1411-2 Rothirbrigge, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
 p. 131.

The original form was O.E. *hrȳðerabrycg*. O.E. *hrȳðer* (< **hrunþri*) meant "a cow," "heifer," "ox," "horned animal."

There was also a by-form *hrīðer* (< **hrenþri*). See this element in Pt II.

Type I and Type II are normal descendants from this O.E. *hrȳðraberycg* with the Kentish and Southern vowels *ē* and *ū* for O.E. *ȳ*.

Type III is due to popular etymology; by confusion of the first element of the *Ruthere*- type (II above) with the Norman or Normanised pers. n. *Robert(us)* (= O.E. *Hrōþbeorht*). This type seems to have arisen quite early in the M.E. period, and has persisted down to the present day.

Type IV is capable of two explanations. Either it is (1) a different spelling of Type II, due to the writing of *-o-* for *-u-* before *-th-*, or else (2) it shows confusion of the first element with the O.E. pers. n. *Hrōþhere*. In either case the modern (roðəbridʒ) is a spelling-pronunciation. See Wyld's remarks under *Ritherham* in *Lancs. Pl.-Ns.*, and cf. *Rotherfield* below.

Rodmell.

1085 Redmelle, D.B. i. 28 a.

1121 redmella, Anc. Ch. Pipe Rolls, vol. x. No. 8, p. 12.

1411-2 Rademyle, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x. p. 32.

1416 Rademeld, Cal. Inq. P.M. vol. iv. p. 26.

I can offer no satisfactory explanation of this name. But for the modern *Rod-*, the first element might be a pers. n. *Ræda* (> *Red-*, Type I) or *Rada-* (> *Rad-*, Type II). True, the modern *Rod-* might develop out of *Rad-* by dialectal interchange of *a* and *o* (see *Clapham* above, and reference to E. D. Gr. there given).

Or else the first element could be O.E. *rēād*, "red," Type I being from O.E. *Ræd* > *Rēd* > M.E. *Rēd* before *-dm-*, and

Type II from O.E. *Ræd-* > M.E. *Rād-* under the same conditions. See Pogatscher, *Anglia* xxiii. pp. 302 ff., and Ritter, *Anglia*, June 1913, pp. 269-75, in the articles "zur engl. *Æ/Ē* Grenze." Again the modern *Rodmell* might represent in this case M.E. **rōdemelle* or **rōdemelde* < O.E. *redda-* with shifting of stress, on which see Wyld, *Lancs. Pl.-Ns.*, § 11, p. 25.

The second element also presents difficulties. The modern *-mell* looks like the Kt. form of O.E. *mylne*, dative of *mylen*, "mill," the M.E. forms in *-meld*, *-mylde* having developed an "excrecent" *-d*. But the date of the addition of this *-d* is not definitely known (see *Glynde* above), nor does the number of *-d* forms support the explanation. I suggest an O.E. **mylde*, an unrecorded mutated form of *molde* (modern "mould"), which B.-T. gives with the meanings "dust," "sand," "earth." In this case modern *-mell* may be merely an unstressed form of *-melde*, or it may be due to confusion with the above-mentioned *mell* from *mylne*. "The place of red sand or red earth" seems quite a convincing meaning.

 1437 Rogheye, Cat. Anc. Dds. vol. i. No. B 1540, p. 363.

Either O.E. **rūh(ge)hæge*, "rough pathway" or O.E. **Rūgan-hæge*, "the pathway of *Rūga*," a pers. n., meaning "the rough one," which is found in *Ruganbeorh*, *Ruwanbeorh*, *Ruanbeorh*, *Ruwancnol*, *Rugan diç*, etc. Kemble's Index (cit. Skeat, *Hunts. Pl.-Ns.*, under *Rowey*, p. 325). If we assume the pers. n. *Rūga*, we have to admit the loss of the gen. suffix *-an* and a subsequent development **Rūgheye* > **Rūh(h)ey* > **rūh^w(h)ey* > (rafi); precisely parallel is the development of the other O.E. form **rūhgehæge*.

The first element is either O.E. *rūh* or the pers. n. *Rūga*, as in the preceding name, and the modern (rougeit) must be regarded as a spelling-pronunciation. For *-gate* see remarks under *Fishergate* ante.

The O.E. form above explains the name as "the rams' field." Type I is Kentish, and II Southern. The spellings in *Rother-* may be simply graphic changes from *Ruther-*, or they may be on the analogy of the O.E. pers. n. *Hrōþerc*. See *Robertsbridge*, *Rotherbridge* above. The modern local pronunciation is the normal descendant of Type II.

1439 Rotyngden, Cal. Inq. P.M. vol. iv. p. 198.

1457 Rottyngdene, Ind. Ch. and Rolls, p. 627.

It is hardly likely that the first element is O.E. *notung*, "corruption," "putrefaction," for this word was principally used figuratively (the mod. "rot" and "rotten" are from Scand.: Skeat, Etym. Dict.).

There is an O.E. pers. n. *Ruta* quoted by Searle from Cart. Sax. Nos. 159, 175 and C.D. Nos. 85, 96, but the frequency of the spellings in -o- argue against this. There is no **Hrōta* or **Rōta*- in the Onomasticon.

Possibly (but not, I fear, probably) the first element was O.E. *Hrōpinga*- gen. plu. "of the sons of Hrōþ," a common first element in O.E. pers. ns. But if we accept this, we have to account for the other forms and the modern name by assuming wholesale N.-Fr. influence in substituting -t- for -þ-.

All that is fairly certain is that the second element is O.E. *denu*, "valley" (q.v. Pt II).

If the D.B. form is to be trusted, the name was originally O.E. **rygebeorg*, "rye-hill," and the second element has subsequently been completely lost. But this is not very convincing.

(It is just possible that the word is really O.Fr. *rüe* (a road), or that it was influenced by this word. O.Fr. *rüe* (< Lat. *rūga*)¹ was already in the 12th or 13th cent. pronounced as (rȳe). If this word were borrowed in early M.E. it might become **rī(e)* by unrounding of *ȳ*, although the difficulty is that in Sussex, whose dialect was mainly Southern, the unrounded form would be retained. I put this forward tentatively, for what it may be worth.)

I see no reason why the first element should not be O.E. *sæl*, "a hall" (O.H.G. *sal*; O.Norse *salr*), although this word is mainly used in poetry to describe such places as *Heorot*, the famous hall of king Hrōþgar (see *Beowulf*, *passim*). The second element is certainly O.E. *hyrst*.

The element *sæl* is common in continental pl.-ns., both as a first and as a second element (see, for instance, *Leithaeuser*, *Berg. Ortsn.*, pp. 78, 79), and moreover, such a hall often stood in or near a wood. I quote here from *Jellinghaus*, *Westfäl Ortsn.*, p. 114.

sæl a.s. (altsächsisch), *seli*, "Gebäude, nur aus einem grossen Saale bestehend, auch zur Aufbewahrung von Feldfrüchten dienend....Das dreimalige Eintreten von *loh* für *sele* beweist die häufige Anlage solcher Saalgebäude an Gehölzen. Manche sind mit den Namen der Erbauer zusammengesetzt."

Is this O.E. **Sǣlāfantūn*, "the tūn of *Sǣlāf*"? For *Sǣlāf* see Searle. In this case we should have to assume a weak genitive in *-an-*, and a subsequent contraction of the trisyllabic O.E. **Sǣlāfantūn* to M.E. **Sǣleventun* > *Salvintun* and mod. *Salvington*.

Moorman, W. Rid. Pl.-Ns., explains Yorks. *Saddleworth* as "the farm, or property of Sædel." He cites O.E. *Sædelesstræt* from C.D. Nos. 597, 1190, and takes *Sædel* as a pers. n., originally a nickname. The independent word *sædel* is of course the modern "saddle." For *Sedelscombe* as compared with *Selscombe* see remarks under *Telscombe* below.

 1316 Selleye, Cal. Inq. ad quod D. p. 253.
 1388 Selseye, Cal. Inq. P.M. vol. iv. p. 460.

The first element is O.E. *sēōles*, genitive sing. of *seolh*, "a seal." Searle merely gives *Seol-* as "local" in *Seolesburne* from Cart. Sax. No. 1200, and C.D. No. 535. Since it occurs in conjunction with such words as *-burne*, "brook" and *-ige*, "island," *seolh* is probably the name of the creature. The C.D. form above dated 801 is obviously much later, since *-egh* is a M.E., not an O.E. spelling.

Bede in Eccl. Hist. iv. 13 (p. 232 in Plummer's Ed.) explains *Selsey* as "*Selæsen*, quod dicitur Latine insula vituli marini," i.e. "island of the sea-calf" or "seal."

Sharnden.

1319 Sharndenne, Cal. Inq. P.M. vol. iv. p. 429.

1341 Sharndene, *ibid.* ii. p. 100.

The Ind. Ch. and Rolls gives for the Kent *Sharnden* a form *Scearn den* (anno 973) Cott. MS. viii. 33 (Index, p. 655). C.D. also has *Scearnford* (= Sharnford, Leics.), Nos. 710, 1298.

The first element may be O.E. *scearn*, which B.-T. defines as "sharn," "dung," "filth." E.D.D. gives "sharn" in this sense in the modern dialects. B.-T. cites the cognates O.Fris. *skern*; Icel. *sharn* (n.), "dung"; Dan. *skarn*, "dung," "muck," "filth"; O.E. *scearnwibba* or *scearnwifel* is "a dung-beetle."

p. 139.

1584 Shermanbury, Ind. Ch. and Rolls, p. 660.

1633-4 Shermanbury, Vist. Ssx. p. 10.

The first element is probably O.E. *scīrmann*, "official," "officer," "ruler," "one who discharges the duties of a *scīr*" (B.-T.). "Sheriff's city" is quite a convincing meaning.

Another possible explanation is that the first element is the M.E. family name *Sherman*, modern *Shearman*, *Sherman*. Bardsley, Engl. and Welsh Surnames, p. 682, cites c. 1300, *John le Shremon*, *Robert le Sherman*: 14th cent. *William le Sherman*, and says the name is "occupative" and = "cloth-shearer." 1377 Sheryngton, *ibid.* iii. p. 1.

Possibly "Scīra's tūn," O.E. **Scīrantun*. Searle records numerous names in *Scīr*, e.g. *Scirbeald*, *Scirheard*, *Scirweald*, etc., and quotes *Scira* as a witness to a ch. Cart. Sax. No. 208 (anno 772) and as "local" in *Sciranpul*, Cart. Sax. No. 1088, C.D. No. 495. The difficulty consists in the *Shir-*, *Shor-* forms above. The *Shir-* is probably due to M.E. raising of *e* (Morsbach, Me.Gr. pp. 143-4), and *Shor-* (= *Shur-*?) is possibly the result of the rounding of this *-i-* before *-r-*. See *tūn* in Pt II.

Shillinglee.

- 1436 Shillyngleggh, Cal. Inq. P.M. vol. iv. p. 176.
 1437 Shullyngleggh, *ibid.* p. 184.

The above forms are very late, but they doubtless preserve the O.E. pers. n. *Scilling* (mod. surname *Shilling*) which is well-authenticated (see Searle, pp. 410, 411).

- The second element is O.E. *lēāh*, q.v. Pt II.

 1366 Sheplake, *ibid.* p. 275.

The first element is O.E. *scēpa*, gen. plu. of *scēp*, W.S. *scēāp*, "sheep." Type I shows the second element *-lēāh*, Type II has O.E. *lacu*, *lace*, "a lake," "small mere." Jellinghaus, Engl. und Nddtsche Ortsn., under *lake*, implies that the Yorks. *Beverley* has O.E. *lacu* as the second element. He cites the early form *Beferlac* without date or reference.

Most of the above early forms have M.E. *shēpe*, from O.E. *scēpa*, but the forms in *ship*- and the modern name would seem to be descended from a by-form O.E. *scīp*, which was, however, mainly Northumbrian. See *Shipley* in Moorman, W. Rid. Pl.-Ns. Or possibly the M.E. forms were really pronounced (*ſēp*-) or (*ſēp*-), and some analogy has been at work to produce the modern (*ſipli*) in Sussex. Southern names have mainly *-e*; cf. *Sheppey Island*, Kent.

O.E. **scorehām*, "the homestead on the sea-shore." The modern *shore* is M.E. *schore*, but it is not found in O.E. The original sense is "edge" or "part shorn off" < *scoren*, p.p. of *sceran*, *scieran*, "to cut," "shear." (Skeat, Etym. Dict. under *shore*.)

See *Shore* and O.E. *hām* in Pt II.

Shripney.

680? Scrippaneg, C.D. i. p. 23.

The first element is a pers. n. Searle merely quotes O.E. *Scrippa* as "local" from the above name, and the same charter in Cart. Sax. No. 50.

For the second element see *-ey* in Pt II.

Sidlesham.

 1383 Sydlesham, *ibid.* iii. p. 63.
 1579 Sidlesam, Ind. Ch. and Rolls, p. 66.

The first element is a pers. n. Searle records *Sidel*, "local," from *Sidelesham*, Cart. Sax. No. 997 and C.D. No. 464. The latter reference is the C.D. form above. I take this *Sidel* to be a diminutive of *Sida* (which is also recorded by Searle), which, in its turn, is a shortened form of some name beginning with *Sid-*, for which S. gives about a column of examples. (Onomast. pp. 416, 417.)

For the second element see O.E. *hām* in Pt II.

Type III.

- 1274 Sungylton, H.R. ii. p. 213.

Wyld, Lancs. Pl.-Ns., under *Singleton*, suggests for the first element O.Norse **Singulfr*. I propose for the Ssx. *Singleton* an O.E. pers. n. **Syngel* with *y* for the mutation of *u*. I take

this **Syngel* to be a kind of nickname or pet-name formed, by means of the diminutive suffix *-il*, from **sung-*, the 3rd grade of *singan*, "to sing." Thus **Syngel* would have the meaning of a "minstrel" or "singer." This would account for the three types above, but the explanation is not very satisfactory.

1432 Slagham, Cal. Inq. P.M. vol. iv. p. 151.

1460 Slawham, Cowfold Accs., Ssx. Arch. Soc. ii. p. 322.

The first element is probably O.E. *slaga*, "a slayer," possibly used in the sense of "a butcher" or perhaps "game-hunter." The second element is O.E. *hām*, "homestead." O.E. *slaga* is found, for instance, in Cura Pastoralis, "Hu, ne biþ he þonne swelce he sie his *slaga*, þonne he hine mæg gehælan, and nyle?" (Sweet's Ed. p. 275, l. 9). The modern local pronunciation (slæfm) is normally developed from O.E. *slaganhām* > **slah(an)-ham* > **slah^w(h)am* > **slafam* > mod. (slæfm). Cf. the development of modern (lāftə) from O.E. *hleahfor*.

The first element is certainly O.E. *sūþ*. As for the second, it may be a plu. of *ēā*, "island," "water"; but I have never seen the word used in the plural.

More possibly it is the genitive singular of O.E. **gēā*, "farm-land" (not the plu.; the Gmc. cognates O.S. *gā*, *gō*; O.H.G. *gewi*, *kawi*, *gawi*; Gthc. *gawi* are neuter; the O.E. plural then would probably be **gēā* and not **gēās*). If so, the name must represent O.E. **(þæs) sūþan *gēas*, "(of the) south farm." For O.E. **gēā* see Wyld, Lancs. Pl.-Ns., Pt II.

Searle quotes a pers. n. O.E. *Stedda*, on the evidence of Kemble, C.D. No. 481, which is the very reference above. No other authority for this name exists. But for the C.D. form above, one would be tempted to explain *Stedham* simply as O.E. *Stedehām*. I cannot account phonetically for the 1314 *Stodeham*.

 1633-4 in Steynings }
 of Stenings } Vist. Ssx. p. 25.
 1695 Stening, Map of Ssx., Camden's Britt. p. 164.

Type I is O.E. *stān-ingas*, which may be a patronymic from some name beginning with *stān-*, or else a compound meaning "stony meadow." The latter is more likely, since we find Type II with a mutated form *stēn-* as its first element.

Type II, O.E. *stēningas* or *stēninegas*, is the ancestor of the modern name.

The *-ey-* spellings above may indicate either a tense M.E. *ē* or a slack *é*. In the 15th cent. and even in Wyclif they seem to represent the slack sound (Dibelius, John Capgrave und die engl. Schriftspr., Anglia xxiii. § 25 ff.). If on the other hand the *ē* be tense, it goes back to the Kentish *ē* for *æ*, the *i-* umlaut of O.E. *ā*. In either case the result is modern (*stening*), with shortening of the first syllable in the trisyllabic M.E. *stēninges*.

 1488 Stopeham, Cal. Inq. P.M. vol. iv. p. 389.

The first element may be a pers. n. Searle records no O.E. **Stoppa*, but I have found the following in Kemble, C.D. i. p. 100 (No. 83), "Est autem ager qui traditur in regione quae

antiquitus nominatur *Stoppingas*....” Kemble identifies this in the Index (vol. vi.) with Warw. *Stopping*, which identification, however, he queries.

This points to O.E. **Stoppanhām* as the ancestor of Ssx. *Stopham*.

Skeat, Beds. Pl.-Ns., under *Stopsley*, refers to *Stoppingas* in Kemble's Index, which is the *Stoppingas* in the above quotation.

 1633-4 Sillington, Vist. Ssx. p. 71.

The first element may be the O.E. pers. n. **Sula*, not recorded by Searle, but occurring in *Sulangraf*, Cart. Sax. ii. p. 384, *Sulanford* and *Sulanbroc*, *ibid.* iii. p. 589 (cit. Skeat, Berks. Pl.-Ns., under *Sulham*). But the spellings in *-ill-* above, appearing side by side with those in *-ull-* would rather favour the assumption of an O.E. by-form **Sylla* (< **Sul-ja*). The regular appearance of *-ll-*, in fact, makes this almost certain.

1362 Southeton, Cal. Inq. P.M. vol. ii. p. 251.

O.E. *Sūþ tūn*, "south town." All the *Suttons* in England have the same origin. See the name, for instance, in Wyld, Lancs. Pl.-Ns.; Skeat, Beds. Pl.-Ns.; Duignan, Staffs. Pl.-Ns.; and Harrison, Liverpool District Pl.-Ns. The M.E. *u* in Sutton is due to shortening before *-þt-*, and this consonant-combination was assimilated to *-tt-*. For other examples of this assimilation cf. *Norton* above, and *Smithdown* in Wyld, Lancs. Pl.-Ns.

Type II.

1274 Swamberth, H.R. ii. p. 209.

Duignan, Worcs. Pl.-Ns. under *Swanshurst*, gives early forms 1275 *Swanhurste* and 1332 *Suanneshurste*, and says that "Swan was not a pers. n. before the Conquest, but by the 13th cent. it had become one. The double *n* in the last form points to the pers. n., and we may read this 'Swann's wood,' M.E. *hurst*, 'a wood.'"

But Grueber quotes *Swan* from a coin in Cnut's reign. Probably the name was *Swān* (cognate with O.Norse *sveinn*, mod. Engl. "swain").

Type I above is O.E. *Swān(es)beorh*, "Swān's hill," and Type II is the O.E. dative *Swān(es)beorge* > M.E. *Swanberwe*, the *-th-* in the spelling being the scribe's error for *-w-* (through confusion of O.E. *þ* ("*wēn*" = *w*) with *þ* ("*thorn*" = *th*); see *Pulborough* above).

The second element has been entirely changed from O.E. *beorg*, "a hill" to O.E. *burh*, *burg*, "a fortress," "castle," "city." See also *Pulborough* above.

Tangmere.

- 1397 Tangmere, Cal. Inq. P.M. vol. iii. p. 226.
- 1428 Tangmere, F.A. v. p. 171.

The second element is pretty certainly O.E. *mere*, "lake," "pond." For *tang*, *tong* Jellinghaus (Engl. und Nddtsche Ortsn., Anglia xx. p. 321) says "altnord. *tange*, landzunge. Nds. vorsprung höheren landes in die moor- und marschniederungen... *Tange* häufig in Schleswig...etc." He gives from C.D. *tangmére* 1. 23, *on Atange?* 4. 31; and mentions *Garstang* (Lancs.), *Mallerstang* (Westm.) and *Tong(e)* Kt., Leic., Worcs., Sal., Yorks., Lancs. Possibly this *tang-*, despite its Norse origin, may be the first element of Ssx. *Tangmere*. Cf. also *Tangley* (Hants.) and *Tong* in Duignan, Warw. Pl.-Ns. The O.E. *tang* meant "a pair of tongs" (German *Zange*).

It seems that the second element was originally O.E. *incg* (*ing*), "a water-meadow." As for the first, Type II seems to contain a pers. n. *Tora*, for which see Searle, p. 457.

C.D. has *Tærstán*, *Terstán streám*, Nos. 633, 652, 752, etc. This *Tær-*, *Ter-* may be the first element in Type I above, but if it be a pers. n., no other authority for it occurs.

Telham Hill, Telham Court.

temp. Edw. I Telham, Cust. B. Abbey, p. 9.

A pers. n. *Tella*, the name of a monk, is found in the Liber Vitae (O.E.T. p. 520) and Förstemann cites *Tello* as a "nomen viri."

The first element I take to be an O.E. pers. n. **Tetel* or **Tetele*, a diminutive of such a name as *Teta*. Searle quotes a continental *Teta* with merely a reference "Piper"; O.E. *Teta* is found in a pl.-n. *Tetanhyl* in Cart. Sax. No. 1002, and C.D. No. 1216. For the second element see O.E. *comb*, *cumb* in Pt II. For the change of M.E. *Tetlescumb* > **Tetlscumb* > (telskəm) cf. M.E. *sedelescumb* > **sedlscumb* > (selskəm) under *Selscombe* above.

- 1633-4 William Apsley of Thackham, Vist. Ssx. p. 8.
- 1695 Thakeham, Map of Ssx., Camden's Britt. p. 164.

I take the first element to be O.E. *þaca*; not *þaca*="a roof," "thatch," "cover" (B.-T.), but a nomen agentis with the agent suffix *-a*, and the meaning "thatcher," "coverer." "The thatcher's homestead" is a convincing meaning. For the agent suffix *-a* cf. *hunta* (*huntian*), *wealda* (*wealdan*), *bora* (*beran*) etc. See O.E. *hām* in Pt II.

The first element is O.E. *þorn*, "thorn," or "thorn-tree." The second is O.E. *ēg*, *īg* (q.v. under *-ey* in Pt II).

There are numerous *Thorntons* and *Thornleys* in England, most of which have O.E. *þorn* as their first element. But see names in *Thorn-* in Wyld, *Lancs. Pl.-Ns.*, and note that the *Lancs. Thornley* and *Thornton* contain as their first element the O.Norse pers. n. *þoran*.

- 1543 Tyseherst, Ind. Ch. and Rolls, p. 744.
- 1633-4 Tysehurst, Vist. Ssx. p. 104.

The first element is probably O.E. *ticcen*, "a kid." Zachrisson (A.-N. Influence, p. 31) says that "it is not necessary to assume French influence here, since *-ch-* may have been dropped before *-s* after the syncopation of unstressed *-e-*." He compares *Tisted* (Hants.) < O.E. *Ticcested* in Cart. Sax. No. 786. But, as Z. later points out, the modern pronunciation (taisəst) obviously points to French influence, unless it be explained as a spelling-pronunciation. Björkman (cited by Zachrisson on p. 99) points out that the lengthening of *-i-* is a criterion of French influence (*Archiv für das Studium der neueren Sprachen* 116, p. 105). For other examples of Norman-French types in modern Sussex names see *Cissbury Hill*, *Maresfield*, and *Marston* above.

Tillington.

- 1136 Tulintona, Fr. Ch. No. 1391, p. 510
- 1302-3 Teliton, F.A. v. p. 130.

The first element may be O.E. *Tila*, a shortened form of some name beginning with *Til-*, such as *Tilbeorht*, *Tilbrand*, *Tilhere*, etc., for which Searle gives authority.

Under *Tillbrook*, in Hunts., Skeat gives the form *Tilebroc* from H.R. ii., and compares this Sussex *Tillington*. It must be admitted that the *-e-*, *-u-* spellings above present difficulty. They may, however, be due to confusion of the first element with another pers. n. with *-y-*. Searle quotes *Tyttla* and *Tytela*, but the disappearance of the second *-t-* before *-l-* so early as 960 is very improbable.

1278 Totyngton, Plac. de quo War. p. 758.

1316 Totington, F.A. v. p. 142.

The first element is the O.E. pers. n. *Tota*, for which cf. *Totancumb*, Cart. Sax. No. 565, and a chart. of 772, No. 208 in Cart. Sax.

This name is a good example of the interchange of medial *-t-* and *-d-* in pl.-ns., which Zachrisson considers to be due to N.-Fr. influence. For remarks on this change see under *Chiddingly* above. In the early forms of the Lancs. *Tottington*, Wyld finds six spellings in *Tot-*, as against one *Todyngton* in 1400.

1617 Tortington, ibid. p. 481.

I take the first element to be an O.E. **Torhta*, a shortened form of one of the pers. ns. in *Torht-*, of which Searle gives some forty examples (pp. 457, 458).

O.E. **Torhtantūn* > **Tor(h)tantūn* > M.E. *Tortintun* > mod. (tōtiŋtən).

See O.E. *tūn* in Pt II.

Tottingworth.

Tripp Hill.

1296 Roberto Tryppe, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 293.

Tripp is a mod. surname, of which I can find no O.E. ancestor. Bardsley, Engl. and Welsh Surnames, p. 765, says that *Tripp* is "an early personal name." The earliest examples he cites are (1273) *William Tripp*, Cambs.; *Robert Trippe*, Bedf.; *Gilbert Tripp*, Wilts.; 1 Edw. III (1327) *John Tryp*, Somers.—Kirby's Quest. p. 107.

1421 Traton alias Tradington, Cal. Inq. P.M. vol. iv. p. 58.

1631 Trattoon, Ind. Ch. and Rolls, p. 759.

This may be O.E. **Trotantūn* (for *Trota* see Searle) > M.E. *Trotentun*, with short -o- in the trisyllabic word, and subsequent syncopation to *Trotton*. Then the -a- forms above would be due to dialectal interchange of -o- and -a- (see *Clapham* above). The D.B. *Traitone* and 1398 *Trayton* I cannot explain.

1483 Twynom, Twenem, *ibid.* iv. p. 414.

1633-4 Twineham, Vist. Ssx. p. 41.

The above forms point to O.E. *hamm* (2), "bend in a river," as the second element. See this word in Pt II.

The name was O.E. (*æt þæm*) *twīgan hamme*, "(at the) double bend," i.e. the place where the stream bent twice.

See Skeat, Beds. Pl.-Ns., and Herts. Pl.-Ns. under *Twyford*, and O.E. *twī* in Pt II.

Type II.

1274 Ulkefeud, H.R. ii. p. 219.

1315 Olkefeld, Cal. Inq. P.M. vol. i. p. 275.

The 1248 form above points to M.E. *ōke*, O.E. *āc(a)* as the first element. But all the remaining forms have *Ukke*-. Wyld, *Lancs. Pl.-Ns.*, under *Ogden*, gives two 13th and 14th cent. forms *Uggedene* and *Ugdene*, which he supposes to be corrupt spellings.

Ukke may be the M.E. form of **Uccan*, genitive singular of a pers. n. O.E. **Ucca*, which is not, however, found in O.E., although Searle quotes a continental *Ucco* with merely the reference "Piper."

The forms in Type II are even more unsatisfactory. Were they relative to the North or Midlands they might point to an O.E. **Ulk(les)feld* from the Norse pers. n. *Ulketill*, cognate with O.E. *Wulfcytel*. But this can hardly be the case in Sussex.

1592 Udymer, Ind. Ch. and Rolls, p. 765.

1695 Udimere, Map of Ssx., Camden's Britt. p. 164.

The first element is probably O.E. *Uda*. *Uda* is mentioned as a witness to Chs. Nos. 194, 196, 242, 260 in Cart. Sax. (anno circa 770). Moreover Ellis, *Introd. to D.B. Index A* (Tenants in capite), mentions an *Udi* who held land in Staffs. (D.B. 250 b), and Förstemann, *Altd. Nbch.*, quotes *Uddo* as a "nomen viri."

The *-i-* in the above forms and in the modern *Udimore* is all that remains of the genitive suffix *-an-* of the O.E. **Udanmere*.

The second element was originally O.E. *mere*, "a lake," or possibly *gemæru*, "a boundary." There is no sign of the mod. *-more* in the early forms. The modern suffix is probably the descendant of the unmutated **gemære* (q.v. under *Morley* above), or possibly it was O.E. *mōr*, "a moor."

 Waltham }
 1274 Waltham, H.R. ii. p. 212.
 1451 Upwaltham, Ind. Ch. and Rolls, p. 780.

Skeat, Herts. Pl.-Ns., explains *Waltham* as "the *hām* of *Wealta*," a name not otherwise known.

Later, in Berks. Pl.-Ns. (1911), he quotes *Wealtham*, Cart. Sax. ii. 490 (anno 940), and again *Wealthæminga* (gen. plu.), Cart. Sax. ii. 285 (anno 909), "where the suffix implies derivation from *hām*, not *hamm*."

"...The absence of the suffix *-an* in charters so early as 909 and 940 suggests that we may regard **Wealthām* as the right form. If we take *hām* to mean 'home' or 'house,' *wealt* must be inferred (from the adj. *unwealt*, 'steady' or 'firm') to mean 'unsteady' or 'infirm,' i.e. ill-built, shattered, or decayed. Cf. Icel. *valtr*, 'easily upset.' If we take the compound to mean 'decayed house,' it is probable enough that it is correct. A common error is to explain *Wealt-* from *weald*, 'a wood'!" (Skeat, Berks. Pl.-Ns., pp. 59, 60.)

I see no reason to disagree with Skeat. See O.E. *hām* in Pt II.

Wadhurst.

1319 Wadeherst, *ibid.* iv. p. 429.

1633-4 Wadeherst, Vist. Ssx. p. 96.

O.E. *Wadanhurst*, "Wada's wood." *Wada* is a well-authenticated name in O.E. It is found, for instance, in a pl.-n. *Wadan-hlæw* in Cart. Sax. No. 50, and Searle gives almost a column of examples.

Wakehurst Place.

1284 Wakehurst, Abbr. Plac. p. 208.

1296 Wakehurst, Lewes Subs. Roll, Ssx. Arch. Soc. ii. p. 306.

1440-4 Wakehurst, Cal. Inq. ad quod D. p. 382.

The first element may be an O.E. **waca*, "a watcher," "a guardian." The ordinary word for a guardian was O.E. *weard* (mod. "ward"), but this **waca* (from the base **wak-* seen in *wacian*, "to be awake or watchful") may well have existed, although the dictionaries do not mention it. Compare the adj. *wacol*, "wakeful."

Skeat, Herts. Pl.-Ns., takes the first element of *Wakeley* to be O.E. *wacu*, "wake," "watch," "vigil" (i.e. as a festival). But the above explanation is equally probable. For the second element see O.E. *hyrst* in Pt II.

 1411-2 Walburton, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
 p. 135.
 1414 Walberton, Cal. Inq. ad quod D. p. 368.

"The tūn of Wealdburh." Searle quotes *Wealdburh* (also *Waltpurgis* (H.G. form), *Walburgis*, circa 780), daughter of Ricardus Rex, legendary king of the Anglo-Saxons, circa 770-80, from Hardy's Descriptive Catalogue of MSS. relating to the History of Great Britain and Ireland.

The development of the name is O.E. *Wealdburhtūn* > *Waldburhtūn* > *Walbur(h)tun* > *Walberton* (wōbætn). The -h of -burh was lost before the following t-. Cf. *Edburton* above.

Note the 1203 form above, which shows Norman-French diphthongising of *a* to *au* before *l*.

 p. 131.
 1489 Walderton, Cal. Inq. P.M. vol. iv. p. 395.

Simply the "tūn of Wealdhere." O.E. *Wealdhere(s) tūn*. *Wealdhere* is a very common pers. n. in O.E. from the earliest period. The modern *Walter* is a H.G. form of the same name. Cf. also the French *Gauthier* < Lat. **Waltharius*, a Latinised form of the same Gmc. name.

 1487 Waldron, Cat. Anc. Dds. vol. i. No. C 456, p. 430.

The first element is a pers. n. O.E. *Wealda*, a shortened form of some name like *Wealdhere*, *Wealdhelm*, etc. (cf. preceding name). The 1268 form *Waudern* above shows Norman-French diphthongising of *a* to *au* before *l*. Cf. *Walberton* above.

The second element is O.E. *ærn*, "a house." The modern (wɔ(l)drən) shows metathesis of M.E. *-ern* to *-ren*. See O.E. *ærn* in Pt II.

O.E. **Wēāla hnōc*, "the nook of the foreigners." Nos. (2) and (3) above contain the W.S. form **Wēāla hnōc*, No. (1) may contain either W.S. or non-W.S., but the modern form (wonək) is from O.E. **Wālahnōc*, non-W.S. > M.E. *Wālnok* > *Wannok* by assimilation. There is a glen at Wannock, Wannock Glen, a well-known feature of the place. This is certainly the *hnōc* referred to. Possibly the inhabitants took refuge in this glen, and held it for a time against the English.

See O.E. *āc*, **hnōc*, and *wealh* in Pt II.

Zachrisson (A.-N. Influence, p. 126, footnote), commenting on Stolze, who noted some cases of interchange of *-l-* and *-r-* in D.B., says that the D.B. *Walburgeton* = *Walberton* (q.v. above), and that *Warborgetone* = *Warbleton*; later 13th cent. *Warbilthun* (Type I, No. 4 above). He cites also from the early Fr. charters the form *Warborgultona*.

This seems to mean that the name *Warbleton* has the same origin as *Walberton* (i.e. O.E. **Wealdburhtūn*). If so the development in the 11th and 12th centuries is identical with that of the latter name, but later on in the former name the *l* and *r* interchanged, and **Walberton* became *Warbelton*, *Warbleton*. This is borne out by the evidence of the above forms, but it is rather curious that the names of two different places in the same county should have an identical origin.

Wormingherst } Vist. Ssx. p. 86.

I take the first element to be O.E. *wyrm*, "a serpent," "reptile," "worm," here used as a pers. n. in the form **Wyrma*. I can find no authority for its use as such in O.E. documents, but it may have been used in popular speech as a kind of

nickname. Cf. the widespread pers. n. *Orm* (from the O.Norse cognate *Ormr*), and the use of this name in Engl. pl.-ns. See, for instance, Wyld, *Lancs. Pl.-Ns.*, under *Ormerod* and *Ormskirk*. The second element is O.E. *hyrst*, "a wood" (q.v. Pt II).

Type I is O.E. **Wermanherst* (with Kt. *e* for *y* (> u + i)) and the ancestor of the modern (wōmīŋ(h)æst). O.E. **Wermanherst* > M.E. **Wermingherst*, -*hurst* > **Wærmīnghurst* (17th cent.) > **Wærmīnghurst* (18th cent.) > 19th cent. *wā(r)mīŋ(h)æst, and with rounding of *ā* after *w* > mod. (wōmīŋ(h)æst).

Type II is O.E. *Wyrmanhyrst* with the Southern type of the *y* in M.E. > mod. (*wālmīŋæst).

1492 Warnham, Cal. Inq. P.M. vol. iv. p. 411.

The first element is an O.E. pers. n. **Werna*, a shortened form of some name like *Wernbeorht*, *Wernweald*, *Wernwulf*, etc. The form *Werna* is found in O.E. pl.-ns. *Wernanbroc*, C.D. No. 270, *Wernanford*, C.D. Nos. 577, 1337, *Wernanwyll*, C.D. No. 1142.

1407 Warcamp, Cal. Inq. ad quod D. p. 358.

1422 Warcamp, Cal. Inq. P.M. vol. iv. p. 171.

For the first element, O.E. *Werna*, cf. preceding name. The second is most probably O.E. *camp*, *comp*, "camping-ground" (q.v. Pt II, and under *Barcombe* above).

The D.B. No. 2 form above shows the usual Lat.-Fr. initial *g*- for a Gmc. *w*-. Cf. *guêpe* and *wasp*, *garder* and *ward*, *Gauthier* and O.E. *Waldherè*, O.H.G. *Walthari*.

It is also possible that the first element was O.E. *Werneca*, a diminutive of *Werna*, and the second O.E. *hām*, as suggested by the D.B. No. 1 spelling. In this case O.E. **Werneca(n)hām* > late O.E. **Wernecam* > M.E. *Wernecamp* by confusion with the element *-camp*. Cf. the various types under *Barcombe* above.

1460-80 Warnyngled, Cowfold Accs., Ssx. Arch. Soc. ii. p. 322.)
 1477-8 Warmyngled, *ibid.* p. 320. }

The above forms are very late, but I think we are justified in assuming as the first element the O.E. pers. n. *Werna* (see the two preceding names).

For the second element I suggest an O.E. **gelād*, either (1) a mutated form of O.E. *gelād* (< Gmc. **galáidi*- < **galaiþ*-), or (2) an analogical form due to the influence of O.E. *gelēdan*, which is connected both in meaning and form. Cf. *Portslade* above.

O.E. **Wernan(ge)lād*, "the road or pathway of Werna," would normally give rise to the two forms above and to the modern (*wōniŋlid*), the final vowel being raised, probably because unstressed.

I take the first element to be an O.E. pers. n. **Wyrtele*, a diminutive of **Wyrta*, a shortened form of such a name as *Wyrtegeorn*. The second element may be the O.E. *ing*, *incg*, "a meadow," or else the original form was O.E. *Wyr(e)lingas*, "descendants of Wyrtele." Either is possible.

Type I has the Kentish vowel *e* for *y* (> u + i); Type II has the E. Midland; Type III the Southern. On the development of O.E. *Wer-* to mod. (w5-) see *Warminghurst* above.

Skeat, *Hunts. Pl.-Ns.*, p. 325, finds for *Washingley* the earlier forms *Wasinglei* in D.B. and *Wassinglee* in the Ramsey Chartulary. He explains the name as "the meadow of the Wassings," comparing Ssx. *Washington* and the D.B. form above.

The Sussex name is O.E. *Wassingatūn*, "tūn of the W.'s." Searle does not mention the *Wassings* themselves, but cites *Wassa* from a pl.-n. *Wassanburn*, Cart. Sax. No. 236, C.D. No. 140. The mod. (wofɪŋtən) of course is due to the analogy of the common verb *wash*.

The 1487 form seems to show a M.E. diphthongising of *a* to *ai-* before *sh-*. Cf. early forms of *Ashford*, *Ashport* in Walker, Derby. Pl.-Ns., also Morsbach, Me. Gr. § 87, Anm. 3.

O.E. *Wætling(as)* is generally taken to mean "sons of Wætla," and there is a tradition that a king of that name helped to build the famous way, but this is unsupported by historical evidence. See Duignan's long article on *Watling Street* in *Staffs. Pl.-Ns.*

Skeat derives the first element of the Herts. *Wigginton* from O.E. *Wicgan*, gen. sing. of the common pers. n. *Wicga*. But this would normally give a mod. (*widžin-).

I hazard the theory that the Ssx. *Wiggonholt* < O.E. **Wicganholt*, "Wicga's wood" (čġ = front stop). This O.E. *Wicganholt* later > **Wiggnholt* by syncope of the -a- and unfronting of -čġ- to -g- before *n*.

This would develop normally into a modern (wigənəlt). But it is unsatisfactory.

"The *tūn* of Wigstān," a well-known O.E. pers. n.; see the examples in Searle, p. 492. The modern name shows loss of the medial syllable—O.E. **Wigstānestūn* > **Wi(h)stānestūn* > **Wistānestūn* < **Wis(tns)tun*. The unpronounceable **Wis(tns)tun* became *Wiston* by dropping the medial -*tns*-. See "loss of syllables" in Phonology above, and O.E. *tūn* in Pt II.

The first element is O.E. *wipig*, "withy," "willow." This is a common element in pl.-ns. *Withy Grove* (nr. Manchester),

Withyford, Glouc.; *Wiðiglea*, Ind. Ch. and Rolls, p. 830, col. 1, =? *Withiel Flovey*, Somers.

The second element is O.E. *hamm*, (1) "enclosure," or (2) "bend in a river."

O.E. *Wihtheringas*, either patronymic or = "the meadow-land, watery-meadow of *Wihthere*," for which name see Searle, p. 494.

Searle quotes an O.E. pl.-n. *Wihtheringfalod*, Cart. Sax. No. 779, which contains this patronymic.

I cannot account for Type II *Wactringes*, if it be genuine. See O.E. *ing*, *incg* in Pt II.

 1409 *Wivelesfeld*, Cal. Rot. Ch. p. 213.
 1485 *Wyvelesfeld*, Ind. Ch. and Rolls, p. 831.

O.E. **Wifelesfeld*, "the field of *Wifel*." Searle quotes *Wifel*

from an O.E. pl.-n. *Wifelesford*, Cart. Sax. No. 699, C.D. No. 1109, also *Wifelesham*, Cart. Sax. No. 1067, C.D. No. 1236.

Walker finds this pers. n. in the early forms of the Derby. *Wilsthorpe* and *Willesley* (q.v. Derby. Pl.-Ns.). See O.E. *feld* in Pt II.

1411-2 Wodmancote, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
p. 140.

Either "the woodman's dwelling" or "Woodman's dwelling." Searle takes *Wudeman(n)* as a pers. n. in *Wudemannestun* in Cart. Sax. No. 1289, also a *Wudeman* as a tenant of Queen Æadgȳþ from C.D. No. 918, and Dipl. Angl. 427.

Either is equally probable.

"The tūn of Wulflāf," O.E. *Wulflāfantūn*, with substitution of the weak genitive suffix in *-an* for the strong in *-es*. The O.E. **Wulflāfestūn* is the ancestor of *Woollaston* in Staffs. (on which see Duignan, Staffs. Pl.-Ns.).

The name *Wulflāf* is well-authenticated in O.E.; see the examples in Searle.

See also *Barlavington*, and compare remarks under *Lavington* above.

 1381 Wolbedinge, *ibid.* iii. p. 36.
 1411-2 Wolbedyng, Subs. Roll, Hen. IV, Ssx. Arch.
 Soc. x. p. 131.

Duignan, Staffs. Pl.-Ns., under *Edingale*, says "...the best authorities...take *Woolbedington* from O.E. *Wulfbædingtūn*...." The difficulty is that no **Wulfbæd* is recorded in O.E.

There may have been an O.E. **Wulfbædu*, but I can give no other instance of *-beadu* as a second element in a pers. n., although it is common as a first.

Then again, if **Wulfbædu* meant "war-wolf," we should expect to find it in the usual form *Beaduwulf*. But the reconstruction of **Wulfbædu* is very tempting, and it jumps with the above forms.

 1327 Wourth, *ibid.* ii. p. 3.
 1439 Worthe, *ibid.* iv. p. 198.

O.E. *weorþ*, "enclosed land." Strictly speaking, Type I represents O.E. *weorþ* > M.E. *werth*; Type II is O.E. *weorþ* > M.E. *wurth*. Both types give rise to a modern (wāþ).

Worthing.

 1408 Worthyng }
 1456 Wordyng } Ind. Ch. and Rolls, p. 843.
 1587 Worthing }

The form *Worthing* seems to be practically synonymous with O.E. *weorþ* (q.v. in Pt II). Kemble has *andlang streāmes in wiððan weorðing* (C.D. iii. p. 391, No. 262). B.-T. cites also the O.E. forms *worþig*, *worþign*, dat. *worþine*, "close," "enclosed place." Duignan, *Staffs. Pl.-Ns.* p. xix, says that "the latter forms (i.e. *worþign*, *worþine*) have frequently, especially in Salop, hardened into *wardine*, e.g. *Shrawardine*, *Belswardine*, *Pedwardine*, *Cheswardine*, etc., and in the S.W. have become *worthy*, as in *Holsworthy*, *King's Worthy*."

1409 Wysburgh, Ind. Ch. and Rolls, p. 826.

1411-2 Wisebergh, Subs. Roll, Hen. IV, Ssx. Arch. Soc. x.
p. 138.

The second element was certainly originally O.E. *beorg*, *beorh*, "hill" (q.v. Pt II). The modern *Wyseberg* (= *waizbæ*) preserves this suffix to-day. The other modern form *Wisborough* shows the same confusion between M.E. *-bergh* and *-burgh* that we have seen in *Pulborough* and *Swanborough*. The first element was probably O.E. *wīsa*, "a wise man," possibly used here as a pers. n., or else a shortened form of such a name as *Wislāc*, *Wīsgār* etc., for which see Searle.

temp. Hen. VI, Jabiton, Tax. Eccl. p. 141.

Searle records a name *Eappa* < *Eadbeorht*, and such a name as **Eabba* may be the first element in Sussex *Yapton*. The *Y-* might then be due to the so-called "pre-iotization," for which cf. *York* > *Eoforwīc*, and the common spelling *yearth*, *yearthe* in the Prayer-Book of 1549.

B. Elements in Sussex place-names which are other than personal names.

(Research on such elements has been carried out by Wyld, *Lancs. Pl.-Ns.*, Pt II; Jellinghaus, *Engl. und Niederdeutsche Ortsnamen*, Anglia xx. pp. 257-334, and Middendorff, *Altenglisches Flurnamenbuch*, Halle, 1902. To avoid needless repetition I have frequently referred to these authorities for the distribution of the elements both in O.E. and Mod. E. In every case, however, I have given a full list of Sussex names which contain the element under discussion.)

1. The element *-ham*. This may either be O.E. *hām*, "homestead," or O.E. *hamm*, (1) "an enclosure," (2) "a bend in a river." Without O.E. forms it is impossible to decide definitely, but *-mm* spellings in M.E. make the derivation from *hamm* very tempting. See Wyld and Jellinghaus, on *hamm*, cf. Kemble's remarks in C.D. iii. Preface.

SUSSEX NAMES. (a) O.E. *hamm*. Barcombe (early forms), Beddingham, Felpham, Ham Manor, Hamsey, Twineham.

(b) O.E. *hām*. Appledram, Ashburnham, Barnham, Bilsham, Bineham, Birdham, Blackham, Bodiam, Bosham, Burpham, Chidham, Clapham, Eartham, Echinham, Graffham, Greatham, Hailsham, Hankham, Hardham, Higham, Icklesham, Kingsham, Marsham, Mundham, Northiam, Offham, Otham, Pagham, Parham, Patcham, Piecombe (see Pt I), Rackham, Shoreham, Sidlesham, Slaugham, Stedham, Stopham, Sulham, Telham Hill, Thakeham, Upwaltham, Warnham, Wepham, Withyham or Withiam.

(c) *No early forms*. Ambersham, Barham, Bedham, Bittlesham, Boreham Street, Brookham, Buckham, Chestham Park, Cokeham, Coldwaltham, Coolham, Cootham, Crowham, Ersham, Flansham, Hambrook, Horeham Road, Magham, Mallydame(?), Muntham, Westham.

2. The element *-ing*. See Alexander's article in *Essays and Studies*, vol. ii. pp. 158 ff., Wyld, *Lancs. Pl.-Ns.*, Pt II. *-ing* may be

(a) Medial *-ing-* representing O.E. *-an-* genitive singular, or *-inga-* gen. plu. of the patronymic, or *-wine* as the second element of a pers. n., or else it may be O.E. *ing*, *incg*, "water meadow," on which see Wyld, or even *-in*, *-egn*, adjectival suffix.

(b) Final *-ing(s)*, patronymic or = "water-meadow."

(c) Final *-ling*, a patronymic of a pers. n. ending in *-ol*, *-ele*.

SUSSEX NAMES in *-ing-*. (a) *medial*. Aldingbourne, Aldrington, Angmering (see early forms), Ardingly, Arlington, Ashington, Atherington (< O.E. *Æpelwinetūn*), Babintone or Bebyngton, Barlavington, Beddingham, Billingshurst, Blachington, Buddington, Chalvington, Chiddingly, Chiltington, Dallington,

Donnington, Durrington, Echin(g)ham, Folkington, Funtington, Hellingly Hollington, Itchingfield, Jevington (< O.E. **Gefwine-tūn* or **Gefantūn*), Lavington, Lidlington, Lordington, Lullington, Novington, Ovingdean, Piddinghoe, Pippingford Park, Racton (early forms in *Rakin*—), Rottingdean, Runtington, Rustington, Salvington, Sherrington, Shillinglee (O.E. pers. n. *Scilling*), Storrington, Strettington, Sullington, Tillington, Toddington or Tottington, Tortington, Tottingworth, Waddington, Warminghurst, Warningcamp, Warninglid, Washington, Whatlington, Willingdon, Wilmington, Woldringfold, Woolavington.

(b) Final *-ing(s)*. Beeding, Climping, Faulking or Folking or Fulking, Ferring, Fletching, Fyning, Goring, Harbreating, Harting, Iping, Lancing (< O.E. *Wlencing*, see Pt I), Malling, Oving, Patching, Peppering, Poling, Sompting or Sumpting, Steyning, Tarring, Wittering, Woolbeding, and Hastings and Poynings, with *-s*.

(c) Final *-ling*. Ashling, Birling Gap, Brightling, Cockmarling, Didling or Dudelyng, Ditchling, Guestling, Maundling or Maudlin, Wartling.

3. M.E. and Mod. Engl. *-mere* and *-more*. Many names containing M.E. *mere* may be derived either from O.E. *mere*, "lake," "pond," or O.E. *gemāru*, "boundary," and similarly names containing M.E. *-more* may go back to O.E. *mōr*, "moor," or to **gemāre*, an unmutated form of *gemāru*. In the absence of evidence from O.E. it is impossible to be certain. On *gemāru* see Wyld, *Lancs. Pl.-Ns.*, under *Moreton* in Pt I, for *mere* see Jellinghaus, *Engl. und Ndd. Ortsn.*, Anglia xx. p. 306.

SUSSEX NAMES. (i) *-mere*. Cuckmere Haven, Falmer, Haremere Hall, Keymer (probably O.E. *-mere*), Linchmere, Marden, Stanmer, Tangmer, Udimore (early forms all in *-mer(e)*). (ii) *-more*. Codmore Hill, Tilsmore Corner.

4. *Elements denoting geographical or topographical features.*

O.E. *brōc*, "a brook." In Kent and Sussex dialects "brook" means "low-lying ground," not necessarily containing running water (E. D. D.).

For the distribution of O.E. *brōc* and its history see Wyld, Pt I, under *Broughton*, and Part II under *brōc*. See also the

remarks of Jellinghaus on the meaning and derivation of the word (p. 272).

SUSSEX NAMES. Bolebrook, Brookham, Brookhouse, Brook's Green(?), Hambrook, Highbrook, Holbrook, Kidbrooke Park, Parbrook, Tidebrook.

O.E. *burna*, "brook," "stream," "river"; Mod. Scot. *burn* (= *börn*). See Wyld.

SUSSEX NAMES. Albourne, Aldingbourne, Ashburnham, Caburn, Easebourne, Eastbourne, Ecclesbourne Valley, Fishbourne, Glyndebourn, Nutbourne, Southbourne, Westbourne. Cf. *Bournemouth* in Hants.

O.E. *camp*, "camping ground," a loan-word from Lat. *campus* (Skeat, Hunts. Pl.-Ns.). O.E. *-camp* sometimes alternates in the early forms with *-k* + *hām*, *-k* + *hamm*, and also with *-combe*.

SUSSEX NAMES. Barcombe (early forms), Warningcamp.

O.E. *clæg*, "clay," "mud," "slime." See Wyld.

SUSSEX NAME. Clayton and Clayton Urban.

O.E. *cnæp*, "top," "cop," "vertex." See Wyld.

SUSSEX NAME. Knepp Castle.

O.E. *cnoll*, "hillock"; cf. Dan. *knold*, Swed. *knöl*, and Welsh *cnol* (Skeat, Etym. Dict.); Jellinghaus, p. 300, cites *Nolle* in Westphalia, and *Anknol* near Calais. He says the word is not Celtic, as Skeat thinks, and refers to Grimm's Wörterbuch, 1467.

SUSSEX NAME. Broomhill (early form *Bromy knoll*).

O.E. **cocc*, "ravine," "narrow valley." See Wyld and Middendorff. Many names beginning with *Cock-* may have as the first element the name of the bird or the O.E. pers. n. *Cocca*.

SUSSEX NAMES. Cocking(?), Cokeham(?), Cockmarling(?).

O.E. *cop*, "top," "head," "crest"; German *kopf*; see Wyld and Jellinghaus.

SUSSEX NAMES. Copsale (< **copes-halh*), Copthorne.

O.E. *cumb*, *comb*, "a hollow in a hill-side," narrow valley." This is a very common element in Engl. pl.-ns. It is originally a Celtic loan-word (Skeat, Etym. Dict. sub *combe*), and is rare in Yorks., Lincs., Lancs., Northumberland, Surrey, and non-existent

in Old East Anglia, Cumberland, Westmoreland (Jellinghaus, p. 301). However it is fairly common in Sussex. There are numerous *Coombe's* in England, and most of the *Compton's* have O.E. *cumb-* as the first element (but not so the Derby. *Compton*; see Walker, Derby. Pl.-Ns.).

SUSSEX NAMES. Balcombe, Barcombe (see *camp* above and Pt 1), Compton, Coombes, Moulescombe, Piecombe (see early forms in Pt 1), Prestcomb, Saddlescombe, Sedlescombe *or* Selscombe, Telscombe. See also Jellinghaus, Westfäl. Ortsn. p. 88, for the continental *Kump* = "Bodenfläche, die einem Kumpe, einem Napfe ähnlich ist."

O.E. *dell* (< **dalja*); cf. *dæl*, "dale" in Wyld. *-dale* is never found as a second element in Sussex. The only Sussex name in which *dell* occurs is Arundel (q.v. Pt 1).

Mod. Engl. *ey* = (1) *ēā*, "stream," "water," "river." O.Fris. *a, e*; O.S. *aha*; O.H.G. *aha* < Gmc. **ah^wa*.

(2) **ēā*, "watery-land," "water-meadow"; O.H.G. *ouwa*; N.H.G. *-aue* < Gmc. **awa* < **a^gwa*.

(3) O.E. *īēg*, *ēg*, "island," "elevated piece of land, wholly or partially surrounded by water" [Wyld, Pt 11].

See also Jellinghaus, p. 279, under *-ey*.

SUSSEX NAMES. Bolney, Hamsey, Horsey, Iden, Ifield, Ifold, Iford, Iham(?), Iridge Place, Langley (early forms *Langenee*, *Langeneie*), Lidsey, Pevensey (O.E. *ēā*), Pilsey Isle, Selsey (O.E. *ēg*), Shripney (O.E. *ēg*), Thorney, Winchelsea.

O.E. *denu*, "a valley," *denn*, "a retreat." See Wyld. It is often impossible to distinguish these elements in M.E.

SUSSEX NAMES. (1) O.E. *denu*. Adsdean, Belmoredean, Bevendean, Charman Dean, East and West Dean, Denton, Egdean, Findon (early forms), Gosden, Hampden Park, Houndean, Housedean, Iden(?), Marden, Oakendean, Ovingdean, Playden, Rottingdean, Sharnden(?), Standean, Swiftsdean, Upmarden, Withdean. (2) O.E. *denn*. Cranesden(?), Denne Hill, Densworth, Highden(?). These elements often interchange in the early forms with O.E. *dun*, "down," "mountain," "hill," for which see Wyld and Jellinghaus. Examples of this interchange are given in the Introduction, under "Word Formation."

SUSSEX NAMES. in *dūn* are Allan Down, Ashdown, Blackdown House, Down Ash, Down House, The Downs, Findon (early forms also in *-den*), Five Ash Down, Hadlow Down, Highdown Hill, Marden and Upmarden (see Pt I), Oakdown, Piltdown, Slindon and Willingdon.

O.E. *fēld*, "field"; see Wyld and Jellinghaus. For interchange of *-feld* and *-fald* (q.v. under (9) below) see "Word Formation" in the Introduction.

SUSSEX NAMES. Catsfield, Cuckfield, Enfield Common, Framfield, Freshfield, Hartfield, Heathfield, Henfield, Highfields, Ifield, Isfield, Itchingfield, Jolesfield, Lindfield, Lowfield Heath, Maresfield, Mayfield, Mountfield, Netherfield, Ninfield, Portfield (q.v. Pt I), Rotherfield, Salsfield Common, Staplefield, Uckfield, Watersfield, Westfield, Wirlesfield.

The local pronunciation of *-field* as a second element is (-vəl), with loss of *d* and initial voicing. Hence *Heathfield* (= Hεfl), *Rotherfield* (= radəvəl) or (radəvəl).

O.E. *ford*. On *ford* and the Norse *ffjorðr* see Wyld.

SUSSEX NAMES. Avisford, Broadford Bridge, Dumpford, Ford, Ford's Green (pers. n.?), Guilford, Iford, Kirdford, Pippinford Park, Redford, Seaford, Treyford, Twiford.

O.E. *grāf*, dat. *grāfe*, "grove." See Wyld.

SUSSEX NAMES. Birch Grove, Boxgrove, Chilgrove, Michelgrove. The name *Gravenhurst* (no early forms), as pronounced (greivənhɹst), may be due to a spelling pronunciation from M.E. **Gravenhurst*, or it may contain a (weak) inflected form of O.E. *græf*, "trench," for which see *Graffham* above.

O.E. *haga*, "hedge," mod. *haw-* in "hawthorn." See Wyld. The only SUSSEX NAME in which *haga* occurs in Sweetheaws.

O.E. *halh*, "corner," "angle." For the older ideas as to the meaning of *halh*, *healh*, and a discussion on it see Wyld. It is often difficult to decide whether names in *-hall* may be referred to this element, or to O.E. *heall*, "a hall." On this point see Jellinghaus, p. 285. -

SUSSEX NAMES. Buxshalls(?), Copsale, Hall Green, Halton(?), Lurgashall. The Lancs. *Haulgh*, near Bolton, is

locally pronounced (hof) and preserves the M.E. spelling of the independent word.

O.E. *hæþ*, "heath," "waste land." German *Heide*; see Jellinghaus. Occurs in Heathfield, Lowfield Heath. The name *Hoathley* contains O.E. **hāþ*, a hypothetical unmutated form.

O.E. *hlinc*, *hlenc*. Mod. "link" (cf. "golf links"), *-linch* and *-lench* in pl.-ns. See Wyld, Pt II, and Jellinghaus, p. 305.

SUSSEX NAMES. Crowlinke, Linch *or* Lynch, Linchmere, Stonelynk.

O.E. **hnōc*, M.E. *nook*, "a corner," "angle," "nook." The history of the word is doubtful, see Wyld. **hnōc* may form the second element of Sussex *Wannock*.

O.E. *hōc*, "hook," "corner of land," see Wyld.

In O.E. pl.-ns., *Wirtroneshóc*, C.D. iii. 97 (cit. Jellinghaus). The name *Hooke* is common all over England.

SUSSEX NAMES. The Hooke, Rowhook.

O.E. *hōh*, "hough," "heel of land." Gmc. **hanχ-*; cf. O.Norse *hā*.

-hōh appears in M.E. as *hough*, the datives *hōe* and *hōge* variously as *-hoo*, *-hoe*, *-howe*. Mod. *-hoe* (= *hou*) is due to a late lengthening of the M.E. unstressed *-ho*. For a discussion of this element see Wyld; Jellinghaus, pp. 291-2.

SUSSEX NAMES. Ebernoe, Hooe, Houghton (*not* from **hōc-tūn*), Howe, Piddinghoe. In the last name the *-hoe*, *-howe* spellings alternate with *-hey* (< O.E. *gehæge*) in the earlier forms.

O.E. *holt*, "a wood"; cf. Germ. *holz*. See remarks under *Hazelwood* in Pt I. A common element in Engl. pl.-ns.; Jellinghaus, p. 923, cites *Æscholt*, C.D. v. 103 (= *Aisholt*, Somers.), and *bocholte*, C.D. iii. 377 (anno 724) (= *Bookholt*, Kent), and gives also the continental distribution of the cognate *-hout*, *-houte*.

SUSSEX NAMES. Hazelwood (early forms), Holtye, Wiggonholt.

O.E. *hrycg*, "ridge," "side of a hill"; cf. Germ. *Rücken*. See Wyld.

SUSSEX NAMES. Brantridge, Eridge Green, Iridge Place.

O.E. *hyll*, "hill." See Wyld, Jellinghaus, and Middendorff.

SUSSEX NAMES. Barrow Hill, Best Beech Hill, Bexhill (q.v. Pt 1), Boarzell, Borde Hill, Bow Hill, Broomhill (early form in *-knoll*), Buchan Hill, Buckham Hill, Burgess Hill, Burton Hill, Castle Hill (early forms *Castelowe*), Chick Hill, Cissbury Hill, Codmore Hill, Crocker Hill, Danehill, Darrell Hall(?), Denne Hill, Galley Hill, Gore Hill, Hamsell(?), Henley Hill, Highdown Hill, Holly Hill, Mare Hill, Newells(?), Pax Hill Park, Perry Hill, Pitshill, Pixton Hill, Poundhill, Rotherhill, Salt Hill Park, Saxonbury Hill, Scagne's Hill, Shepherd's Hill, Standard Hill, Stub Hill, Summer Hill, Telham Hill, Tower Hill, Tripp Hill, Trundle Hill, Turner's Hill, West Hill, White Hill, Windmill Hill Place.

O.E. *hyrne* (*horn*), "corner"; see Jellinghaus, who cites *oð Doddinghyrnan*, C.D. i. 1; *on Hornan þæm wudu*, C.D. ii. 46. The mod. pers. n. *Hearne* presupposes the O.E. Kt. form **herne*.

SUSSEX NAMES. Horncroft and Imberhorne.

O.E. *hyrst*, "wood"; cf. O.H.G. *hrusten* = *ornare* (B.-T.) and mod. Germ. *-horst*.

A very common element in Engl. pl.-ns. O.E. *hyrst* always appears in Sussex as *hurst* or *herst*, never *hirst*, and is normally pronounced (-æst) as a second element.

SUSSEX NAMES. Ashurst, Ashurstwood, Bramblehurst, Buckhurst Park, Chithurst, Coghurst Hall, Coneyhurst, Coolhurst, Crowhurst, Ewhurst *or* Yewhurst, Fernhurst, Gravenhurst, Greenhurst, Herst- *or* Hurstmonceaux, High Hurstwood, Horsted (*Hirsted* occurs among the early forms; see Pt 1), Hurst, Hurst Green, Hurstpierpoint, Isenhurst, Laurelhurst, Lydhurst, Madehurst, Maplehurst, Midhurst, Normanhurst, Nuthurst, Paddockhurst, Penhurst, Rotherhurst, Salehurst, Spithurst, Stonehurst, Ticehurst, Wadhurst, Wakehurst Place, Wallhurst, Warminghurst, Wimbleshurst, Woldhurstlea, Woodhurst, Wykehurst.

O.E. *land*, *lond*, "land," "piece of land"; see Wyld.

SUSSEX NAMES. Beechlands, Blacklands, Bridgland, Furnace (early form *Furneysslond*; see Pt 1), Halland, Huntsland, Northlands, Oaklands, Oldlands.

O.E. *mersc*, "marsh." Common as an independent word in O.E., and as a component of pl.-ns., e.g. *Bicamersc*, C.D. iii. 15; *Stodmersche*, C.D. i. 31 (= *Stodmarsh*, Kent).

SUSSEX NAMES. Merston, Maresfield, Marsham (see all these names in Pt I), Wardley Marsh.

O.French *munt* < Lat. *montem*. See Wyld, Pt II.

SUSSEX NAMES. The Mount, Mount Harry, Mountfield (but see this name in Pt I), Muntham.

O.E. *næss*, "ness," "headland"; see Wyld. Jellinghaus defines O.E. *næsse* as "erdzunge in die see oder in die ebene, vorgebirge." In Southamptonshire *nose* = "a neck of land" (p. 308). Cf. the mod. names *Dungeness*, *Skegness*, *The Naze*, *Naseby*, etc.

SUSSEX NAMES. Langness, Wilderness (or is this simply called *W.* because of its situation, or of the poverty of the land?).

O.E. *ōfer*, "bank," "shore" = Germ. *ufer*. Commonly appears in M.E. as *-over*, *-ore*, in the latter case causing confusion with O.E. *ōra*, which had a similar meaning. See Jellinghaus, p. 309.

SUSSEX NAMES. Bignor, Bolnore(?), Southover.

O.E. *ōra*, "bank of a stream"; "rand," "ufer," "ecke" (Jellinghaus).

In O.E. pl.-ns.—*Billanora*, C.D. ii. 74 (*Bilnor*, Kent), *Cumenoran*, C.D. i. 271 (*Cumnor*, Berks.) cit. Jellinghaus. Cf. also the modern *Windsor*, *Hadsor*, etc.

SUSSEX NAMES. Bognor, Bolnore (? or *ōfer*), West Itchenor, Ore.

O.E. *pōl*, "pool." Also *pul*. See Wyld, Pt II, also under *Liverpool* in Pt I; Jellinghaus, p. 310, who says *pōl*, *pull* are "häufig in namen."

SUSSEX NAME. Pulborough.

O.E. *sceaga*, "shaw," "wood"; see Wyld and Jellinghaus.

SUSSEX NAME. The Shaw.

O.E. **score*, M.E. *schore*, "shore"; see Skeat, Etym. Dict. Only appears in one Sussex name, *Shoreham*.

O.E. *sǣ*, "sea." See Wyld.

SUSSEX NAMES. Seabeach, Seacox House, Seaford.

O.E. *stān*, "stone"; see Wyld and Jellinghaus.

SUSSEX NAMES. Hunston, Standean, Stane Street(?), Stanmer, Stansted, Stonecross, Stonegate, Stonehurst, Stonelynk.

O.E. *twisla*, "fork of a river or a road"; O.H.G. *zwisila*, "fork," "bent or forked twig"; O.Norse, *kvisil*; see Wyld.

SUSSEX NAME. Twisley.

O.E. *weald*, *wald*, "forest"; Mod. *-wold* (would) represents the O.E. Mercian type *wald*; *weald* (wild) goes back to the W.S. fractured *weald*.

SUSSEX NAMES. The Weald, Burwash Weald, Woldhurstlea, Woldringfold(?).

O.E. *well*, *wiell*, *wyll*, "a well"; often confused in M.E. with *-wall* < O.E. *weall*, "a wall"; cf. *Aspin(w)all* < O.E. *æspenwell*.

SUSSEX NAMES. Brickwall(?) (or is this what it appears to be?), Buckwell, Colwell, Duddleswell, Flinwell, Fontwell, Graylingwell, Holywell, Miswell, Shoyswell Manor.

O.E. *wudu*, "wood"; see Wyld and Jellinghaus.

SUSSEX NAMES. Abbot's Wood, Ashurstwood, Beechwood, Borden Wood, Chelwood, Coldharbour Wood, Cowsley Wood, Goodwood, Hammerwood, Hazelwood (q.v. Pt I), High Hurstwood, Loxwood, Valewood, Wildham Wood, Woodcote, Woodend, Woodhurst, Wodmancote or Woodmancot, Woodman's Green, Wood's Green (or is *wood* here a pers. n.?).

5. *Elements denoting divisions or portions of land.*

O.E. *æcer*, "a field," "land." See Wyld and Jellinghaus.

SUSSEX NAME. Halnaker.

O.E. *croft*, "croft," "small, enclosed field." See Wyld and Jellinghaus.

SUSSEX NAME. Horncroft.

O.E. (non-W.S.) *erþ* (< **arþi*), "ploughed land." See Wyld.

SUSSEX NAME. Eartham.

O.E. *leah*, "pasture land," "open meadow." See Wyld, Pt II, and Jellinghaus, p. 304, under *lea*. This element appears

in modern Engl. variously as *-ley*, *-leigh*, *-lea*, and *lee*, and its continental cognate as *-loh*, *-loe*, *-loo*.

Professor Wyld tells me that this element used to be pronounced in Sussex as (*-lai*) with a secondary stress, but that it is now usually (*-li*). This older (*-lai*), if it is not a mere spelling-pronunciation, must represent the O.E. dative *lēage*. Cf. the development of *high* < O.E. *hēāh* and *eye* < *ēāge*.

SUSSEX NAMES. Abbotsleigh, Amberley, Ardingly, Baldslow (earliest forms in *-lei*), Beckley, Chailey, Chiddingly, Chorley Common, Cowsley Wood, Crawley and Crawley Down, Earnley, Fairlight (q.v. Pt I), Glenleigh House, Hadlow Down (earliest forms in *-leg*), Hellingly, Henley, Highleigh, Hoathley, Kingley Bottom, Kingsley Hill, Langley, Leonardslee, Lumley, Marklye, Nutley, Pashley, Ripsley, Shillinglee, Shipley (note early forms in *-lake* in Pt I above), Twisley, Verdley, Wardley Marsh, Whiligh and Whyly, Woldhurstlea.

O.E. **mylde* (< **muldi*), a by-form of O.E. *molde*, "dust," "sand," "earth." Possibly this element exists in Rodmell (q.v. Pt I).

O.E. *timber*, "land zum bau von kirchen gegeben" (Jellinghaus, p. 323). For distribution see this article.

SUSSEX NAMES. Newtimber, Nytimber.

6. *Elements denoting landmarks and artificial features.*

O.E. *beorg*, "a hill," dative *beorge*. The O.E. nominative appears in modern names as *-bergh* or *-ber*; e.g. in *Sedbergh*, the dative generally as *-barrow*. See *Cringelbarrow* in Wyld, *Lancs. Pl.-Ns.*, Pt I.

O.E. *beorg* is often confused in early forms of pl.-ns. with O.E. *burg* (q.v. under (9) below). Leithaeuser Berg. Ortsn., notes a similar interchange in such continental names as *Beyenberg* (c. 1200 *Bienberg*, 1396 and later mostly *Byenborg* or *Byenburg*). For other examples see Berg. Ortsn. pp. 12, 13, also Jellinghaus, Westf. Ortsn. pp. 3, 11.

SUSSEX NAMES. (i) O.E. *beorg*—Wyseberg.

(ii) O.E. dative *beorge*—Barrow Hill.

(iii) O.E. *beorg* confused with *burg*—Pulborough, Swanborough, Wisborrow *or* Wisborough Green (also called Wyseberg as in (i) above).

M.E. and Mod.E. *cross* (cf. O.Norse *kross*, originally a Celtic loan-word, cf. Lat. *crūx*, *crūcem*. Skeat, Etym. Dict.). See Wyld, Pt II, under O.Norse *kross*.

SUSSEX NAMES. Ball's Cross, Crossbush, Cross-in-Hand, Crowborough Cross, Handcross, High Cross, John's Cross, Mark Cross, Ringle's Cross, Sandy Cross, Southern Cross, Staplecross, Stonecross, Three Legged Cross, Wychcross Place (*and* Faircrouch?).

Mod.E. *gate*, O.E. *gatu*, *gatum* (plural type; the nom. *geat* would produce modern *yate*, *yett*, as in the pers. n. *Yates*). The *-yate*, *-yett* forms never appear in Sussex. See Wyld, Pt II. On O.E. *geat* and the modern word *gate* see also Jellinghaus, p. 283.

SUSSEX NAMES. Durgates, Eastergate, Faygate, Fishergate (see Pt I), Horsgate, Monksgate, Northgate House, Polegate, Rogate, Sandgate, Shortgate, Tilgate Forest, Watergate House, Westergate.

O.E. *hæcce*, "a gate (made of lattice-work)," mod. "hatch." Westphalian German *hacke* = "gartentor," "hofpforte" (Jellinghaus). For the distribution of the element in O.E. see Jellinghaus, Engl. und Nddtsche Ortsn. pp. 288-9.

SUSSEX NAMES. Coleman's Hatch, Trulls Hatch. "Hatch" is a very common surname in mod. Engl.

O.E. *gehæge*, "boundary," "fenced-in way." See Wyld.

SUSSEX NAMES. Heyshot, Piddinghoe (early forms), Roffey *or* Roughey.

Mod. *haven* < O.E. *hæfen*. Jellinghaus, p. 289, cites no examples of *hæfen* in O.E. pl.-ns., but gives mod. Engl. *Whitehaven* (Cumb.), *Haveningham* (Suff.), older *Hæfenanham* (no reference).

SUSSEX NAMES (no early forms). Cuckmere Haven, The Haven, Newhaven.

O.E. *hlāw*, *hlāw*, *hlā*, "burial-mound," "tumulus," "rising-ground." See Wyld and Jellinghaus. It is sufficient here to note the three types—

- | | |
|---|----------------------------------|
| (1) O.E. <i>hlā</i> (nom.) > <i>-low(e)</i> (= lou), | } both locally pronounced (-lə), |
| (2) O.E. <i>hlāwe</i> (oblique cases) > <i>-lawe</i> (= lā), | |
| (3) O.E. <i>hlāw</i> (nom.) > <i>-lew</i> (= lū, ljū) as in the surname <i>Marblew</i> (= mātlu or mātljū). | |

SUSSEX NAMES. Baldslow (earlier forms also in *-lei*), Cudlawe or Cudlowe, Lewes, Lowfield Heath.

O.E. *gelād*, "way," "path"; cf. Gthc. *galaiþs*, *galaiþjan*.

SUSSEX NAME. Portslade (q.v.).

O.E. **gelæd*, a mutated or analogical form of the above.

SUSSEX NAME. Warninglid (q.v.).

O.E. *port*, "direkt aus dem Romanischen; französ. *port*. Rechts und links vom Unterrhein kennt man keine mit lat. *portus* gebildete namen...*Bridport*, Dorset = *Brideport*, D.B. 75" (Jellinghaus, p. 310). On O.E. *port* and *porte* see also Middendorff, Altengl. Flurnamenbuch.

SUSSEX NAMES. Beauport, Gosport.

Engl. *snape*; M.E. *snāpe*, "poor or boggy pasture"; see Wyld.

SUSSEX NAME. Snape.

Engl. *spar*, literally "a beam," "bar," "rafter," possibly used as a boundary mark, although not recorded in O.E.; M.E. *sparre* in Cant. Tales—"...and rente adoun both wal and *sparre* and rafter" (Knights Tale, A, l. 990, in Skeat's Ed.). The word does not exist in O.E., although the verb *sparrian*, "to fasten with a bar or bolt," is found. For a discussion of the word see Skeat, Etym. Dict. under *spar*.

E.D.D. only gives the common meanings "wooden bar," "bolt," "rafter," "small transverse timbers of a roof to which the rafters are nailed." Possibly the word existed in O.E. with the meaning "timber," "stick" or "pole," used as a boundary mark (cf. *Polegate*, *Poling*).

SUSSEX NAME. Rusper.

O.E. *strēt*, *stræt*, an early (W.Gmc.) loan-word from Lat. *strata* (*via*), O.H.G. *strāzza*.

Jellinghaus says "...in einigen Namen wie *Street* (Ssx.), *Buckle Street* (Worcs.) < *Buggilde Stret*, C.D. iii. 376. Die Namen beziehen sich wohl stets auf römische Strassen."

SUSSEX NAMES. *Streat or Street*, Strettington(?); Bodle St., Boreham St., Cade St., Coggins Mill St., Gardner St., Gay St., Hewin St., Lynnick St., Milton St., Stane St.

7. *Elements denoting trees, plants, and vegetation.*

O.E. *āc*, "oak." See Wyld and Jellinghaus.

SUSSEX NAMES. Broadoak, Five Oaks, Four Oaks, Mile Oak, Oakdown, Oaklands, Oakwood.

O.E. *ācen*, adj. "oaken."

SUSSEX NAME. Oakendean.

O.E. **ācen* (*c* = back-stop), a by-form of *ācen*.

SUSSEX NAME. Eckington (q.v. Pt I).

O.E. *æsc*, "ash-tree." In many cases *Ash-* in pl.-ns. may be the O.E. pers. n. *Æsc*, *Æsca*. See the names in Pt I above.

SUSSEX NAMES. Ashburnham, Ashurst, Ashurstwood, Burwash, Five Ash Down.

O.E. *alor*, "alder-tree." See Wyld.

SUSSEX NAME. Aldrington (which may, however, contain the pers. n. *Ealdhere*).

O.E. *apuldor*, "apple-tree."

SUSSEX NAME. Appledram *or* Apuldram.

O.E. *bēān*, "bean," "vetch" = N.H.G. *bohne*; see Wyld.

SUSSEX NAME. Binsted (q.v. Pt I).

O.E. *birce*, "birch."

SUSSEX NAME. Birch Grove.

O.E. *beorc*, a by-form of *birce*, etymologically = mod. "bark."

SUSSEX NAMES. Barcombe, Barkfold House.

O.E. *box*, "box-tree" = Lat. *buxus*; Gk. *ποξός*. A very common element in Engl. pl.-ns.; see Wyld, also Skeat, Cambs. Pl.-Ns., under *Boxwood*, Herts. Pl.-Ns., under *Boxmoor*.

A mutated form of the word O.E. **byxe*, is the first element of Ssx. *Bexhill*, which has early forms in *Bex-*, *Bix*, and *Bux-*.

SUSSEX NAMES. Boxgrove and Bexhill-on-Sea.

O.Fr. *bois*, "a wood." See Skeat, Hunts. Pl.-Ns., under *Warboys*, and cf. the mod. pers. n. *Boyce*.

SUSSEX NAME. Blackboys.

O.E. *brēmel*, *bræmel*, *bræmber*, "bramble," allied to *brōm*.

SUSSEX NAMES. Bramber, Bamblehurst, Brambletye.

O.E. *brōm*, "broom," "genista." See Wyld.

SUSSEX NAMES. Broomhill and Broomers Corner.

Engl. *bush* < O.E. **bysc*. For a discussion of the word see Skeat, Etym. Dict., s.v., and Herts. Pl.-Ns., under *Bushey*. The ultimate origin of the word is "Late Lat. *boscus*, of unknown origin, whence also French *bois*" (Skeat).

Jellinghaus, p. 275, points out *Warboys* as having *-bush* for its second element.

Or is it not possible that mod. *bush* may be a French loan-word from *buisson*, *boisson*; mod. Fr. *buisson*?

SUSSEX NAMES. Bewbush (= O.Fr. **belbuisson*), Crossbush, Holmbush.

O.E. *ēw*, *īw*, "yew" = N.H.G. *cibe*. Occurs in O.E. pl.-ns. *Eowcumb* (C.D. No. 313), *Eowhryc* (Ewridge) (No. 495), *Iwden* (No. 452).

SUSSEX NAME. Ewhurst, Yewhurst.

O.E. *fearn*, "fern." A very common element; see Wyld.

SUSSEX NAME. Fernhurst.

O.E. *hæsel*, "hazel"; O.H.G. *hasal*, *hasul*; see Wyld.

SUSSEX NAMES. Hazelwood, Haslet.

O.E. *hnutu*, "nut," "nut-tree"; see Wyld.

SUSSEX NAMES. Nutbourne, Nuthurst, Nutley.

O.E. *holegn*, *holen*, adj. "of holly"; see Wyld.

SUSSEX NAMES. Hollington (Rural and St John).

O.E. *holm* (not O.Norse *hōlmr*) = "holly," "holly-bush"; see remarks under *Holmestrowe* in Pt I.

SUSSEX NAMES. Holmbush, Holmestrowe, Holmstead, Inholm(?), (no early forms).

O.E. *mintē*, "mint" < Lat. *mentha*.

SUSSEX NAME. Minsted.

O.E. *secge*, "sedge," "sword-grass"; O.H.G. *sahar*. See Jellinghaus, p. 313.

SUSSEX NAMES. Sedgebrook (a very common Engl. pl.-n.), and Sedgwick (= sedžik).

O.E. *trēō*, dat. *trēōwe*, "tree"; see Wylde and Jellinghaus.

SUSSEX NAMES. Crabtree, Holmestrowe, Treyford.

O.E. *þorn*, "thorn," "thorn-bush," "thorn-tree," also O.E. *þyrne*, "thorn-tree."

SUSSEX NAMES. Copthorne, Island of Thorns *or* Thorney Isle, Sharpthorne.

8. *Elements denoting names of animals and birds.*

In many cases it is impossible to decide whether such elements as *Catt*, *Earn*, *Wulf* refer to animals or to men. The presence of a genitive suffix argues in favour of a pers. n., although it is not absolutely conclusive. See Wyld, Pt II. The following are examples in Sussex.

O.E. *bār*, "boar."

SUSSEX NAMES. Boar's Head, Boarzell (= *bāreshyll), Borden Wood(?).

O.E. *ceatt*, *catt*, "cat." Probably the Sussex *Catsfield Place* contains the O.E. pers. n. *Catt*; see the name in Pt I.

Mod. *coney*, M.E. *conī*, *conyng* < A.Fr. *conil* < Lat. *cūniculus* (Skeat, Etym. Dict.).

SUSSEX NAMES. Coneyhurst and Conyboro.

O.E. *crāwe*, "crow"; see Wyld, also *Crāwe*, a female pers. n.

SUSSEX NAMES. Crowborough, Crowhurst, Crowham.

O.E. *cū*, "cow."

SUSSEX NAMES. Cowfold, Cowbeech(?), Cowsley(?) (or does

this contain the pers. n. *Col?*). The genitive plu. *c̄ya* appears in Sussex *Keymer* (q.v. above).

O.E. *earn*, e.g. "eagle"; cf. Gk. *ōpvis*.

SUSSEX NAME. Earnley.

O.E. *fise*, "fish." Often a pers. n.; see Wyld, Pt II.

SUSSEX NAME. Old and New Fishbourne.

O.E. *gōs*, "goose"; O.H.G. *gans*; O.Norse *gás*; see Wyld. There was also an O.E. pers. n. *Gōsa*.

SUSSEX NAMES. Gosden, Gosport.

O.E. *hana*, "cock"; O.H.G. *hano*; Gthc. *hana*.

SUSSEX NAME. Henfield (q.v. Pt I).

O.E. *heorot*, "a hart," "stag." For examples of *heorot* in O.E. see *Hartfield* in Pt I.

SUSSEX NAMES. Hartfield, Harting E., S., and W.

O.E. *hors*, "horse"; also the pers. n. *Horsa*.

SUSSEX NAMES. Horse Eye, Horsbridge, Horsey, Horsgate, Horsham, Horsted and Horsted Keynes.

O.E. *hriper* (< **hrinþri*) and *hrȳðer* (< **hrunþri*), "ram," "horned beast." See Wyld, Pt II. Appears in mod. Ssx. names as *Rother-* (= *raðð* or *radə*), possibly influenced by the O.E. pers. n. *Hrōþhere*. Such names as *Rotherham*, *Rutherford*, etc. are very common in England.

SUSSEX NAMES. Rotherbridge or Robertsbridge (q.v. Pt I), Rotherfield (q.v. Pt I), Rotherhill and Rotherhurst.

O.E. *seolh*, gen. *sēoles*, "seal"; O.H.G. *selah*.

In O.E. pl.-ns. *Seolesburne*, C.D. Nos. 535, 597, 763, 1031, 1107, 1145 = *Sealsbourn*, Hants.; *Seolescumb*, ibid. No. 763, = *Sealscombe*, Hants. (cit. Kemble, Index to C.D. vol. vi).

SUSSEX NAME. Selsey (q.v. Pt I).

9. *Political and economic designations, including shelters and human habitations.*

O.E. *ærn*, "house," "abode," "dwelling," cf. O.E. *bere ærn*, "barn," *eorþ ærn*, "grave," *hord ærn*, "treasury," etc. See Wyld, Pt II.

SUSSEX NAMES. Barn Rocks(?), Barnham(?) (q.v. Pt I),

Fryern House, Waldron, and possibly Woodhorn (which may, however, have O.E. *horn*, *hyrne*, "corner," as its second element.

O.E. *burg*, *burh*, dative *byrig*, originally "a fortified place," "fastness," then a "castle," "city," "town." See Wyld, Pt II. On the confusion between *burh* and *beorh* in early forms see remarks on *beorh* under (6) above.

In mod. Engl. pl.-ns. O.E. *burg* generally appears as *Bur-*, when a first element, *-borough* or *-burg* or *-boro* when a second, while the dative appears always as *-bury*.

SUSSEX NAMES. Burdocks(?), Burpham (< **burhhām*), Burton, Burwash (< **burgæsc*), Bury, Cissbury Hill, Conyboro, Crowborough, Saxonbury Hill, Shermanbury, Wisborrow or Wisborough Green (see *beorh* above), Wolstonbury Beacon and West Borough.

O.E. *cester*, "a city" < Lat. *castra*. In the forms *-chester*, *-cester*, and *-caster*, a very common element in Engl. pl.-ns.

SUSSEX NAME. Chichester.

O.E. *cot*, *cott*, "dwelling," "house." See Wyld, also Alexander (Notes on some O.E. elements, p. 25).

SUSSEX NAMES. Coates (= *cotes*, gen. sing.), Sennicots, Wodmancote or Woodmancot.

O.E. (*ge*)*dræg* = modern "dray"; in pl.-ns. = "cot for shelter." E.D.D. under *Dray* (2) gives "a squirrel's nest" rarely "a larger nest, such as a hawk's, in Cumb., Nhp., Shrops., Berks., Beds., Kent, Surrey, Sussex, Hants. and Wilts." See Skeat's remarks on *dray* = "cot for shelter" in Berks. Pl.-Ns. and Cambs. Pl.-Ns., under *Drayton*, also Walker, Derby. Pl.-Ns., under *Draycot*.

SUSSEX NAME. Cowdray Park.

O.E. *fæsten*, "fastness," "fortress." See Jellinghaus, who gives examples of *Fæsten* in O.E., and refers to Low Germ. *veste* = "gerichtsbezirk."

SUSSEX NAME. Brimfast.

O.E. *fald*, earlier *falud*, "fold." See Wyld and Jellinghaus. The confusion between O.E. *fald* and O.E. *feld* in early forms has already been noted (Introduction, under "Word-Formation," and under *feld* in (5) above).

SUSSEX NAMES. Ashfold, Cowfold, Flitchfold, Ifold, Kingsfold, Lickfold, Shernfold, Slinfold, Woldringfold.

O.E. **gea* (cf. *yeo-* in "yeoman"); O.H.G. *gawi*, *gewi*, *kawi*, *kewi*; Gthc. *gawi* = "village."

SUSSEX NAME. Southease (q.v. Pt I).

Mod. *grange*; M.E. *grange*, *graunge* < O.Fr. *grange* < Lat. *grania*, cf. *granum* (Skeat) = "a barn," later "a farm house."

SUSSEX NAME. The Grange.

O.E. *mynster*, "minster" < Lat. *monasterium*. Jellinghaus says *-minster* is "häufig in namen," but gives no examples.

Mod. Engl. names—Leominster, Westminster, etc.

SUSSEX NAMES. Lullington (early forms), Lyminster, Parkminster.

O.E. *stede*, "a place," "stead"; N.H.G. *stätte*; Gthc. *staps*
A very common element in Engl. pl.-ns.

SUSSEX NAMES. Bersted, Binsted, Buxted, Elstead, Grinstead, Hapstead, Hempstead, Hickstead, Holmstead, Horsted, Minsted, Prinsted, Stansted, Walstead.

O.E. *stoc*, *stocc*, "stock," "post," "village."

On the meaning of the word Jellinghaus says "*Stock* als praefix wird die Bedeutung 'stamm,' 'geschlecht' des ae. *stoc* haben und die Mutterstadt eines Distriktes anzeigen; als suffix wird es oft das Dorf bedeuten das durch eine Person gegründet ist."

Stoke and *Stoughton* are very common pl.-ns. in England.

SUSSEX NAMES. Stoke, Stockbridge, Stoughton.

O.E. *stōw*, "place," "mansion," "house"; see Wyld and Jellinghaus.

SUSSEX NAME. Plaistow.

O.E. *tūn*, "an enclosed piece of land, manor, hamlet." See Wyld, Jellinghaus, and Middendorff.

SUSSEX NAMES. Aldrington, Alfriston, Almodington, Ancton or Ankton (Angmering < O.E. **Angemāringatūn*), Arlington, Ashington, Atherington, Babintone, Bebyngton or Bepton, Barlavington, Barlton or Belton, Binderton, Bishopstone,

Blachington, Blackstone(?), Brighton, Buddington, Buncton, Burton, Cattlestone(?), Chalvington, Charleston, Charlton, Chillington, Clayton, Compton, Dallington, Denton, Ditton Place, Donnington, Duncton, Durrington, Easton, Eckington, Edburton, Folkington, Friston, Funtington, Halton, Hangleton, S. Heigh-ton, Hollington, Houghton, Jevington, Kingston, Laughton, Lavington, Lidlington, Littlehampton, Lordington, Lullington, Merston, Middleton, Milton Hide, Milton Street, Norton, Novington, Nyton, Pixton, Plumpton, Preston, Racton, Runcton, Runtington, Rustington, Salvington, Sherrington Manor, Singleton, Storrington, Stoughton, Strettington, Sullington, Sutton, Tillington, Toddington *or* Tottington, Tortington, Trotton, Upperton, Waddington, Walberton, Walderton, Washington, Westerton, Westmeston, Weston, Whatlington, Wilmington, Wiston, Woolavington, Yapton.

Engl. *tye*, M.E. *teghe*, *tighe* < O.E. *tēāh*, dative *tēāge*, "paddock." This element has been previously noted by Middendorff in his *Al. Flurnamenbuch*, but his remarks are somewhat vague. The word is descended from O.E. *tēāg*, *tēāh* in the same way as *high* from *hēāh* and *eye* from *ēāye*.

Sweet (A.-S. Dict.) defines *tēāg* as "bond," "chain," "tape," "case," "casket," "enclosure," "paddock." The last two meanings are appropriate to our purpose. The word is related to O.E. *tēōn*, "to draw together," "pull," and the sense is "something drawn *or* pulled together," i.e. "something enclosed."

On *-tye* the E.D.D. remarks :

"*tye*, Suff., Essex, Kt., Ssx. Also written *tie* (Essex), *tay* (Essex), *teage* (Kt.), *tey* (Essex) =

(1) extensive common pasture or field,

(2) a close or enclosure.

...In Kent the word *tigh* is still used in the same sense (i.e. a close or enclosure, a croft)..."

SUSSEX NAMES. Brambletye, Lavertye.

Anstey may be, as Skeat, Herts. Pl.-Ns., supposes, simply O.E. *ānstiga*, "path for one," or it may be O.E. **Anestēāh*, where *Ane* is a pers. n. Again *Holttye* may be O.E. **holtēg* or **holt-tēāh*. In the absence of early forms it is impossible to decide.

O.E. *weorþ*, "worth," "homestead," "farm," also *worþig*, *weorþig*. See Wyld and Jellinghaus, who says (*Anglia* xx. p. 330) "...Etwa 300 wohnorte auf *-worth*. Sehr beachtenswert ist, dass in Nthmb. und Cumb. fast gar keine vorkommen." The dictionaries give the Latin equivalents *prædium*, *platea*, *vicus*.

SUSSEX NAMES. Aldworth, Aldsworth, Byworth, Colworth, Densworth, Fittleworth, Lodsworth, Petworth, Tottingworth Park, Worthing.

O.E. *wic*, "habitation," "house," "dwelling," "abode."

Much has been written on this element. See Wyld, Jellinghaus and Middendorff, also Cornelius' suggestive article in the "Festschrift für Lorenz Morsbuch," *Stud. zur engl. Philol.* 50. The interesting point is that O.E. *wīc* unstressed always appears in Sussex as *-wick*, with the back-stop. It is, in my opinion, unnecessary to assume wholesale Northern influence to account for this form. Out of such O.E. compounds as *wīcfold*, *wīcford*, *wīcþorn*, etc. (where the *ī* immediately precedes a voiceless open consonant) there would normally develop M.E. forms in *wik-*, which was then evidently chosen as the standard type in Sussex.

Jellinghaus, p. 327, says, "Engl. dial. *wick*...Da *wic* sowohl bei den Deutschen als bei den Dänen gebräuchlich war, so treten die *-wick*, *-wich* am häufigsten einerseits in Sussex, Somerset, andererseits in Yorkshire, Northamptonsh. auf..."

Looking through J.'s list of modern names containing this element I find there are 21 *-wick*'s, *-wyck*'s against two *-wich*'s.

SUSSEX NAMES (i) *-wick*, etc. Aldwick, Berwick, Lydwicke, Lynnick Street, Newick, Ridg(e)wick *or* Rudg(e)wick, Roundwick, Rumboldswyke, Sedgwick, Southwick (= *saðik*), Terwick, Wick, Wicks, Wykehurst Park.

(ii) *wych*. Wychcross Place.

10. *Human occupation and rank.*

O.E. *biscop*, "bishop." A very early loan-word from Lat. *episcopus*, Gk. *ἐπίσκοπος*. Cf. O.H.G. *piskof*, *biskof*; O.Norse *biskup*. See Wyld, Pt II.

SUSSEX NAME. Bishopstone.

O.E. *cýning*, "a king." The form *Coning-* from the Norse cognate *konungr* often appears in Northern names. See Wyld, Pt II.

SUSSEX NAMES. Kingsfold, Kingsham, Kingston.

O.E. *fiscere*, "fisher."

SUSSEX NAME. Fishergate.

O.E. *prēost*, "priest"; O.L. German *prēstar* < Lat. *presbyter* < Gk. *πρεσβύτερος*. See Wyld.

SUSSEX NAMES. Preston and Priestcomb.

O.E. **slaga*, **slaha*, connected with *slēan*, and derived from the base **slag-* by means of the agent suffix *-a* = "a slayer," perhaps in the sense of "deer-stalker," or possibly "butcher." Unfortunately I cannot trace the word in modern dialects, though it may well have existed in O.E.

SUSSEX NAME. Slaugham (= slæfm).

O.E. *waca*, "watcher," "guardian" (= O.E. *weard*), derived, in the same way as the preceding word, from the base **wak-*, "to be on guard," "to be awake" (cf. *wacian*).

SUSSEX NAME. Wakehurst (q.v. Pt I).

O.E. *wealh*, *walh*, "a foreigner," "stranger." See Wyld.

SUSSEX NAMES. Walstead Common (?), Walton, Wannock.

II. *Elements denoting colours.*

O.E. *blāc*, "bright," "shining"; O.S. *blēk*; O.H.G. *pleih*, *bleih*. This element often appears in M.E. as *blāk-* through vowel-shortening before consonant-groups, and is then indistinguishable from M.E. *blāk*, *black* < O.E. *blæc*, which has precisely the opposite meaning, i.e. "black." Possibly the following names may contain O.E. *blæc*.

SUSSEX NAMES. Blackboys, Blacklands, Blacknest, Black-rock, Blackstone? (= **blæcstan*, **blæcstān* or Blaca's *tūn*?), Blackwaters.

Blackham (q.v. Pt I) probably represents O.E. **Blacanhām*.

O.E. *grēne*, "green"; O.H.G. *gruoni*, *kruoni*; O.S. *grōni*. Also used in mod. Engl. as a noun meaning "a field," "expanse

of pasture-land." See Wyld, Pt II. On modern names in *Grin-* cf. remarks under *Grinstead* above. Cf. also the pronunciation (grinidž) = *Greenwich*.

SUSSEX NAMES. West Green, Greenhurst, Grinstead, Barn's Green, Bell's Yew Green, Bodle Street Green, Brook's Green, Broomer's Green, Chapel Green, Dragon's Green, Eridge Green, Ford's Green, Furner's Green, Gipsy Green, Gosden Green, Hale Green, Hurst Green, Ingram's Green, Maynard's Green, Muddle's Green, Partridge Green, Pell Green, Pont's Green, Rose Green, Rushlake Green, Shover's Green, Sidley Green, Sparrow's Green, Stunt's Green, Wisborough Green, Woodman's Green, Wood's Green.

O.E. *rēād*, "red"; O.H.G. *rōt*, O.Norse *rauðr*; cf. Gk. *ἐρυθρός*, Lat. *ruber*. Appears in modern names as *Red-*, *Rad-*, and in the North often as *Rod-*, through influence of the Norse *rauðr*. On the Sussex *Rodmill* and its early forms see Pt I.

SUSSEX NAMES. Redford, Rodmell *or* Rodmill.

II. *Various elements (mostly descriptive adjectives).*

O.E. *bāl*, "funeral-pyre," a common word in O.E. poetry; O.H.G. *bāl*. See Wyld.

SUSSEX NAME. Balcombe(?) (see Pt I).

O.Fr. *bel* < Lat. *bellus*, "beautiful," "bright," "fair"; see Wyld.

SUSSEX NAMES. Beachy Head, Belmoredean House(?), Belton(?) (= Barlavington, see Pt I), Beaufort, Bewbush.

O.E. *bōc*, "a book," but also "a charter." Cf. the passage "þæt is þæt hire lāfde hire fæder land and *bōc*, swā he mid rihte beget" (A.-S. Reader⁷, No. xii. p. 54).

In O.E. pl.-ns. *Bocholt*, C.D. No. 72, *Boclund*, No. 1210, and *Boctun*, No. 1315 (cit. Kemble, Index to C.D. vol. vi). O.E. *bōc* appears in modern names as *Book-* or *Buck-*, e.g. in *Bookholt*, Kt., *Buckland*, Berks.

SUSSEX NAMES. Buckham Hill(?), Bucksteep, Buckwell, Buckhurst Park, Buxted.

O.E. *brād*, "broad," "wide." This element always appears in Ssx. names as *Broad*-, never as *Brad*-. This may be due to the analogy of the independent adjective, or to the preservation of an O.E. inflected type. See Wyld, Pt II.

SUSSEX NAMES. Broadoak, Broadford (contrast Yorks. *Bradford*), Broadhill, Broadwater.

O.E. **bræd*, a mutated form of *brād*, is preserved in the modern Sussex name *Brede* (q.v. in Pt I).

O.E. *brant*, "steep," "high." See remarks under *Brantridge* in Pt I.

SUSSEX NAME. Brantridge.

O.E. *eald*, *ald*, "old." On *Eald(a)* as a pers. n. see *Aldingbourne* in Pt I.

SUSSEX NAMES. Aldworth, Old Fishbourne, Old House Warren, Oldlands Hall.

-ett, the N.-Fr. diminutive suffix. -et or -ot is common as a diminutive suffix in pers. ns., cf. *Elias* and *Elliott*, *Emma* and *Emmot*, *William* and *Wilmot*, etc.

SUSSEX NAMES. Easthampnett and Westhampnett. Haslet may be O.E. **hæsel* + -ett or *Has-lete* = O.E. **Hasan lāte*.

O.E. *fæger*, "fair"; O.H.G., O.S. *fagar*. See Wyld.

SUSSEX NAMES. Fairwarp (?), Faircrouch (?). On *Fairlight* see Pt I above.

O.E. *hēāh*, "high." Naturally very common in pl.-ns. at all periods. See Wyld, Pt II.

SUSSEX NAMES. Heighton, High Beeches, High Cross, Highbrook, Highdown Hill, Highfurl, Highleigh, Highley Manor, High Hurstwood.

On *Highden* see Pt I above.

O.E. *lang*, *long*, "long"; see Wyld.

SUSSEX NAMES. Langley, Langley Font and Langley Point.

O.E. *nīwe*, "new"; O.H.G. *niwi*, *niurwi*; Gthc. *niujis*; Gk. *νέος*, Lat. *novus*. A very common element in Engl. pl.-ns.

SUSSEX NAMES. Newells(?), New Fishbourne, New Groombridge, Newbridge, Newhaven, Newick, Newtimber.

O.E. *rūh*, "rough"; M.E. *rough* (= *rūh*). In pl.-ns. the *-h* is lost before a following consonant. The following names may equally well contain O.E. *rūh*, the adjective, or *Rūga*, a pers. n.

SUSSEX NAMES. Roff Park, Roughey, Rogate, Rusper.

O.E. *stēap*, "steep," used as a noun in the sense of "steep ascent," "hill-side." Cf. *The Steep*, the name of a street in Lincoln.

SUSSEX NAMES. Bucksteep, Steep.

O.E. *twi*-, *twige*, *twiwa*, "twice," "double," "bi-"

Skeat finds this element in the Berks. and Herts. *Twyford* and quotes from Bede's Eccl. Hist. iv. 28 "...*ad twifyrði*, quod significat *ad duplex vadum*...."

SUSSEX NAMES. Twyford, Twineham (q.v. Pt I).
